Introductory Grammar of Amharic Wolf Leslau,2000 This book closes the gap for beginners who want to study the Amharic language and had difficulties in finding the right grammar for this purpose: The first grammar of Amharic, the national language of Ethiopia, was published by Hiob Ludolf in 1698. The Amharic grammar published by Praetorius in 1879 is based on Amharic religious texts and on scattered material, usually composed by missionaries. A milestone in the study of Amharic is Marcel Cohen's *Traite de langue amharique* (1936), but this grammar, too is not completely suited for beginners since the author's generalizations are at times aimed at linguists. The grammar that comes closest to the concept of a beginner's grammar is that of C.H. Dawkin (1960), yet this grammar is extremely short, does not give examples and does not introduce the student to the intricacies of the language. The new book gives all the grammatical forms and the sentences of the present grammar in Amharic script and in phonetic transcription. The illustrative examples have a free and a literal translation. This procedure should likewise prove to be useful for the Semitist as well as for the general linguist.

What Is Worship Music? Paul S. Jones,2010 Too much of the debate surrounding different worship styles center on personal music preferences. Paul Jones, respected author on church musicianship and worship, takes one step further back and asks the question 'What is the music for?'. Looking at biblical and historical sources, he builds a structure to help us all understand where we should be directing our energies and attention - and how to increase the value of our worshipful singing.

Sensation and Measurement H.R. Moskowitz,B. Scharf,J.C. Stevens,2012-12-06 We planned this book as a Festschrift for Smitty Stevens because we thought he might be retiring around 1974, although we knew very well that only death or deep illness would stop Smitty from doing science. Death came suddenly, unexpectedly - after a full day of skiing at Vail, Colorado on the annual trip with wife Didi to the Winter Conference on Brain Research. Smitty liked winter conferences near ski resorts and often tried to get us other psychophysicists to organize one. Every person is unique. Smitty would have said it's mainly because each of us has so many genes that two combinations just alike would be well-nigh impossible. But most of us strive in many ways to be like others, and to abide by the norms (some smaller number try even harder to be unlike other people); as a result many persons seem to lose their uniqueness, their individuality. Not Smitty. He tried neither to be like others nor to be different. He took himself as he found himself, and ascribed peculiarities, strengths, and weaknesses to his pioneering Utah forebears, in whom he took much pride. His was the true and right nonconformity. He approached each task, each problem, ready to grapple with the facts and set them into meaningful order. And if the answer he came up with was different from everyone else's, well that was too bad.
