From ETC. - An Amazing Conversation Between the Descendant of Slave Owner and Slave - A Chance at Healing and Reconciliation Christopher Desloge,Theresa Delsoin,2011 The book contains the correspondence between Christopher Desloge, whose ancestors in early Missouri had been slaveholders, and Theresa Delsoin, whose ancestor Malindy Wilson was a slave in Franklin County Missouri. Delsoin and her sister, Mildred Johnson, coauthored the 2005 book Malindy's freedom about their ancestor. The etc. of the title refers to the use of that word in wills at the end of property lists that included slaves along with other household items. The year-long correspondence lasted from Oct. 2009-Sept. 2010.

Semiconductor Lasers Junji Ohtsubo,2017-05-03 This book describes the fascinating recent advances made concerning the chaos, stability and instability of semiconductor lasers, and discusses their applications and future prospects in detail. It emphasizes the dynamics in semiconductor lasers by optical and electronic feedback, optical injection, and injection current modulation. Applications of semiconductor laser chaos, control and noise, and semiconductor lasers are also demonstrated. Semiconductor lasers with new structures, such as vertical-cavity surface-emitting lasers and broad-area semiconductor lasers, are intriguing and promising devices. Current topics include fast physical number generation using chaotic semiconductor lasers for secure communication, development of chaos, quantum-dot semiconductor lasers and quantum-cascade semiconductor lasers, and vertical-cavity surface-emitting lasers. This fourth edition has been significantly expanded to reflect the latest developments. The fundamental theory of laser chaos and the chaotic dynamics in semiconductor lasers are discussed, but also for example the method of self-mixing interferometry in quantum-cascade lasers, which is indispensable in practical applications. Further, this edition covers chaos synchronization between two lasers and the application to secure optical communications. Another new topic is the consistency and synchronization property of many coupled semiconductor lasers in connection with the analogy of the dynamics between synaptic neurons and chaotic semiconductor lasers, which are compatible nonlinear dynamic elements. In particular, zero-lag synchronization between distant neurons plays a crucial role for information processing in the brain. Lastly, the book presents an application of the consistency and synchronization property in chaotic semiconductor lasers, namely a type of neuro-inspired information processing referred to as reservoir computing.
