<u>Future U.S. Workforce for Geospatial Intelligence</u> National Research Council,Policy and Global Affairs,Board on Higher Education and Workforce,Division on Earth and Life Studies,Board on Earth Sciences and Resources,Committee on the Future U.S. Workforce for Geospatial Intelligence,2013-04-28 We live in a changing world with multiple and evolving threats to national security, including terrorism, asymmetrical warfare (conflicts between agents with different military powers or tactics), and social unrest. Visually depicting and assessing these threats using imagery and other geographically-referenced information is the mission of the National Geospatial-Intelligence Agency (NGA). As the nature of the threat evolves, so do the tools, knowledge, and skills needed to respond. The challenge for NGA is to maintain a workforce that can deal with evolving threats to national security, ongoing scientific and technological advances, and changing skills and expectations of workers. Future U.S. Workforce for Geospatial Intelligence assesses the supply of expertise in 10 geospatial intelligence (GEOINT) fields, including 5 traditional areas (geodesy and geophysics, photogrammetry, remote sensing, cartographic science, and geographic information systems and geospatial analysis) and 5 emerging areas that could improve geospatial intelligence (GEOINT fusion, crowdsourcing, human geography, visual analytics, and forecasting). The report also identifies gaps in expertise relative to NGA's needs and suggests ways to ensure an adequate supply of geospatial intelligence expertise over the next 20 years.

Learning to Think Spatially National Research Council,Division on Earth and Life Studies,Board on Earth Sciences and Resources,Geographical Sciences Committee,Committee on Support for Thinking Spatially: The Incorporation of Geographic Information Science Across the K-12 Curriculum,2005-02-03 Learning to Think Spatially examines how spatial thinking might be incorporated into existing standards-based instruction across the school curriculum. Spatial thinking must be recognized as a fundamental part of Kâ€12 education and as an integrator and a facilitator for problem solving across the curriculum. With advances in computing technologies and the increasing availability of geospatial data, spatial thinking will play a significant role in the information-based economy of the twenty-first century. Using appropriately designed support systems tailored to the Kâ€12 context, spatial thinking can be taught formally to all students. A geographic information system (GIS) offers one example of a high-technology support system that can enable students and teachers to practice and apply spatial thinking in many areas of the curriculum.

Realizing the Full Potential of Social Safety Nets in Africa Kathleen Beegle,Aline Coudouel,Emma Monsalve,2018-07-02 Poverty remains a pervasive and complex phenomenon in Sub-Saharan Africa. Part of the agenda in recent years to tackle poverty in Africa has been the launching of social safety nets programs. All countries have now deployed safety net interventions as part of their core development programs. The number of programs has skyrocketed since the mid-2000s though many programs remain limited in size. This shift in social policy reflects the progressive evolution in the understanding of the role that social safety nets can play in the fight against poverty and vulnerability, and more generally in the human capital and growth agenda. Evidence on their impacts on equity, resilience, and opportunity is growing, and makes a foundational case for investments in safety nets as a major component of national development plans. For this potential to be realized, however, safety net programs need to be significantly scaled-up. Such scaling up will involve a series of technical considerations to identify the parameters, tools, and processes that can deliver maximum benefits to the poor and vulnerable. However, in addition to technical considerations, and at least as importantly, this report argues that a series of decisive shifts need to occur in three other critical spheres: political, institutional, and fiscal. First, the political processes that shape the extent and nature of social policy need to be recognized, by stimulating political appetite for safety nets, choosing politically smart parameters, and harnessing the political impacts of safety nets to promote their sustainability. Second, the anchoring of safety net programs in institutional arrangements †" related to the overarching policy framework for safety nets, the functions of policy and coordination, as well as program management and implementation †" is particularly important as programs expand and are increasingly implemented through national channels. And third, in most countries, the level and predictability of resources devoted to the sector needs to increase for safety nets to reach the desired scale, through increased efficiency, increased volumes and new sources of financing, and greater ability to effectively respond to shocks. This report highlights the implications which political, institutional, and fiscal aspects have for the choice and design of programs. Fundamentally, it argues that these considerations are critical to ensure the successful scaling-up of social safety nets in Africa, and that ignoring them could lead to technically-sound, but practically impossible, choices and designs.

Interpersonal Communication Book Joseph A. DeVito,2013-07-27 Updated in its 13th edition, Joseph Devito's The Interpersonal Communication Book provides a highly interactive presentation of the theory, research, and skills of interpersonal communication with integrated discussions of diversity, ethics, workplace issues, face-to-face and computer-mediated communication and a new focus on the concept of choice in communication. This thirteenth edition presents a comprehensive view of the theory and research in interpersonal communication and, at the same time, guides readers to improve a wide range of interpersonal skills. The text emphasizes how to choose among those skills and make effective communication choices in a variety of personal, social, and workplace relationships

Transactions on Engineering Technologies Haeng Kon Kim,Mahyar A. Amouzegar,Sio-long Ao,2015-07-07 This volume contains thirty-nine revised and extended research articles, written by prominent researchers participating in the World Congress on Engineering and Computer Science 2014, held in San Francisco, October 22-24 2014. Topics covered include engineering mathematics, electrical engineering, circuit design, communications systems, computer science, chemical engineering, systems engineering and applications of engineering science in industry. This book describes some significant advances in engineering technologies and also serves as an excellent source of reference for researchers and graduate students.

Advances in Communication and Computational Technology Gurdeep Singh Hura,Ashutosh Kumar Singh,Lau Siong Hoe,2020-08-13 This book presents high-quality peer-reviewed papers from the International Conference on Advanced Communication and Computational Technology (ICACCT) 2019 held at the National Institute of Technology, Kurukshetra, India. The contents are broadly divided into four parts: (i) Advanced Computing, (ii) Communication and Networking, (iii) VLSI and Embedded Systems, and (iv) Optimization Techniques.The major focus is on emerging computing technologies and their applications in the domain of communication and networking. The book will prove useful for engineers and researchers working on physical, data link and transport

layers of communication protocols. Also, this will be useful for industry professionals interested in manufacturing of communication devices, modems, routers etc. with enhanced computational and data handling capacities.

Longitudinal Field Research Methods George P. Huber,Andrew van de Ven,1995-08-10 Eleven papers, some of which have appeared previously as contributions to the journal Organizational Science , emphasize a range of methodological issues involved in longitudinal field research, including ethnographic methods, longitudinal and comparative case studies, event history analysis, and real-time tracking of events, as well as procedural.

Esri Map Book Environmental Systems Research Institute (Redlands, Calif.),ESRI,2013 The Esri Map Book, Volume 28, shows how GIS enables change and provides innovative, spatially based solutions to wide-ranging issues, including those affecting business, the environment, utilities, transportation, and government. The full-color maps in this edition clearly show how GIS users around the globe contribute ever increasing amounts of data and other resources to help achieve sustainable development and a more hopeful future. Dozens of maps from distinct industries spread across many countries, regions, and cities are featured. Each map includes a description of the map's purpose and how it was produced. The Esri Map Book, Volume 28, is an important collection of maps for GIS users, cartographers, collectors, and map libraries.

Stabilization: Lessons from the U. S. Experience in Afghanistan Department of Department of Defense,Special Inspector Special Inspector for Afghanistan Reconstruction,2019-07-26 This lessons learned report draws important lessons from the U.S. experience with stabilization in Afghanistan from 2002-2017, with a special focus on the years after 2009 when most of the $4.7 billion in stabilization funds was spent. With the rise of the Islamic State and its affiliates, making poorly governed spaces inhospitable to transnational terrorist groups remains a vital U.S. national security priority. We anticipate U.S. government efforts to stabilize these areas by clearing them of terrorist groups and helping generate sufficient governance to keep them from returning will continue in fragile and conflict-affected states around the world. With U.S. stabilization efforts nascent in Syria and ramping up in Iraq, it is important that lessons from stabilizing Afghanistan inform these efforts.The term stabilization is frequently invoked in U.S. foreign policy circles and by other donor nations, yet it is not uniformly, precisely defined across relevant stakeholders. Definitions have varied by U.S. agency and even changed over time within agencies. In 2018, the U.S. government defined stabilization as:A political endeavor involving an integrated civilian-military process to create conditions where locally legitimate authorities and systems can peaceably manage conflict and prevent a resurgence of violence. Transitional in nature, stabilization may include efforts to establish civil security, provide access to dispute resolution, and deliver targeted basic services, and establish a foundation for the return of displaced people and longer-term development.However, the concept of stabilization and notions about how it was to be implemented in Afghanistan took shape gradually and only coalesced as an explicit U.S. strategy in 2009.

Tourism Innovation in Spain and Portugal João Leitão,Vanessa Ratten,Vitor Braga,2021-09-29 Tourism is one of the sectors that have undergone substantial change for several decades and in particular due to the restrictions and change in national and international policies since the beginning of the COVID-19 pandemic. This book focuses on how tourism has been innovative, especially in light of these changes, by providing new and novel ways of introducing change into the marketplace. The book focuses on Spain and Portugal, thereby offering an interesting perspective as to how the Iberian Peninsula has adapted based on the new market conditions. This book is the first to focus specifically on these countries and offers an economic geography perspective on tourism innovation. This will provide useful and practical information about how a region has hurt but also thrived in times of global turmoil.

Towards Semantically Enabled Complex Event Processing Robin Keskisärkkä,2017-10-30 The Semantic Web provides a framework for semantically annotating data on the web, and the Resource Description Framework (RDF) supports the integration of structured data represented in heterogeneous formats. Traditionally, the Semantic Web has focused primarily on more or less static data, but information on the web today is becoming increasingly dynamic. RDF Stream Processing (RSP) systems address this issue by adding support for streaming data and continuous query processing. To some extent, RSP systems can be used to perform complex event processing (CEP), where meaningful high-level events are generated based on low-level events from multiple sources; however, there are several challenges with respect to using RSP in this context. Event models designed to represent static event information lack several features required for CEP, and are typically not well suited for stream reasoning. The dynamic nature of streaming data also greatly complicates the development and validation of RSP queries. Therefore, reusing queries that have been prepared ahead of time is important to be able to support real-time decision-making. Additionally, there are limitations in existing RSP implementations in terms of both scalability and expressiveness, where some features required in CEP are not supported by any of the current systems. The goal of this thesis work has been to address some of these challenges and the main contributions of the thesis are: (1) an event model ontology targeted at supporting CEP; (2) a model for representing parameterized RSP queries as reusable templates; and (3) an architecture that allows RSP systems to be integrated for use in CEP. The proposed event model tackles issues specifically related to event modeling in CEP that have not been sufficiently covered by other event models, includes support for event encapsulation and event payloads, and can easily be extended to fit specific use-cases. The model for representing RSP query templates was designed as an extension to SPIN, a vocabulary that supports modeling of SPARQL queries as RDF. The extended model supports the current version of the RSP Query Language (RSP-QL) developed by the RDF Stream Processing Community Group, along with some of the most popular RSP query languages. Finally, the proposed architecture views RSP queries as individual event processing agents in a more general CEP framework. Additional event processing components can be integrated to provide support for operations that are not supported in RSP, or to provide more efficient processing for specific tasks. We demonstrate the architecture in implementations for scenarios related to traffic-incident monitoring, criminal-activity monitoring, and electronic healthcare monitoring.

Photojojo Amit Gupta,Kelly Jensen,2011-07-27 A photo, an idea, and simple crafting skills are all you need to transform your pictures into useful, fun, giftable art. With clear DIY instructions, Photojojo! by Amit Gupta and Kelly Jensen shows you how to turn your forgotten photos into ingenious photo projects. Do you have lots of pics of friends and family you want to show off? Make a sleek, stylish photo display rail so you can change them up at a moment's notice. Need something to play with? Make photo slider puzzles, Rubik's cubes, and temporary tattoos. Or spruce up your pad with a photo chandelier or a giant wall mural you can print at home! All the projects use basic materials and are easy enough to whip up in an afternoon.
