Commonwealth Caribbean Sports Law Jason Haynes, J.

Tyrone Marcus, 2019-01-15 Sports Law has quickly developed into an accepted area of academic study and practice in the legal profession globally. In Europe and North America, Sports Law has been very much a part of the legal landscape for about four decades, while in more recent times, it has blossomed in other geographic regions, including the Commonwealth Caribbean. This book recognizes the rapid evolution of Sports Law and seeks to embrace its relevance to the region. This book offers guidance, instruction and legal perspectives to students, athletes, those responsible for the administration of sport, the adjudication of sports-related disputes and the representation of athletes in the Caribbean. It addresses numerous important themes from a doctrinal, socio-legal and comparative perspective, including sports governance,

sports contracts, intellectual property rights and doping in sport, among other thought-provoking issues which touch and concern sport in the Commonwealth Caribbean. As part of the well-established Routledge Commonwealth Caribbean Law Series, this book adds to the Caribbean-centric jurisprudence that has been a welcome development across the region. With this new book, the authors assimilate the applicable case law and legislation into one location in order to facilitate an easier consumption of the legal scholarship in this increasingly important area of law.

Gambling Act 2005 Great Britain, 2005-04-25 These notes relate to the Gambling Act 2005 (chapter 19, ISBN 0105419052) which has 18 parts with 18 schedules and contains provisions for comprehensive reform of Britain's gambling laws, with a new regulatory system to govern the provision of all gambling in Britain, other than the National Lottery and spread betting. Measures include: the creation of a single national regulator, the Gambling Commission, and a new licensing regime to cover the full spectrum of commercial gambling activities; the creation of a Gambling Appeals Tribunal to hear appeals against Commission decisions; new licensing measures to cover remote technologies for the first time, such as the internet and mobile phones; new measures covering casinos, gaming machines and bingo; and measures to prevent gambling being used for criminal activities and to protect children and other vulnerable persons being exploited. This Act follows on from the report by the Independent Gambling Review Body (Cm 5206, ISBN 010152062X) published in July 2001 and the Government's White Paper (Cm 5397, ISBN 010153972X) published in March 2002.

The Oxford Handbook of Entertainment Theory Peter Vorderer, Christoph Klimmt, 2021 This chapter offers some historical and conceptual orientation to readers of the Oxford Handbook of Entertainment Theory. Departing from a brief review of ancient roots and 20th century pioneer works, we elaborate on the state and challenges of contemporary entertainment theory and research. This includes the need to develop a more explicit understanding of interrelationships among similar terms and concepts (e.g., presence and transportation), the need to reflect more explicitly on epistemological foundations of entertainment theories (e.g., neo-behaviorism), and the need to reach back to past, even historical reasoning in communication that may be just as informative as the consideration of recent theoretical innovations from neighboring fields such as social psychology. Finally, we offer some reflections on programmatic perspectives for future entertainment theory, which should try to harmonize views from the social sciences and critical thinking, span cultural differences in entertainment processes, and keep track of the rapid technological progress of entertainment media--

Consumer Research Morris B. Holbrook, 1995-06-09

Once again, Morris B. Holbrook has combined insightful commentary on the field of consumer behavior with a readable and enjoyable writing style. A must read for anyone interested in the latest thinking in the field. Ron Hill, Professor and Chair of Marketing, Villanova University

A delightfully idiosyncratic history of consumer research. What enthralled readers will get from his stylish exposition is a socio-psychocultural description of the consumer through the ages, along with a description of attempts to understand the consumer. Scholarly yet readable, Holbrook's history is a classic study of consumerism too. Editor's Choice. --Business Today

In recent years, consumer research has emerged as an academic specialty of growing concern to marketing scholars and of increased importance on today's university campuses. Courses on consumer behavior--taught in virtually every academic program of business or management--draw heavily on work by consumer researchers. Despite this wide and growing recognition as an emergent area of study, no book appears to exist on the history, nature, and types of consumer research or on the variegated and often hotly debated issues that surround this field of inquiry. *Consumer Research* fills this gap by providing an account of the recent historical developments in consumer research and by showing how the evolution of this discipline has affected the research. The author offers a personal and subjective glance at how various changes in the field have come about and how they have shaped studies of consumption. Marketing scholars, graduate students, and upper-level undergraduates concentrating in marketing will find *Consumer Research* irresistible reading.

Creating Second Lives Astrid Ensslin, Eben Muse, 2011-05-09 This book aims to provide insights into how ‘second lives’ in the sense of virtual identities and communities are constructed textually, semiotically and discursively, specifically in the online environment *Second Life* and Massively Multiplayer Online Games such as *World of Warcraft*. The book’s philosophy is multi-disciplinary and its goal is to explore the question of how we as gamers and residents of virtual worlds construct alternative online realities in a variety of ways. Of particular significance to this endeavour are conceptions of the body in cyberspace and of spatiality, which manifests itself in ‘natural’ and built environments as well as the triad of space, place and landscape. The contributors’ disciplinary backgrounds include media, communication, cultural and literary studies, and they examine issues of reception and production, identity, community, gender, spatiality, natural and built environments using a plethora of methodological approaches ranging from theoretical and

philosophical contemplation through social semiotics to corpus-based discourse analysis.
