How to Win at Casino Gambling Roger Gros,2000 An illustrated guide to a variety of casino gambling games.

All In Jonathan D Cohen,David G. Schwartz,2018-03-30 Gambling, the risky enterprise of chance, is one of America's favorite pastimes. Office March Madness brackets, a day at the race track, a friendly wager, the random ridiculous Super Bowl prop bet, bingo night, or the latest media frenzy over the Powerball jackpot—all emphasize the ubiquity of this major economic force and cultural phenomenon. Approximately 70 percent of Americans regularly engage in some form of betting, amounting to over \$140 billion in combined casino and lottery revenue every year. A hundred years ago, however, legal gambling was a rarity in the United States. A fresh take on the history of modern American gambling, All In provides a closer look at the shifting economic, cultural, religious, and political conditions that facilitated gambling's expansion and prominence in American consumerism and popular culture. In its pages, a diverse range of essays covering commercial and Native American casinos, sports betting, lotteries, bingo, and more piece together a picture of how gambling became so widespread over the course of the twentieth century. Drawing from a range of academic disciplines, this collection explores five aspects of American gambling history: crime, advertising, politics, religion, and identity. In doing so, All In illuminates the on-the-ground debates over gambling's expansion, the failed attempts to thwart legalized betting, and the consequences of its present ubiquity in the United States.

Gaming Guide - Gambling in Europe Nicolae Sfetcu,2016-11-09 Since the emergence of the internet in the 1990s, an increasing number of gambling services have come available on-line or through other new remote communications technologies. The rapid technological advancements, commercial initiatives, and market penetration of such commerce have made this sector of the gambling services industries extremely dynamic and potentially transformative in the years ahead. Demand for gambling services in the early 21 century and for the past half-century in the European Union – as well as in most other parts of the world – has been and is expanding rapidly, for a number of reasons. The commercial and government owned gaming industries of the European Union are organized under a wide variety of ownership regimes and market structures. Ownership and market structures are affected by numerous factors, including Member State laws and regulations; restrictions on product types, characteristics, points of sale, availability, and marketing effort; economies of scale; network effects; and impacts of new technologies. The overall gambling market in Europe is growing, both land-based and online. Lotteries and gambling machines remain the biggest sectors in the overall gambling market. While not all EU Member States have a legal definition of the concepts of “games of chance” and of “gambling”, in most jurisdictions a game of chance is defined as a game that offers an opportunity to compete for prizes, where success depends completely or predominantly on coincidence or an unknown future result and cannot be influenced by the player. At least one of the players loses his or her stake. The first important element characterising a game of

chance is that of stake money or monetary value. The second essential characteristic of a game of chance is the element of chance. Success or loss must depend completely or predominantly on coincidence and not on abilities and knowledge. Success is considered to depend in any case on coincidence, if the relevant aspect is the occurrence of an uncertain event. The section Gambling in Europe includes several independent adaptations of the corresponding European Commission works, free to use and freely available via the EU website with © European Union, and translation of the European Commission works with © Nico9lae Sfetcu, the author of this book. Most of the work are published by the European Union during 2004 - 2008, so it is possible to be outdated.
