*The Global Game of Oil Pipelines* Gulshan Dietl,2021-11-29 Oil has long been and will continue to be at the centre of the global economy. This book explores the oil trade, energy

(geo)politics, and new trends in regionalising or globalising the oil industry in the new era of international relations and economic competition. Energy pipelines carrying oil and gas from the well-head to the market, generally run through two or more states; and often from one continent to the other. This book maps the oil flowing through international and intercontinental pipelines and unravels the political, commercial and technological considerations behind the mapping of oil routes and forging of trade ties between nation-states. Through case studies from the major oil-exporting regions like Saudi Arabia, Iraq, Iran, the USA, Canada and Russia, it analyses the changing trends in their policies around oil trade, bilateral relations, energy, and security. It also considers the environmental protests around the continued dependency on oil, the teapot refineries under the Islamic State, investments, oil lobbies and insurrections to understand the broad picture of shifting regional and geopolitical realities and the scramble for vital resources. This comprehensive book will be of interest to students of the geopolitics of energy, international relations, security and strategic studies, energy studies as well as the media and with policymakers.

**Agents for Games and Simulations** Frank

Dignum,Jeffrey Bradshaw,Barry G. Silverman,Willem van Doesburg,2009-12-01 Research on multi-agent systems has provided a promising technology for implementing cognitive intelligent non-playing characters. However, the technologies used in game

engines and multi-agent platforms are not readily compatible due to some inherent differences in concerns. Where game engines focus on real-time aspects and thus propagate efficiency and central control, multi-agent platforms assume autonomy of the agents. Increased autonomy and intelligence may offer benefits for a more compelling gameplay and may even be necessary for serious games. However, problems occur when current game design techniques are used to incorporate state-of-the-art multi-agent system technology. A very similar argument can be given for agent-based (social) simulation. This volume contains the papers presented at AGS 2009, the First International Workshop on Agents for Games and Simulations, held in Budapest on May 11, 2009. The focus of the workshop was on the particular challenges facing those using agent technology for games and simulations, with topics covering the technical, conceptual and design aspects of the field.

**Applied Technologies** Miguel Botto-Tobar, Marcelo Zambrano Vizuite, Pablo Torres-Carrión, Sergio Montes León, Guillermo Pizarro Vásquez, Benjamin Durakovic, 2020-03-02 This first volume of the three-volume set (CCIS 1193, CCIS 1194, and CCIS 1195) constitutes the refereed proceedings of the First International Conference on Applied Technologies, ICAT 2019, held in Quito, Ecuador, in December 2019. The 124 full papers were carefully reviewed and selected from 328 submissions. The papers are organized according to the following topics: technology trends; computing; intelligent systems; machine vision; security; communication; electronics; e-learning;

e-government; e-participation.

Boost Your Brain Power in 60 Seconds Michelle Schoffro Cook, 2016-11-01 Scientists are predicting that within 8 years, brain disease will kill or disable more people than cancer and heart disease combined. Given this shocking new research, we urgently need to know how to protect and improve our brain health. In Boost Your Brain Power in 60 Seconds, Dr. Michelle Schoffro Cook aims to turn this prediction around with her prescriptive—and proven—plan. Several years ago, Dr. Cook was in a terrible car accident in which she suffered a brain injury, resulting in cognitive impairment, partial paralysis in her left arm, and severe migraines. Utilizing her expertise in natural medicine, Dr. Cook developed a program that improved her memory, cured her migraines, and

reversed her arm paralysis. After her recovery, she continued to research natural methods to improve memory, reduce memory loss, and prevent degenerative brain diseases. **Boost Your Brain Power in 60 Seconds** an easy, customizable, 4-week plan filled with fun, doable tips you can execute in just 60 seconds a day, including 50 delicious recipes featuring brain-boosting super foods, success stories, and a self-assessment quiz.
