The Process of Question Answering WENDY G. LEHNERT,2022-09-16 First published in 1978, this title examines a phenomenon that relies on many realms of human cognition: language comprehension, memory retrieval, and language generation. Problems in computational question answering assume a new perspective when question answering is viewed as a problem in natural language processing.

Graph Colourings Roy Nelson,Robin J. Wilson,1990 Nine papers on graph colourings, presented by speakers at a one-day meeting at the Open University in December 1988. The topics presented have been chosen to cover as wide a field as possible within the area of graph colourings. Each paper contains a certain amount of survey material to put the results of the paper into perspective, as well as a discussion of new results. It is not the aim of this book to present a succession of highly technical research papers which would be better in a specialized journal.

Child Discourse Susan Ervin-Tripp,2014-05-19 Child Discourse contains papers presented in a symposium on child discourse at the annual meeting of the American Anthropological Association in Mexico City in November 1974. Three other papers, one presented by Edelsky at the same meeting, and two by Dore and Garvey, are also included to broaden the scope of methods and issues considered. Organized into three parts, this book generally aims at describing and analyzing social and linguistic knowledge of a child in utilizing language to project socially appropriate identities and to engage in purposive social acts. Part I focuses on children's speech events, while Part II centers more on function and act. The last part takes into consideration the social aspect of language usage among children.

Children's Talk Catherine Garvey,1984 How do children make talk work? Adults usually regard talk as a simple means of conveying information. Garvey explains the importance of talk to children's socialization and development and shows why talk is an integral and revealing part of the child's life that reflects important changes in thinking and social interaction.

Language in Cognitive Development Katherine Nelson,1998-03-13 This book discusses the role of language as a cognitive and communicative tool in a child's early development.

Handbook of Argumentation Theory Frans H. van Eemeren,Rob Grootendorst,Tjark Kruiger,2019-11-05 No detailed description available for Handbook of Argumentation Theory.

Argumentation and Education Nathalie Muller Mirza,Anne-Nelly Perret-Clermont,2009-06-19 During the last decade, argumentation has attracted growing attention as a means to elicit processes (linguistic, logical, dialogical, psychological, etc.) that can sustain or provoke reasoning and learning. Constituting an important dimension of daily life and of professional activities, argumentation plays a special role in democracies and is at the heart of philosophical reasoning and scientific inquiry. Argumentation, as such, requires specific intellectual and social skills. Hence, argumentation will have an increasing importance in education, both because it is a critical competence that has to be learned, and because argumentation can be used to foster learning in philosophy, history, sciences and in many other domains. Argumentation and Education answers these and other questions by providing both theoretical backgrounds, in psychology, education and theory of argumentation, and concrete examples of experiments and results in school contexts in a range of domains. It reports on existing innovative practices in education settings at various levels.

Sonic Persuasion Greg Goodale,2011-04-01 Sonic Persuasion: Reading Sound in the Recorded Age critically analyzes a range of sounds on vocal and musical recordings, on the radio, in film, and in cartoons to show how sounds are used to persuade in subtle ways. Greg Goodale explains how and to what effect sounds can be read like an aural text, demonstrating this method by examining important audio cues such as dialect, pausing, and accent in presidential recordings at the turn of the twentieth century. Goodale also shows how clocks, locomotives, and machinery are utilized in film and literature to represent frustration and anxiety about modernity, and how race and other forms of identity came to be represented by sound during the interwar period. In highlighting common sounds of industry and war in popular media, Sonic Persuasion also demonstrates how programming producers and governmental agencies employed sound to evoke a sense of fear in listeners. Goodale provides important links to other senses, especially the visual, to give fuller meaning to interpretations of identity, culture, and history in sound.

Philosophy Rhetoric and Argumentation Maurice Natanson,1972

Explaining and Arguing Charles Antaki,1994-08-04 Explanations identify causes, back up claims and justify actions. Social scientists study them because they reveal how people understand and construct their worlds. This stimulating book offers a critical review of the major approaches to the study of everyday explaining and arguing. Using concrete examples to illuminate the range of contemporary approaches, Antaki's concern is to test theory against practice. He draws a picture of explanation as a richly social achievement of speaker and audience, involving a balance between delicate manoeuvre and the exercise of discursive power.
