**Simple Food for the Good Life** Helen Nearing, 1999 Fifty years before the phrase simple living became fashionable, Helen and Scott Nearing were living their celebrated Good Life on homesteads first in Vermont, then in Maine. All the way to their ninth decades, the Nearings grew their own food, built their own buildings, and fought an eloquent combat against the silliness of America's infatuation with consumer goods and refined foods. They also wrote or co-wrote more than thirty books, many of which are now being brought back into print by the Good Life Center and Chelsea Green. Simple Food for the Good Life is a jovial collection of quips, quotes, and one-of-a-kind recipes meant

to amuse and intrigue all of those who find themselves in the kitchen, willingly or otherwise. Recipes such as Horse Chow, Scott's Emulsion, Crusty Carrot Croakers, Raw Beet Borscht, Creamy Blueberry Soup, and Super Salad for a Crowd should improve the mood as well as whet the appetite of any guest. Here is an antidote for the whole foods enthusiast who is fed up with the anxieties and drudgeries of preparing fancy meals with stylish, expensive, hard-to-find ingredients. This celebration of salads, leftovers, raw foods, and homegrown fruits and vegetables takes the straightest imaginable route from their stem or vine to your table. The funniest, crankiest, most ambivalent cookbook you'll ever read, said Food & Wine magazine. This is more than a mere cookbook, said Health Science magazine: It belongs to the category of classics, destined to be remembered through the ages. Among Helen Nearing's numerous books is Chelsea Green's *Loving and Leaving the Good Life*, a memoir of her fifty-year marriage to Scott Nearing and the story of Scott's deliberate death at the age of one hundred. Helen and Scott Nearing's final homestead in Harborside, Maine, has been established in perpetuity as an educational program under the name of The Good Life Center.

Iran Anthony H. Cordesman, Bryan Gold, Chloe Coughlin-Schulte, 2014-02-14 This report analyzes four key aspects of US and Iranian strategic competition--sanctions, energy, arms control, and regime change. Its primary focus is on the ways in which the sanctions applied to Iran have changed US and Iranian competition since the fall of 2011.

**Twitter and Society** Katrin Weller, 2013 Since its launch in 2006, Twitter has evolved from a niche service to a mass phenomenon; it has become instrumental for everyday communication as well as for political debates, crisis communication, marketing, and cultural participation. But the basic idea behind it has stayed the same: users may post short messages (tweets) of up to 140 characters and follow the updates

posted by other users. Drawing on the experience of leading international Twitter researchers from a variety of disciplines and contexts, this is the first book to document the various notions and concepts of Twitter communication, providing a detailed and comprehensive overview of current research into the uses of Twitter. It also presents methods for analyzing Twitter data and outlines their practical application in different research contexts.

Struggles for Hegemony in Italy's Crisis Management Daniela Caterina, 2018-09-25 This book investigates the struggles for hegemony, and a possible 'crisis of crisis management' at the core of Italy's political economy. With a specific focus on the conflict over the 2012 labour market reform, the book also explores the country's trajectory in the area of economic and social reproduction. It presents a framework for critical policy analysis that draws on cultural political economy and explores its potential synergies with complementary approaches such as historical materialist policy analysis and critical discourse analysis. Readers will gain an understanding of crisis dynamics in the aftermath of 2008, and insights into related political reactions. The book will also help them develop the analytical tools needed to make sense of these puzzling phenomena.

**Sustainable Development of Algal Biofuels in the United States** National Research Council, Division on Engineering and Physical Sciences, Board on Energy and Environmental Systems, Division on Earth and Life Studies, Board on Agriculture and Natural Resources, Committee on the Sustainable Development of Algal Biofuels, 2013-01-18 Biofuels made from algae are gaining attention as a domestic source of renewable fuel. However, with current technologies, scaling up production of algal biofuels to meet even 5 percent of U.S. transportation fuel needs could create unsustainable demands for energy, water, and nutrient resources. Continued research and development could yield innovations to address these challenges, but determining if algal biofuel is a viable fuel alternative will involve comparing the

environmental, economic and social impacts of algal biofuel production and use to those associated with petroleum-based fuels and other fuel sources. Sustainable Development of Algal Biofuels was produced at the request of the U.S. Department of Energy.

*Struck* Douglas Segal, 2018-09-28 One of life's biggest clichés becomes a horrific reality when Douglas Segal's wife and young daughter are hit head-on by a Los Angeles city bus. Miraculously, his daughter was unharmed, but his wife faced a series of life-threatening injuries, including the same one that famously left Christopher Reeve paralyzed. Following the accident, Segal began sending regular email updates to their circle of friends and family—a list that continued to grow as others heard of the event and were moved by the many emotional and spiritual issues it raised. Segal's compelling memoir is an intimate and honest chronicle built around these email updates, and is a profound example of how people show up for one another in times of crisis. Alternatingly harrowing, humorous, heartbreaking, and hopeful, this is an uplifting tribute to love, determination, and how the compassion of community holds the power to heal, serving as an inspiring testament to the resilience of the human spirit when faced with pain and adversity.

Geometry and Billiards Serge Tabachnikov, 2005 This book is devoted to billiards in their relation with differential geometry, classical mechanics, and geometrical optics. The book is based on an advanced undergraduate topics course (but contains more material than can be realistically taught in one semester). Although the minimum prerequisites include only the standard material usually covered in the first two years of college (the entire calculus sequence, linear algebra), readers should show some mathematical maturity and strongly rely on their mathematical common sense. As a reward, they will be taken to the forefront of current research.

**Law, Technology and Dispute Resolution** Riikka Koulu, 2018-09-24 The use of new information and communication technologies both inside the courts and in private online dispute resolution services is quickly changing everyday conflict management. However, the implications of the increasingly disruptive role of technology in dispute resolution remain largely undiscussed. In this book, assistant professor of law and digitalisation Riikka Koulu examines the multifaceted phenomenon of dispute resolution technology, focusing specifically on private enforcement, which modern technology enables on an unforeseen scale. The increase in private enforcement confounds legal structures and challenges the nation-state's monopoly on violence. And, in this respect, the author argues that the technology-driven privatisation of

enforcement - from direct enforcement of e-commerce platforms to self-executing smart contracts in the blockchain - brings the ethics of law's coercive nature out into the open. This development constitutes a new, and dangerous, grey area of conflict management, which calls for transparency and public debate on the ethical implications of dispute resolution technology.

The Bulb Hunter Chris Wiesinger, William C. Welch, 2013-09-27 Dubbed the Bulb Hunter in a 2006 New York Times feature story, Chris Wiesinger took his passion for bulbs to vacant lots, abandoned houses, cemeteries, and construction sites throughout the South in search of botanical survivors whose descendants had never seen the inside of a big-box chain store. The vintage specimens Wiesinger sought came from hardy, historic stock, adapted to human neglect and hot climates, reappearing faithfully over decades without care or cultivation. Traveling back roads, speaking to strangers, looking for the telltale color of a remnant iris or lily, Wiesinger started digging, then began trying to grow and share the bulbs he collected. From its humble beginnings on an East Texas sweet potato farm, his Southern Bulb Company has now grown into a full-fledged business known throughout the world, propagating and selling the rare, tough, heritage plants Wiesinger still seeks out and champions. Nicknamed "Flower" by his fellow cadets at Texas A&M University, Wiesinger relates his adventures in bulb hunting, telling stories of the bulbs he has discovered and weaving in his own life story as a student, plantsman, and small business owner. He then teams with veteran horticulturist William C. Welch to provide advice on how to grow and appreciate the bulbs that have been rescued and reintroduced. This "primer" gives gardeners information on what bulbs to grow where, when to plant them and when they bloom, and how to incorporate them with other plants in the landscape. Finally, Welch describes how bulbs have enhanced his personal gardens

and brought him and Wiesinger together in the common cause of heirloom gardening. Entertaining, informative, and loaded with beautiful photographs, *The Bulb Hunter* is sure to be a favorite of gardeners and plant lovers everywhere.

Iraq in the Twenty-First Century Tareq Y. Ismael, Jacqueline S. Ismael, 2015-02-20 Much has been written about the events surrounding the 2003 Anglo-American invasion of Iraq and its aftermath, especially about the intentions, principles, plans and course of action of US policy, but much less attention has been given to the consequences of US policy on Iraqi political and social development. This book provides an in-depth analysis of the impact of US policy on the social and political development of Iraq in the twenty-first century. It shows how not just the institutions of the state were destroyed in 2003, leaving the way open for sectarianism, but also the country's cultural integrity, political coherence, and national-oriented economy. It outlines how Iraq has been economically impoverished, assessing the appalling situation which ordinary people, including women and children, have endured, not just as a result of the 2003 war, but also as a consequence of the 1991 war and the sanctions imposed in the following years. The book argues that the social, political, and cultural ruin that accompanied the Iraq war was an absolute catastrophe; that the policies which had such adverse effects were the foreseeable consequences of deliberate policy choices; and that those responsible continue to evade being made accountable.
