Temporal GIS George Christakos, Patrick Bogaert, Marc Serre, 2012-12-06 The book focuses on the development of advanced functions for field-based temporal geographical information systems (TGIS). These fields describe natural, epidemiological, economical, and social phenomena distributed across space and time. The book is organized around four main themes: Concepts, mathematical tools, computer programs, and applications. Chapters I and II review the conceptual framework of the modern TGIS and introduce the fundamental ideas of spatiotemporal modelling. Chapter III discusses issues of knowledge synthesis and integration. Chapter IV presents state-of-the-art mathematical tools of spatiotemporal mapping. Links between existing TGIS techniques and the modern Bayesian maximum entropy (BME) method offer significant improvements in the advanced TGIS functions. Comparisons are made between the proposed functions and various other techniques (e.g., Kriging, and Kalman-Bucy filters). Chapter V analyzes the interpretive features of the advanced TGIS functions, establishing correspondence between the natural system and the formal mathematics which describe

it. In Chapters IV and V one can also find interesting extensions of TGIS functions (e.g., non-Bayesian connectives and Fisher information measures). Chapters VI and VII familiarize the reader with the TGIS toolbox and the associated library of comprehensive computer programs. Chapter VIII discusses important applications of TGIS in the context of scientific hypothesis testing, explanation, and decision making.

Interdisciplinary Public Health Reasoning and Epidemic Modelling: The Case of Black Death

George Christakos,Ricardo A. Olea,Marc L. Serre,Hwa-Lung Yu,Lin-Lin Wang,2006-09-24 This multidisciplinary reference takes the reader through all four major phases of interdisciplinary inquiry: adequate conceptualization, rigorous formulation, substantive interpretation, and innovative implementation. The text introduces a novel synthetic paradigm of public health reasoning and

epidemic modelling, and implements it with a study of the infamous 14th century AD Black Death disaster that killed at least one-fourth of the European population.

The Flying Prostitute Lawrence J. Hunter, 2000-03 The Flying Prostitute was one of many pseudonyms given the B-26 Martin Marauder bomber in WWII by those who flew them. This plane cremated so many crewmen that newscasters were afraid to write or talk about it for fear this might cause a morale problem with our men who were told to fly them. The author recites his cadet life at Randolph Field, San Antonio, Texas, THE WEST POINT OF THE AIR, where he became the top-ranking cadet officer. He then earned his wings at Ellington Field, Texas and, along with others of his class, was assigned to be an Instructor Pilot of this aircraft for seventeen months. So many men were being killed in horrible crashes that each wore their Air Force Wings as bracelets on their wrists so their bodies could be identified, "just in case." Combat in the skies over Europe followed, and so did the crashes. Pilots did not know the mammoth tail could, and had separated from this airplane while in flight. Pilots knew the propellers could runaway and cremate their entire crew in disastrous, fiery

crashes. Pilots did not know the manufacturers of parts of this airplane were falsifying reports and Congress knew it. They did know that they could be killed every time they took one up. This dramatic, true story is shocking in its detail and documentation. The refusal to write about this airplane remains an enigma for writers even to this day.

We Shall Return! William M. Leary,2021-11-21 They were the forgotten commanders of World War II. While the names of Bradley and Patton became household words for Americans, few could identify Krueger or Eichelberger. They served under General Douglas MacArthur, a military genius with an enormous ego who dominated publicity from the Southwest Pacific during the American advance from Australia, through New Guinea, to the Philippines. While people at home read about the great victories that were won by MacArthur's navy and MacArthur's air force, his subordinates labored in obscurity, fearful lest attention from the press lead to their replacement. Historians too have paid little attention to the men who fought so well in the far reaches of the Pacific, and not a single biography has appeared

in the decades since V-J Day. Yet General Blamey played a key role in the early battles of New Guinea. Generals Krueger and Eichelberger led American armies to major victories over the Japanese. General Kenney was one of the foremost air strategists of the war, while few airmen could match General Whitehead's tactical brilliance. Admiral Kinkaid took a crucial part in one of the greatest naval engagements in history. Admiral Barbey was an acknowledged master of amphibious warfare. We Shall Return! addresses a serious shortcoming in the literature of World War II. Revealed for the first time is the full extent of the contributions made by MacArthur's commanders to the defeat of the Japanese. As the authors of these essays so ably demonstrate, many of MacArthur's bold decisions and innovative tactics were urged upon him by his subordinates. Clearly, these men deserve more credit for his successes than they have received.

Uncertainty Analysis in Econometrics with Applications Van-Nam Huynh,Vladik

Kreinovich,Songsak Sriboonchitta,Komsan Suriya,2012-12-14 Unlike uncertain dynamical systems in physical sciences where models for prediction are somewhat given to us by physical laws, uncertain

dynamical systems in economics need statistical models. In this context, modeling and optimization surface as basic ingredients for fruitful applications. This volume concentrates on the current methodology of copulas and maximum entropy optimization. This volume contains main research presentations at the Sixth International Conference of the Thailand Econometrics Society held at the Faculty of Economics, Chiang Mai University, Thailand, during January 10-11, 2013. It consists of keynote addresses, theoretical and applied contributions. These contributions to Econometrics are somewhat centered around the theme of Copulas and Maximum Entropy Econometrics. The method of copulas is applied to a variety of economic problems where multivariate model building and correlation analysis are needed. As for the art of choosing copulas in practical problems, the principle of maximum entropy surfaces as a potential way to do so. The state-of-the-art of Maximum Entropy Econometrics is presented in the first keynote address, while the second keynote address focusses on testing stationarity in economic time series data.

Biological Aspects of Brain Tumors Kazuo Tabuchi, 2012-12-06 Growth activity of brain tumors,

metabolism of brain tumors, brain tumors and cytokines, drug resistance of brain tumors, oncogenes and anti-oncogenes, basic studies in brain tumor biology and therapy are presented in this book.

Advances in Information Retrieval Gabriella Pasi,Benjamin Piwowski,Leif Azzopardi,Allan Hanbury,2018-03-20 This book constitutes the refereed proceedings of the 40th European Conference on IR Research, ECIR 2018, held in Grenoble, France, in March 2018. The 39 full papers and 39 short papers presented together with 6 demos, 5 workshops and 3 tutorials, were carefully reviewed and selected from 303 submissions. Accepted papers cover the state of the art in information retrieval including topics such as: topic modeling, deep learning, evaluation, user behavior, document representation, recommendation systems, retrieval methods, learning and classification, and micro-blogs.

B-47 Stratojet Jan Tegler,2000 A portrayal of the B-47 Stratojet. It takes you along on test flights, gives you the controls of nuclear-armed B-47s, and walks you into hangars to meet the crews whose work made the B-47 fly and fly again. It contains illustrations, including revealing technical diagrams,

photographs and interviews with figures in aviation history.

Regulation of HIV-1 Postintegration Latency by NF-kappa-B. Samuel A. F. Williams,2005 In our initial study, we identified the phorbol ester prostratin as an inducer of latent HIV-1 gene expression in the J-Lat model of latency. We demonstrated a central role for the NF-kappaB family of transcription factors as mediators of prostratin antagonism of HIV, and for the first demonstrated recruitment of NF-kappaB RelA to the HIV-1 LTR in vivo. These studies prompted us to investigate in more detail the processes regulated by NF-kappaB that modulate expression of latent HIV-1.

Women on the Move Roger Gilles, 2018-10 The 1890s was the peak of the American bicycle craze, and consumers, including women, were buying bicycles in large numbers. Despite critics who tried to discourage women from trying this new sport, women took to the bike in huge numbers, and mastery of the bicycle became a metaphor for women's mastery over their lives. Spurred by the emergence of the safety bicycle and the ensuing cultural craze, women's professional bicycle racing thrived in the United States from 1895 to 1902. For seven years, female racers drew large and enthusiastic crowds across the country, including Cleveland, Detroit, Indianapolis, Chicago, Minneapolis, St. Louis, Kansas City, and New Orleans--and many smaller cities in between. Unlike the trudging, round-the-clock marathons the men (and their spectators) endured, women's six-day races were tightly scheduled, fast-paced, and highly competitive. The best female racers of the era--Tillie Anderson, Lizzie Glaw, and Dottie Farnsworth--became household names and were America's first great women athletes. Despite concerted efforts by the League of American Wheelmen to marginalize the sport and by reporters and other critics to belittle and objectify the women, these athletes forced

turn-of-the-century America to rethink strongly held convictions about female frailty and competitive spirit. By 1900 many cities began to ban the men's six-day races, and it became more difficult to ensure competitive women's races and attract large enough crowds. In 1902 two racers died, and the sport's seven-year run was finished--and it has been almost entirely ignored in sports history, women's history, and even bicycling history. *Women on the Move* tells the full story of America's most popular arena sport during the 1890s, giving these pioneering athletes the place they deserve in history.
