Star Trek: 50 Artists 50 Years Titan Books, 2016-09-06 To coincide with the 50th anniversary of the original Star Trek TV series, CBS Consumer Products have commissioned a series of art pieces to celebrate moments, characters, storylines and episodes from the franchise. Artists from around the world as well as famous fans have lovingly made posters, photos, sculptures, comic strips, textiles and much more to commemorate this beloved show. Foreword by Nicholas Meyer.

New York, 2005

The Manchurian Candidate Richard Condon, 2013-11-25 The classic thriller about a hostile foreign power infiltrating American politics: “Brilliant . . . wild and exhilarating.” —The New Yorker A war hero and the recipient of the Congressional Medal of Honor, Sgt. Raymond Shaw is keeping a deadly secret—even from himself. During his time as a prisoner of war in North Korea, he was brainwashed by his Communist captors and transformed into a deadly weapon—a sleeper assassin, programmed to kill without question or mercy at his captors’ signal. Now he’s been returned to the United States with a covert mission: to kill a candidate running for US president . . . This “shocking, tense” and sharply satirical

novel has become a modern classic, and was the basis for two film adaptations (San Francisco Chronicle). “Crammed with suspense.” –Chicago Tribune “Condon is wickedly skillful.” –Time

Pilgrim at Tinker Creek Annie Dillard, 2009-10-13 Winner of the Pulitzer Prize “The book is a form of meditation, written with headlong urgency, about seeing. . . . There is an ambition about her book that I like. . . . It is the ambition to feel.” – Eudora Welty, New York Times Book Review *Pilgrim at Tinker Creek* is the story of a dramatic year in Virginia's Roanoke Valley, where Annie Dillard set out to chronicle incidents of beauty tangled in a rapture with violence. Dillard's personal narrative highlights one year's exploration on foot in the Virginia region through which Tinker Creek runs. In the summer, she stalks muskrats in the creek and contemplates wave mechanics; in the fall, she watches a monarch butterfly migration and dreams of Arctic caribou. She tries to con a coot; she collects pond water and examines it under a microscope. She unties a snake skin, witnesses a flood, and plays King of the Meadow with a field of grasshoppers. The result is an exhilarating tale of nature and its seasons.

Archaeology, Anthropology, and Interstellar Communication
National Aeronautics Administration, Douglas Vakoch, 2014-09-06
Addressing a field that has been dominated by astronomers,

physicists, engineers, and computer scientists, the contributors to this collection raise questions that may have been overlooked by physical scientists about the ease of establishing meaningful communication with an extraterrestrial intelligence. These scholars are grappling with some of the enormous challenges that will face humanity if an information-rich signal emanating from another world is detected. By drawing on issues at the core of contemporary archaeology and anthropology, we can be much better prepared for contact with an extraterrestrial civilization, should that day ever come.

What You See Is What You Hear Dario Martinelli, 2020-01-01

What You See Is What You Hear develops a unique model of analysis that helps students and advanced scholars alike to look at audiovisual texts from a fresh perspective. Adopting an engaging writing style, the author draws an accessible picture of the field, offering several analytical tools, historical background, and numerous case studies. Divided into five main sections, the monograph covers problems of definitions, history, and most of all analysis. The first part raises the main problems related to audiovisuality, including taxonomical and historical questions. The second part provides the bases for the understanding of audiovisual creative communication as a whole, introducing a novel theoretical model for its analysis. The next three part focus elaborate on the model in all its constituents and with plenty of case studies taken from the field of cinema, TV, music videos, advertising and other forms of audiovisuality. Methodologically, the book is informed by different paradigms of film and media studies, multimodality studies, structuralism, narratology, “auteur theory” in the broad sense, communication studies, semiotics, and the so-called “Humanities.” *What You See Is What You Hear* enables

readers to better understand how to analyze the structure and content of diverse audiovisual texts, to discuss their different idioms, and to approach them with curiosity and critical spirit.

The Speed of Life James Victor Jordan, 2018-11-06 What happens when a brutal crime threatens a mother's love for her son? An old Florida family and those in their orbit get caught in a torrent of passion, a deadly legal system, and the mythology of the Everglades, which runs as deep as this story does. Propulsive, engaging, evocative, beautiful writing. Estella Verus - part Seminole, part black, part white - a federal prosecutor in South Florida, is the victim of a home invasion during which she is savagely beaten. The perpetrator leaves a note saying that Estella's son, Andrew, sent him to do it. When Andrew is charged with complicity in the crime, Estella is desperate to talk to him in her efforts to discover the truth, but while she's still in the hospital recovering from her injuries, Andrew's lawyer has her served with a restraining order, preventing her from talking to him to protect his Fifth Amendment right against self-incrimination. Thus begins *The Speed of Life*, literary fiction told through multiple plots by multiple narrators, mirroring the structure of David Mitchell's *Cloud Atlas* and Jennifer Egan's *A Visit From the Goon Squad*. A search for

the truth of whether or not Andrew sent the intruder to harm his mother is the central plot, but it overlaps other storylines, each exploring the novel's theme: How can we know what is real and what is just? These should be questions at the heart of every trial but *The Speed of Life* takes these questions further, exploring them in contexts beyond the law, including romantic love, familial love, neighborly love, shamanism and even astrophysics as the story involves real science, as does *The Martian*, by Andy Weir and math, philosophy, and the history of science as in the novels of Neal Stephenson. T. C. Boyle, Kip Thorne, Tom Holland, Madison Smartt Bell, and Aram Saroyan have read the novel and written blurbs. T. C. Boyle says of *The Speed of Life* that it is a thoroughly enjoyable triumph of a first novel. Professor Thorne credits *The Speed of Life* with solid astrophysics. Kirkus Reviews has reviewed the manuscript calling it impressive and that Descriptions . . . are primarily images that Jordan sears onto the pages.

The New Yorker ,2005

The Universe in the Rearview Mirror Dave

Goldberg,2014-06-24 “A great read... Goldberg is an excellent guide.”—Mario Livio, bestselling author of *The Golden Ratio*
Physicist Dave Goldberg speeds across space, time and everything

in between showing that our elegant universe—from the Higgs boson to antimatter to the most massive group of galaxies—is shaped by hidden symmetries that have driven all our recent discoveries about the universe and all the ones to come. Why is the sky dark at night? If there is anti-matter, can there be anti-people? Why are past, present, and future our only options? Saluting the brilliant but unsung female mathematician Emmy Noether as well as other giants of physics, Goldberg answers these questions and more, exuberantly demonstrating that symmetry is the big idea—and the key to what lies ahead.

Astronauts Working in Space Angela Royston, 2010 Introduces the life of astronauts, including where they work, how they eat, and how they sleep.

Dancing with Butterflies Reyna Grande, 2009-10-06 In *Dancing with Butterflies*, Reyna Grande renders the Mexican immigrant experience in “lyrical and sensual” (Publishers Weekly, starred review) prose through the poignant stories of four women brought together through folklorico dance. *Dancing with Butterflies* uses the alternating voices of four very different women whose lives interconnect through a common passion for their Mexican heritage and a dance company called Alegría. Yesenia, who founded

Alegría with her husband, Eduardo, sabotages her own efforts to remain a vital, vibrant woman when she travels back and forth across the Mexican border for cheap plastic surgery. Elena, grief-stricken by the death of her only child and the end of her marriage, finds herself falling dangerously in love with one of her underage students. Elena's sister, Adriana, wears the wounds of abandonment by a dysfunctional family and becomes unable to discern love from abuse. Soledad, the sweet-tempered illegal immigrant who designs costumes for Alegría, finds herself stuck back in Mexico, where she returns to see her dying grandmother. Reyna Grande has brought these fictional characters so convincingly to life that readers will imagine they know them.

A Year with Swollen Appendices Brian Eno, 2020-11-17 The diary and essays of Brian Eno republished twenty-five years on with a new introduction by the artist in a beautiful hardback edition. 'One of the seminal books about music . . . an invaluable insight into the mind and working practices of one of the industry's undeniable geniuses.' GUARDIAN At the end of 1994, Brian Eno resolved to keep a diary. His plans to go to the cinema, theatre and galleries fell quickly to the wayside. What he did do - and write - however, was astonishing: ruminations on his collaborative work

with David Bowie, U2, James and Jah Wobble, interspersed with correspondence and essays dating back to 1978. These 'appendices' covered topics from the generative and ambient music Eno pioneered to what he believed the role of an artist and their art to be, alongside adroit commentary on quotidian tribulations and happenings around the world. This beautiful 25th-anniversary hardcover edition has been redesigned in the same size as the diary that eventually became this book. It features two ribbons, pink paper delineating the appendices (matching the original edition) and a two-tone paper-over-board cover, which pays homage to the original design. An intimate insight into one of the most influential creative artists of our time, *A Year with Swollen Appendices* is an essential classic.

The Search for the "Manchurian Candidate" John Marks, 1991

Get Up Mum Justin Heazlewood, 2018-05-21 It's 1992 in Burnie, Tasmania and 12-year-old Justin lives alone with his mum. When she is well, Mum is perfect. She knows he likes his carrots raw and his toast cooled, and she knows how to sooth his growing pains. But when she is sick she cries uncontrollably and never gets out of bed. High school is on the horizon and Justin is bursting with adolescent energy. But his mum's mental illness hangs over him

like a shadow and he feels the need to grow up fast. Told with youthful exuberance, *Get Up Mum* is a wildly endearing, entertaining and incredibly powerful memoir about love, family, and coming-of-age.

My Bad Tequila Rico Austin, 2010-09 Mystery, mayhem, madness, margaritas, and Mexico. *My Bad Tequila* is one man's epic journey across two continents and four countries with 50 years of adventure.

The Plenitude Rich Gold, 2021-06-22 Lessons from and for the creative professions of art, science, design, and engineering: how to live in and with the Plenitude, that dense, knotted ecology of human-made stuff that creates the need for more of itself. We live with a lot of stuff. The average kitchen, for example, is home to stuff galore, and every appliance, every utensil, every thing, is compound—composed of tens, hundreds, even thousands of other things. Although each piece of stuff satisfies some desire, it also creates the need for even more stuff: cereal demands a spoon; a television demands a remote. Rich Gold calls this dense, knotted ecology of human-made stuff the Plenitude. And in this book—at once cartoon treatise, autobiographical reflection, and practical essay in moral philosophy—he tells us how to understand and live

with it. Gold writes about the Plenitude from the seemingly contradictory (but in his view, complementary) perspectives of artist, scientist, designer, and engineer—all professions pursued by him, sometimes simultaneously, in the course of his career. I have spent my life making more stuff for the Plenitude, he writes, acknowledging that the Plenitude grows not only because it creates a desire for more of itself but also because it is extraordinary and pleasurable to create. Gold illustrates these creative expressions with witty cartoons. He describes seven patterns of innovation—including The Big Kahuna, Colonization (which is illustrated by a drawing of The real history of baseball, beginning with Play for free in the backyard and ending with Pay to play interactive baseball at home), and Stuff Desires to Be Better Stuff (and its corollary, Technology Desires to Be Product). Finally, he meditates on the Plenitude itself and its moral contradictions. How can we in good conscience accept the pleasures of creating stuff that only creates the need for more stuff? He quotes a friend: We should be careful to make the world we actually want to live in.
