Work-life Integration in Africa Okechukwu E. Amah,Marvel Ogah,2021-07-12 This book examines how individuals and organizations in Africa have found ways to integrate work and life roles effectively. It reflects on the notions that while many cultures have embraced women's participation in the workplace, African culture has been more resistant to change thereby forcing companies and employees to invent their own solutions. This presents its own set of challenges, for example African organizations are generally not up to speed with the family-friendly policies that are required in the modern workplace; the effectiveness of such policies is questionable and there is an increasing realization that work-family policies are not the only way to achieve work-life integration and others may be considered, such

as workplace mentoring and introducing incentives. With this in mind the authors consider multiple approaches to balancing work and life responsibilities with emphasis on three perspectives, namely organizational, individual and family and cultural. The book highlights and examines the joint responsibility that organizations, leaders and individuals have in achieving work life integration. Secondly the book considers why work-life integration initiatives fail and identifies the sources and remedies for these failures. Each chapter discusses the role of the identified dimensions necessary for collective achievement of work-life integration, while the final chapter sets out further research avenues and a conceptual framework that brings together the findings of the book.

Mark Young, 2012-12-06 **Implementing Management Innovations: Lessons Learned from Activity Based Costing in the U.S. Automobile Industry** is the result of a long-term study of the implementation of activity based costing (ABC) inside two of America's largest automobile companies. The research advances our theoretical and practical understanding of the implementation of management innovations by tracing the evolution of ABC from the corporate level down to its eventual rollout at the plants. Another distinguishing feature of the study is the blend of field research methods and hypothesis testing to determine the factors that led to implementation success for managers and ABC development teams. Many of the findings of the study have implications for the implementation of other types of management innovations.

Auravana Project Plan Auravana, 2022-07-12 This publication is the Project Plan for a community-type society. A societal-level project plan describes the organized thinking and execution of a socio-technical environment; the societal structuring of community. This project plan identifies humanity's project to create a global community-type society for the fulfillment of that which everyone has mutually in common. This is a planned project for a configuration of society that may be tested in its results at optimally meeting all human life requirements at the global scale. This is a planning and work proposal for an open-source, societal-level project. This document describes and explains a unified approach to actions and results that is likely, given what is known and accessible, to improve all of humanity. This is the plan for societal navigation that specifies an approach, direction, and execution to socio-technical life. The project plan has three core sections: (1) Approach to project execution, (2) Direction of project execution, and (3) Execution of project execution. The standard details the complete, plannable information set for the society's operation, including its approach to action, its direction of action, and its execution and adaptation of action. Herein, these concepts, their relationships and understandings, are defined and modeled. Discursive reasoning is provided for this specific configuration of a project plan, as opposed to the selection and encoding of other configurations. A project plan provides for the formalized project-based development operation of a society, organized in time and with available resources, coordinated to become a societal service system for human fulfillment and ecological well-being.
