Game of My Life South Carolina Gamecocks Rick Scoppe,Charlie Bennett,2013-07-01 Several prominent South Carolina football players of the past share their fondest single-game experience and memories. Some of these games are the greatest in school history, while others are ordinary save for significant personal meaning. In each case, it is the player who singles out the game, the moment in time that to him is the most defining of his Gamecock football career. Together these stories weave a tapestry of South Carolina Gamecock football history. Heisman Trophy-winner George Rogers, as well as other legends like ponytailed QB Steve Taneyhill; record-setting QB Todd Ellis; Dan Reaves, an eventual Super Bowl head coach; running back Brandon Bennett; and running back Rob DeBoer are profiled in this unique book. Game of My Life South Carolina Gamecocks takes readers down memory lane, while also providing an in-depth look into the men and games that helped shape and build the Gamecock football heritage.

So Many Christians, So Few Lions George Yancey,David A. Williamson,2014-11-06 So Many Christians, So Few Lions is a provocative look at anti-Christian sentiments in America. Drawing on both quantitative and qualitative research, authors George Yancey and David A. Williamson show that even though (or perhaps because) Christianity is the dominant religion in the United States, bias against Christians also exists—particularly against conservative Christians—and that this bias is worth understanding. The book does not attempt to show the prevalence of anti-Christian sentiments—called Christianophobia—but rather to document it, to dig into where and how it exists, to explore who harbors these attitudes, and to examine how this bias plays itself out in everyday life. Excerpts from the authors' interviews

highlight the fear and hatred that some people harbor towards Christians, especially the Christian right, and the ways these people exhibit elements of bigotry, prejudice, and dehumanization. The authors argue that understanding anti-Christian bias is important for understanding some social dynamics in America, and they offer practical suggestions to help reduce religious intolerance of all kinds.

Keywords for Disability Studies Rachel Adams, Benjamin Reiss, David Serlin, 2015-08-14 Introduces key terms, concepts, debates, and histories for Disability Studies Keywords for Disability Studies aims to broaden and define the conceptual framework of disability studies for readers and practitioners in the field and beyond. The volume engages some of the most pressing debates of our time, such as prenatal testing, euthanasia, accessibility in public transportation and the workplace, post-traumatic stress, and questions about the

beginning and end of life. Each of the 60 essays in *Keywords for Disability Studies* focuses on a distinct critical concept, including “ethics,” “medicalization,” “performance,” “reproduction,” “identity,” and “stigma,” among others. Although the essays recognize that “disability” is often used as an umbrella term, the contributors to the volume avoid treating individual disabilities as keywords, and instead interrogate concepts that encompass different components of the social and bodily experience of disability. The essays approach disability as an embodied condition, a mutable historical phenomenon, and a social, political, and cultural identity. An invaluable resource for students and scholars alike, *Keywords for Disability Studies* brings the debates that have often remained internal to disability studies into a wider field of critical discourse, providing opportunities for fresh theoretical considerations of the field’s core presuppositions through a variety of disciplinary perspectives. Visit keywords.nyupress.org for online essays, teaching resources, and more.

Affective Health and Masculinities in South Africa Hans Reihling, 2020-04-03 *Affective Health and Masculinities in South Africa* explores how different masculinities modulate substance use, interpersonal violence, suicidality, and AIDS as well as recovery cross-culturally. With a focus on three male protagonists living in very distinct urban areas of Cape Town, this comparative ethnography shows that men’s struggles to become invulnerable increase vulnerability. Through an analysis of masculinities as social assemblages, the study shows how affective health problems are tied to modern individualism rather than African ‘tradition’ that has become a cliché in Eurocentric gender studies. Affective health is conceptualized as a balancing act between autonomy and connectivity that after colonialism and apartheid has become compromised through the imperative of self-reliance. This book provides a rare perspective on young men’s vulnerability in everyday life that may affect the reader and spark

discussion about how masculinities in relationships shape physical and psychological health. Moreover, it shows how men change in the face of distress in ways that may look different than global health and gender-transformative approaches envision. Thick descriptions of actual events over the life course make the study accessible to both graduate and undergraduate students in the social sciences. Contributing to current debates on mental health and masculinity, this volume will be of interest to scholars from various disciplines including anthropology, gender studies, African studies, psychology, and global health.
