Always Use Protection Dan Appleman, 2008-06-27 \* Appleman is a well-known, bestselling author of computing titles; has a great writing style and has valuable input/review on content from a teen focus group of technology users. \* Contains the fundamentals that every teen should know: emphasizes protection of computers from viruses, and privacy issues (including identity theft), not just the usual online security that is hyped by the media. Emphasizes topics of interest to teens – for example: security on instant messaging and configuring firewalls for online gaming. \* Unlike other security books written for parents, this book is written to empower teens to protect themselves and their computers. It requires no effort on the part of parents beyond buying the book and handing it to their teens. \* Offers practical, well-researched much needed advice on how to protect teens and create a more secure home computing environment. (The author's survey showed over 50% of teens have had a computer virus. A recent Newsweek article describes how Oberlin college found viruses on 90% of the Windows machines of incoming freshmen).

The Five Civilized Tribes Grant Foreman, 2013-04-17 Side by side with the westward drift of white Americans in the 1830's was the forced migration of the Five Civilized Tribes from Mississippi, Alabama, Georgia, and Florida. Both groups were deployed against the tribes of the prairies, both breaking the soil of the undeveloped hinterland. Both were striving in the years before the Civil War to found schools, churches, and towns, as well as to preserve orderly development through government and laws. In this book Grant Foreman brings to light the singular effect the westward movement of Indians had in the cultivation and settlement of the Trans-Mississippi region. It shows the Indian genius at its best and conveys the importance of the Cherokees, Chickasaws, Choctaws, Creeks, and Seminoles to the nascent culture of the plains. Their achievements between 1830 and 1860 were of vast importance in the making of America.

The Five Civilized Tribes ,1989 Examines the problems of the Indian tribes in trying to maintain a self-derived culture, while adapting to the alien influences of the white man's society during the nineteenth century

*Death at Buzzards Point* Russ Moore, 2019-04-30 It is the 1960s as drugs and gambling transform what was once a quiet cattle town into a shooting gallery. Theo is a seasoned hitman who has become used to lying in silent wait for his next victim. After he murders his latest target and disposes of his body in the Everglades, two young law enforcement officers and a crusty retired sheriff begin investigating. After Sheriff Charlie, a living legend in South Florida, partners with his less experienced counterparts, detectives Dale Norris and Clem Winke, they begin to unravel the motive for the murders of some of the town's leading citizens. While their investigations take them from the small town of Davie into the dark hole of organized crime plaguing South Florida, Theo falls in love and quietly plans his next murder. Will the sheriff and his counterparts be able to find the killer before he strikes again? In this murder mystery, three South Florida law enforcement professionals must partner together to find and stop a determined hit man before he takes out more innocent victims.

*Methods of Protein Separation* Nicholas Catsimpoilas, 2013-06-29 This open-end treatise on methods concerning protein separation had its beginning in an American Chemical Society symposium entitled Con temporary Protein Separation Methods which was held in Atlantic City, New Jersey in September 1974. The purpose of the symposium-and subsequently of the present work-was to review the available modern techniques and underlying principles for achieving one of the very important tasks of experimental biology, namely the separation and characterization of proteins present in complex biological mixtures. Physicochemical characterization was covered only as related to the parent method of fractionation and therefore involved mostly mass transport processes. Additionally, the presentation of methods for gaining insight into complex interacting protein profiles was considered of paramount importance in the interpretation of separation patterns. Finally, specific categories of proteins (e. g. , chemically modified, deriving from a specific tissue, conjugated to different moieties, etc. ) require meticulous trial and selection and/or modification of existing methodology to carry out the desired separation. In such cases, the gained experience provides valuable guidelines for further experimentation. Although powerful techniques exist today for the separation and related physicochemical characterization of proteins, many biological fractionation problems require further innovations. It is hoped that the description in the present treatise of some of the available separation tools and their limitations will provide the necessary integrated background for new developments in this area.
