Video Game Audio Christopher Hopkins, 2022-08-17 From the one-bit beeps of Pong to the 3D audio of PlayStation 5, this book examines historical trends in video game sound and music. A range of game systems sold in North America, Europe and Japan are evaluated by their audio capabilities and industry competition. Technical fine points are explored, including synthesized v. sampled sound, pre-recorded v. dynamic audio, backward compatibility, discrete and multifunctional soundchips, storage media, audio programming documentation, and analog v. digital outputs. A timeline chronicles significant developments in video game sound for PC, NES, Dreamcast, Xbox, Wii, Game Boy, PSP, iOS and Android devices and many others.

The System Jeff Benedict, Armen Keteyian, 2014-08-26 A Shelf Awareness Best Book of the Year NCAA football is big business. Every Saturday millions of people file into massive stadiums or tune in on television as athlete-students give everything they've got to make their team a success. Billions of dollars now flow into the game. But what is the true cost? The players have no share in the oceans of money. And once the lights go down, the glitter doesn't shine so brightly. Filled with mind-blowing details of major NCAA football scandals, with stops at Ohio State, Tennessee, Texas Tech, Missouri, BYU, LSU, Texas A&M and many more, *The System* explores and exposes the complex, and perhaps broken, machine that churns behind the glamour of college football. With a New Afterword.

The Craft of Scientific Presentations Michael Alley, 2006-05-17 This timely and hugely practical work provides a score of examples from contemporary and historical scientific presentations to show clearly what makes an oral presentation effective. It considers presentations made to persuade an audience to adopt some course of action (such as funding a proposal) as well as presentations made to communicate information, and it considers these from four perspectives: speech, structure, visual aids, and delivery. It also discusses computer-based projections and slide shows as well as overhead projections. In particular, it looks at ways of organizing graphics and text in projected images and of using layout and design to present the information efficiently and effectively.
