The Oxford Handbook of Social Justice in Music Education Cathy Benedict,Patrick Schmidt,Gary Spruce,Paul Woodford,2015-10-30 Music education has historically had a tense relationship with social justice. On the one hand, educators concerned with music practices have long preoccupied themselves with ideas of open participation and the potentially transformative capacity that musical interaction fosters. On the other hand, they have often done so while promoting and privileging a particular set of musical practices, traditions, and forms of musical knowledge, which has in turn alienated and even excluded many children from music education opportunities. The Oxford Handbook of Social Justice in Music Education provides a comprehensive overview and scholarly analyses of the major themes and issues relating to social justice in musical and educational practice worldwide. The first section of the handbook conceptualizes social justice while framing its pursuit within broader contexts and concerns. Authors in the succeeding sections of the handbook fill out what social justice entails for music teaching and learning in the home, school, university, and wider community as they grapple with cycles of injustice that might be perpetuated by music pedagogy. The concluding section of the handbook offers specific practical examples of social justice in action through a variety of educational and social projects and pedagogical practices that will inspire and guide those wishing to confront and attempt to ameliorate musical or other inequity and injustice. Consisting of 42 chapters by authors from across the globe, the handbook will be of interest to anyone who wishes to better understand what social justice is and why its pursuit in and through music education matters.

Performing Arts in Transition Susanne Foellmer,Maria Katharina Schmidt,Cornelia Schmitz,2018-12-07 Artists especially from dance and performance art as well as opera are involved to an increasing degree in the transfer between different media, not only in their productions but also the events, materials, and documents that surround them. At the same time, the focus on that which remains has become central to any discussion of performance. *Performing Arts in Transition* explores what takes place in the moments of transition from one medium to another, and from the live performance to that which survives it. Case studies from a broad range of interdisciplinary scholars address phenomena such as: The dynamics of transfer between the performing and visual arts. The philosophy and terminologies of transitioning between media. Narratives and counternarratives in historical re-creations. The status of chronology and the document in art scholarship. This is an essential contribution to a vibrant, multidisciplinary and international field of research emerging at the intersections of performance, visual arts, and media studies.
