**The Ultimate History of Video Games, Volume 1** Steven L. Kent, 2010-06-16 The definitive behind-the-scenes history of the dawn of video games and their rise into a multibillion-dollar business "For industry insiders and game players alike, this book is a must-have."—Mark Turmell, designer for Midway Games and creator of NBA Jam, NFL Blitz, and WrestleMania With all the whiz, bang, pop, and shimmer of a glowing arcade, volume 1 of The Ultimate History of Video Games reveals everything you ever wanted to know and more about the unforgettable games that changed the world, the visionaries who made them, and the fanatics who played them. Starting in arcades then moving to televisions and handheld devices, the video game invasion has entranced kids and the young at heart for nearly fifty years. And gaming historian Steven L. Kent has been there to record the craze from the very beginning. The Ultimate History: Volume 1 tells the incredible tale of how this backroom novelty transformed into a cultural phenomenon. Through meticulous research and personal interviews with hundreds of industry luminaries, Kent chronicles firsthand accounts of how yesterday's games like Space Invaders, Centipede, and Pac-Man helped create an arcade culture that defined a generation, and how today's empires like Sony, Nintendo, and Electronic Arts have galvanized a multibillion-dollar industry and a new generation of games. Inside, you'll discover • the video game that saved Nintendo from bankruptcy • the serendipitous story of Pac-Man's design • the misstep that helped topple Atari's \$2-billion-a-year empire • the coin shortage caused by Space Invaders • the fascinating reasons behind the rise, fall, and rebirth of Sega • and much more! Entertaining, addictive, and as mesmerizing as the games it chronicles, this book is a must-have for anyone who's ever touched a joystick.

Galaga Michael Kimball, 2014 An emotional chronicle of classic arcade game fandom.

**Astronomy from Wide-Field Imaging** H.T. MacGillivray, E.B. Thomson, Barry M. Lasker, I. Neill Reid, David F. Malin, Richard M. West, Hilmar Lorenz, 2012-12-06 H.T. MacGILLIVRAY Royal Observatory Blackford Hill Edinburgh EH9 3HJ Scotland U.K. IAU Symposium No. 161 on 'Astronomy from Wide-Field Imaging', held in Potsdam, Germany, during 23-27th August 1993, was the first conference organised by the recently-formed Working Group of IAU Commission 9 on 'Wide-Field Imaging'. This Working Group was instigated during the XX1st meeting of the General Assembly of the International Astronomical Union in Buenos Aires in 1991, and represented a merging of the former formal IAU Working Group on 'Astronomical Photography' and the informal 'Digitised Optical Sky Surveys' Working Group. Dr. Richard West was 'invited' to be Chairperson, and hence was given the daunting task of organising the Group from scratch. The very fact that the first conference after only two years was a major IAU Symposium says much about the determination and enthusiasm of Richard West to fulfilling the aims of the new Working Group. The siting of the conference in Potsdam in formerly East Germany provided an excellent opportunity to advantage from the political changes in Eastern Europe. Good access to the meeting was possible by scientists from Eastern European countries, allowing exchange of information on the very important Wide-Field facilities in both East and West, information on the rich archives of photographic plates that exist in both East and West, and allowing discussions between scientists facing very similar problems in both East and West.
