**Deploying Visual FoxPro Solutions** Rick Schummer, Rick Borup, Jacci Adams, 2004 Ship it! Music to your ears or words that cause a cold sweat as you realize you now need to deploy the solution you have worked on for so long? Have you planned the deployment? Do you have the proper language in your contract with your customer? Do you have the proper install package? What media is the package going to be shipped on to the client? How will it be distributed? What happens after Setup.exe finishes? Do you have the support infrastructure in place? How are you going to handle updates and changes? There's a lot to think about, and deploying a solution requires careful planning. These questions and many more are answered based on real world experience within the pages of this book.

**Professional Rootkits** Ric Vieler, 2007-05-23 Whether you want to learn how to develop a robust, full-featured rootkit or you're looking for effective ways to prevent one from being installed on your network, this hands-on resource provides you with the tools you'll need. Expert developer Ric Vieler walks you through all of the capabilities of rootkits, the technology they use, steps for developing and testing them, and the detection methods to impede their distribution. This book provides the detailed, step-by-step instructions and examples required to produce full-featured, robust rootkits. Presented in modular sections, source code from each chapter can be used separately or together to produce highly specific functionality. In addition, Vieler details the loading, configuration, and control techniques used to deploy rootkits. All ancillary software is fully detailed with supporting source code and links to the compilers, utilities, and scripts necessary to build and run every example provided. What you will learn from this book Complete coverage of all major rootkit technologies: kernel hooks, process injection, I/O filtering, I/O control, memory management, process synchronization, TDI communication, network filtering, email filtering, key logging, process hiding, device driver hiding, registry key hiding, directory hiding and more Complete coverage of the compilers, kits, utilities, and tools required to develop robust rootkits Techniques for protecting your system by detecting a rootkit before it's installed Ways to create modular, commercial grade software Who this book is for This book is for anyone who is involved in software development or computer security. Wrox Professional guides are planned and written by working programmers to meet the real-world needs of programmers, developers, and IT professionals. Focused and relevant, they address the issues technology professionals face every day. They provide examples, practical solutions, and expert education in new technologies, all designed to help programmers do a better job.

**DIR 8.5 STUDIO**, ROBBINS, 2001-08-20 There are things that Flash does badly or not at all—namely, sound and 3D. These two also happen to be the hottest areas for web development, as more and more segments of the entertainment industry realise that for sound and 3D, and a heavyweight project, Director is the tool of choice. Director has long been established as the premier multimedia authoring tool. Version 8 brought closer web focus. But Director 8.0 did not include Flash asset management, nor was it capable of working in 3D. With the upgrade to 8.5, Director has become an important Flash-compatible 3D development tool. This integration of two of Macromedia's most exciting graphics tools, as well as the inclusion of a sophisticated 3D modelling environment, mean that Director 8.5 is not a half-version so much as a rapid response to a burgeoning and demanding market. Following the multi-author single-voice Studio format, this book brings together experts in the many different facets of Director lore and technique, programming and modelling. What you'll learn Who this book is for Multimedia designers interested in working with the net and/or multimedia computer graphics Flash 5 users who need to deepen and perfect their Director skills, required for working with 3D and more sophisticated interactivity than they can achieve with Flash

**Ghost Criminology** Michael Fiddler, Theo Kindynis, Travis Linnemann, 2022-01-18 Bringing together prominent early contributions from this emergent perspective, the volume traces the origins, theory and methodology of a nascent ghost criminology. From the powers of exorcism and erasure marshaled by state agents, street-level struggles over memorialization and memory, to the lingering violence of crime scenes and the ghostly traces of outlaw artists, *Ghost Criminology* is a book attuned to that which is well-theorized in other disciplines—the spectral, hauntological, apparitional. Each of the writers assembled here shares, as Mark Fisher (2017) put it, a fascination for the outside, that which lies beyond standard perception, cognition and experience. As such, this collection uses cutting-edge social and cultural theory to tangle with some of criminology's most stubborn revenants—the politics of criminalization, the commodification of crime and violence, the haunting power of the image, as well as the unheard and disregarded cries of the dead--

**Xu Bing** Sarah E. Fraser, Yu-Chieh Li, 2020-07-20 This volume offers a path-breaking reassessment of Xu Bing's oeuvre by analyzing the diverse cultural environments in which his work has developed since the *Book from the Sky*. It contains three lecture transcripts and eight art historical essays; these explore themes such as Xu's animal works, audience participation, new ink, prints, realism, socialist spectacle, and word play. A critical question addressed in this volume is what carries art to a global level beyond regional histories and cultural symbols. Absorbing critical essays on contemporary Chinese aesthetics addressing the social context and philosophical concerns that underlie Xu Bing's key works. The authors analyze Xu's art, shedding light on the tangled history of socialism and neoliberalism in the Post-Mao period. --Prof. Dr. Lothar Ledderose, Senior Professor, Institute of East Asian Art, Universität Heidelberg

*Give Up the Ghost* Juliet Blackwell, 2015-12-01 From the New York Times bestselling author of *Keeper of the Castle*, San Francisco contractor and ghost whisperer Mel Turner must solve a murder mystery at a haunted mansion in the Pacific Heights... San Francisco millionaire Andrew Flynt wants to

sell his Victorian mansion, but ghostly music, the squeaking of a long-disappeared weathervane, and an angry ghost keep running off potential buyers. After a famous psychic is called in, she informs the Flynts that their multi-million-dollar renovations to “update” the home have left its resident ghost extremely agitated. So contractor Mel Turner is engaged to track down and replace some of the original features of the house. But when the beautiful psychic is found stabbed, it appears someone had a very human motive for murder. Now Mel must use her ghost whispering gift to uncover the secrets of the haunted house on the hill, and her sleuthing skills to catch a killer.

**Jason Molina** Erin Osmon, 2017-05-15 Erin Osmon presents a detailed, human account of the Rust Belt-born musician Jason Molina—a visionary, prolific, and at times cantankerous singer-songwriter with an autodidactic style that captivated his devoted fans. The songwriting giant behind the bands Songs: Ohia and Magnolia Electric Co. had a knack for spinning tales, from the many personal myths he cultivated throughout his life to the poems and ballads he penned and performed. As with too many great musicians, Molina’s complicated relationship with the truth, combined with a secretive relationship with the bottle, ultimately claimed his life. Jason Molina: Riding with the Ghost details Molina’s personal trials and triumphs and reveals for the first time the true story of Molina’s last months and works, including an unpublished album unknown to many of his fans. Offering unfettered access to the mind and artistry of Molina through exclusive interviews with family, friends, and collaborators, the book also explores the Midwest music underground and the development of Bloomington, Indiana-based label Secretly Canadian. As the first authorized and detailed account of this prolific songwriter and self-mythologizer, Jason Molina provides readers with unparalleled insight into Molina’s tormented life and the fascinating Midwest musical underground that birthed him. It’s a story for the ages that speaks volumes to the triumphs and trials of the artistic spirit while exploring the meaningful music that Molina’s creative genius left behind.

Art, Cybernetics and Pedagogy in Post-War Britain Kate Sloan, 2019-02-14 This is the first full-length study about the British artist Roy Ascott, one of the first cybernetic artists, with a career spanning seven decades to date. The book focuses on his early career, exploring the evolution of his early interests in communication in the context of the rich overlaps between art, science and engineering in Britain during the 1950s and 1960s. The first part of the book looks at Ascott’s training and early work. The second part looks solely at Groundcourse, Ascott’s extraordinary pedagogical model for visual arts and cybernetics which used an integrative and systems-based model, drawing in behaviourism, analogue machines, performance and games. Using hitherto unpublished photographs and documents, this book will establish a more prominent place for cybernetics in post-war British art.

The Productive Programmer Neal Ford, 2008-07-03 Anyone who develops software for a living needs a proven way to produce it better, faster, and cheaper. The Productive Programmer offers critical timesaving and productivity tools that you can adopt right away, no matter what platform you use. Master developer Neal Ford not only offers advice on the mechanics of productivity—how to work smarter, spurn interruptions, get the most out of your computer, and avoid repetition—he also details valuable practices that will help you elude common traps, improve your code, and become more valuable to your team.

You'll learn to: Write the test before you write the code Manage the lifecycle of your objects fastidiously Build only what you need now, not what you might need later Apply ancient philosophies to software development Question authority, rather than blindly adhere to standards Make hard things easier and impossible things possible through meta-programming Be sure all code within a method is at the same level of abstraction Pick the right editor and assemble the best tools for the job This isn't theory, but the fruits of Ford's real-world experience as an Application Architect at the global IT consultancy ThoughtWorks. Whether you're a beginner or a pro with years of experience, you'll improve your work and your career with the simple and straightforward principles in The Productive Programmer.

**A Modern History of China's Art Market** Kejia Wu, 2023-05-08 This is the first English-language account of the modern history of China's art market that explains the radical transformations from the end of the Cultural Revolution, when a market for art and artifacts did not exist, to today. The book is divided into three sections: Part I examines how the art market in China was suspended during the Cultural Revolution, restarted, grew, and expanded into its current scale. Part II analyzes the distinctive value system of the Chinese art market where the state-run art system including academies, artist associations and museums co-exist with an independent market-oriented system; and traverses the most significant policies that drive decision-making and market structure. Part III explores the driving force of art creation by telling the stories of five contemporary artists across three generations. Arts and culture professionals, scholars, and students interested in Chinese art, global art markets, Chinese government policy, and China will find this to be a valuable resource.

Breaking Glass Städelshule Architecture Class, 2021-05-01 Within a relatively short time, Augmented and Virtual Reality have emerged centre stage in architecture and the arts as novel means for exploring how their creative output is produced, mediated and experienced. Feeding the continuous spectrum between the fully real and the fully virtual, the underlying technology of these media present machine-generated sensorial input where to date the image-based dominate. With these inputs, corporeal existence see virtual experiences thrown on the scale with real ones as the concepts and models for how we understand perceptual dynamics are shifting. While teasing the disciplines with creative opportunities, the use of the media presents a staggering number of acute questions, not the least with respect to corporeal experience, the human-machine interface and what constitutes the real. Augmented and Virtual Reality invite to re-examine established ways of thinking and making within architecture and the arts and open onto an uncharted territory of what comprises architectural and artistic experience. With *Breaking Glass: Spatial Fabulations & Other Tales of Representation in Virtual Reality*, select topics central to Augmented and Virtual Reality in architecture and the arts are addressed. It is published in conjunction with the conference *Breaking Glass III: Virtual Space*, the third and last in a series hosted by the Städelshule. The publication includes texts by, among others, Martine Beugnet, Michael Young, Curtis Roth and Lara Lesmes and Fredrik Hellberg as well as conversations that Daniel Birnbaum respectively had with Sanford Kwinter and Sven-Olov Wallenstein. In addition, a series of visual portfolios by architects and artists presents works. Finally, the publication features the award winning projects of Städelshule Architecture

Class' AIV Master Thesis Prize 2019. The issue has been edited by Yara Feghali and the editorial team of the Städelschule Architecture Class. It has been made possible with the generous support of the Aventis Foundation and the Dr. Marschner Foundation.

**The Holocaust's Ghost** F. C. DeCoste, Bernard Schwartz, 2000-05 Numerous scholars explore the moral, aesthetic, and political outcomes of the Holocaust from the perspectives of various academic backgrounds, including: art, literature, political science, education and history.

**A Sense of Urgency** Debra Hawhee, 2023-06-30 Unchecked climate change affects nearly everything on Earth, including the way humans communicate. In *A Sense of Urgency*, Debra Hawhee focuses our attention on new communication strategies that are emerging around the global climate crisis. At the heart of the story Hawhee tells are the challenges that our ecological future poses to rhetoric, and how those challenges demand that we learn to privilege more than our pasts and ourselves. The challenges of imagining futures under dramatically different climate conditions, of communicating climate science, and of offsetting human privilege all expose the limits of rhetoric as conceived by ancient Greek and Roman thinkers. The most glaring limit is the prominence those thinkers granted to precedent. When it comes to the climate crisis, precedent is not up to the task of addressing the problem at hand. Climate activists, scientists, artists, and scholars are trying to overcome this limitation, and *A Sense of Urgency* examines four departures from rhetoric's playbook that can be helpful in this struggle. Each of these departures presents new resources and different means of intensification in response to situations with few to no precedents. For Hawhee, thinking with these departures, and the attendant rhetorical strategies, can help people fathom both what is happening and what will happen if action is not taken. In this way, *A Sense of Urgency* is an indispensable guide in our search for new imaginative pathways--

*The Handbook of Fashion Studies* Sandy Black, Amy de la Haye, Joanne Entwistle, Regina Root, Agnès Rocamora, Helen Thomas, 2014-01-02 The *Handbook of Fashion Studies* identifies an innovative spectrum of thematic approaches, key strands and interdisciplinary concepts that continue to push forward the boundaries of fashion studies. The book is divided into seven sections: Fashion, Identity and Difference; Spaces of Fashion; Fashion and Materiality; Fashion, Agency and Policy; Science, Technology and New fashion; Fashion and Time and, Sustainable Fashion in a Globalised world. Each section consists of approximately four essays authored by established researchers in the field from the UK, USA, Netherlands, Sweden, Canada and Australia. The essays are written by international subject specialists who each engage with their section's theme in the light of their own discipline and provide clear case-studies to further knowledge on fashion. This consistency provides clarity and permits comparative analysis. The handbook will be essential reading for students of fashion as well as professionals in the industry.

**Alt-Form** Viola Ago, 2022-04-04 In a world that is missing a central theoretical voice in architecture, now more than ever it is time to solicit emergent voices on the topic of 'alternative formalisms' (Alt-Form). This issue of AD aims to reach peripheral disciplines in order to support an architecture that no longer operates as a standalone field of study, and is rather one that responds to broader, urgent and pluralistic cultural shifts. In the existing contemporary landscape of visually oriented fields of study,

casual compositions and other formless expressions have begun to re-emerge, particularly in the disciplines of art, architecture and popular image culture. In architecture, with the rise of the digital, the last two decades have witnessed a field in pursuit of novel styles through the use of the latest digital tools. More recently, however, over the last five years or so, the field has experienced a more novelty-apatetic attitude, permeated with project proposals that resist the urge to offer immediate solutions in favour of enmeshment with a contemporary condition characterised by duress, destruction, uncertainty and other formless becomings. This AD explores this new, emerging world. Contributors: Suzanne Cotter, Andrew Culp, Jack Halberstam, Jeff Halstead, Carolyn Kane, Ersela Kripa and Stephen Mueller, Carl Lostritto, Thom Mayne, V Mitch McEwen and Kristina Kay Robinson, Anna Neimark, Jennifer Newsom and Tom Carruthers, Dorina Pllumbi, Faysal Tabbara, and Dalena Tran. Featured architects: AGENCY, Architecture and Other Things, Atelier Office, Dream the Combine, First Office, MIRACLES, and Morphosis.

**Studio** John McDonald, 2007 'Studio' presents an extraordinary anthology of visual and verbal insights into the way paintings are made, and the complex blend of motivation and inspiration that sustains the painter in his or her solitary search for meaning.
