Color Harmonies Augusto Garau, 1993-05 Because theories of visual perception have traditionally concentrated on form, artists have generally dealt with the problem of color through their own observation and intuition. In *Color Harmonies*, Augusto Garau systematically investigates the role of both color and form in visual perception and presents an original theory of the aesthetic relations among colors. Garau, a painter who teaches the psychology of form, pays particular attention to the way colors behave when organized in patterns. His theory of color combination addresses two principal compositional elements: the relations between figure and ground and the phenomenon of transparency. Garau meticulously analyzes the use of color in paintings by masters such as Cézanne, Picasso, and Matisse to show how his theory applies to actual works of art. Containing many full-color examples, his introduction to the workings of color relations is of great practical use to art historians and critics, artists, interior decorators, fashion and set designers, and anyone who works with color to display information or convey emotions. In an area of the psychology of art where reliable guidance is still so hard to come by, [Garau's] well-supported contributions to the theory of color composition ought to be welcomed by practitioners and scholars alike.—from the Foreword by Rudolf Arnheim

Color Victoria Finlay, 2007-12-18 In this vivid and captivating journey through the colors of an artist's palette, Victoria Finlay takes us on an enthralling adventure around the world and through the ages, illuminating how the colors we choose to value have determined the history of culture itself. How did the most precious color blue travel all the way from remote lapis mines in Afghanistan to Michelangelo's brush? What is the connection between brown paint and ancient Egyptian mummies? Why did Robin Hood wear Lincoln green? In *Color*, Finlay explores the physical materials that color our world, such as precious minerals and insect blood, as well as the social and political meanings that color has carried through time. Roman emperors used to wear togas dyed with a purple color that was made from an odorous Lebanese shellfish—which probably meant their scent preceded them. In the eighteenth century, black dye

was called logwood and grew along the Spanish Main. Some of the first indigo plantations were started in America, amazingly enough, by a seventeen-year-old girl named Eliza. And the popular van Gogh painting *White Roses* at Washington's National Gallery had to be renamed after a researcher discovered that the flowers were originally done in a pink paint that had faded nearly a century ago. Color is full of extraordinary people, events, and anecdotes—painted all the more dazzling by Finlay's engaging style. Embark upon a thrilling adventure with this intrepid journalist as she travels on a donkey along ancient silk trade routes; with the Phoenicians sailing the Mediterranean in search of a special purple shell that garners wealth, sustenance, and prestige; with modern Chilean farmers breeding and bleeding insects for their viscous red blood. The colors that craft our world have never looked so bright.
