Environmental Chemistry Peter O'Neill, 2017-10-19 A complete introduction to environmental chemistry, this book provides insight into the operation of the chemical processes near the Earth's surface. The four-part format groups together related environmental topics and introduces theoretical concepts. Part One brings together many essential basic geological, geochemical, and chemical ideas, and emphasizes the importance of oxygen to the chemistry of reactions near the Earth's surface. Parts Two and Three discuss systems depending on these reaction types, and Part Four examines the effects of human activities on elements that usually cycle naturally in small quantities. Also in this part, the perturbation of natural cycles by agricultural, industrial, and social developments is highlighted in terms of the consequent problems of environmental management.

Secession and the Union in Texas Walter L. Buenger, 2013-11-18 This history of secession in the Lone Star State offers both a vivid narrative and a powerful case study of the broader secession movement. In 1845, Texans voted overwhelmingly to join the Union. Then, in 1861, they voted just as overwhelmingly to secede. The story of why and how that happened is filled with colorful characters, raiding Comanches, German opponents of slavery, and a border

with Mexico. It also has important implications for our understanding of secession across the South. Combining social and political history, Walter L. Buenger explores issues such as public hysteria, the pressure for consensus, and the vanishing of a political process in which rational debate about secession could take place. Drawing on manuscript collections and contemporary newspapers, Buenger also analyzes election returns, population shifts, and the breakdown of populations within Texas counties. Buenger demonstrates that Texans were not simply ardent secessionists or committed unionists. At the end of 1860, the majority fell between these two extremes, creating an atmosphere of ambivalence toward secession which was not erased even by the war.
