**The Fingerprint** U. S. Department Justice, 2014-08-02 The idea of The Fingerprint Sourcebook originated during a meeting in April 2002. Individuals representing the fingerprint, academic, and scientific communities met in Chicago, Illinois, for a day and a half to discuss the state of fingerprint identification with a view toward the challenges raised by Daubert issues. The meeting was a joint project between the International Association for Identification (IAI) and West Virginia University (WVU). One

recommendation that came out of that meeting was a suggestion to create a sourcebook for friction ridge examiners, that is, a single source of researched information regarding the subject. This sourcebook would provide educational, training, and research information for the international scientific community.

**How to Learn a Foreign Language: A Practical Guide with Tips and Resources** Jeff Blum, 2021-09-25 Learning a language can be a daunting process. Should you self-study? Take a course? Buy a software program? Hire a private tutor? What kinds of learning systems are available and which might be right for you? How about the myriad online resources available? And, very importantly, where should you begin? Oh, by the way, how long will all this effort take anyway? You will find the answers to these questions in this short but thorough guide to learning a foreign language. Author Jeff Blum has taught English and studied four languages (Japanese, Spanish, Portuguese and Thai), but he still struggles just as anyone must when learning a language. Jeff did extensive research on all aspects of language learning in an effort to improve his own efforts and he has carefully curated that research into this guide to help you with your efforts as well. In the book you will find: 1. A look at the systems and techniques advocated by various language learning

experts and sites. 2. A consideration of personal factors in learning a language (motivation, personality, goals, etc.). 3. A discussion of the 8 language learning blocks with recommended resources for tackling each. 4. An overview of the most popular language learning products on the market (Duolingo, Rosetta Stone, Pimsleur, etc.). 5. A comprehensive set of resources to aid you with whatever approach to study you pursue. Whether you are young or old, beginner or advanced, studying your first foreign language or your fifth, there is something for you in this book. If you are a language teacher, this book might help you better understand what your students are up against while giving you ideas and extra resources to aid your teaching efforts.

Beta Test Eric Griffith, 2011-12 PUBLISHERS WEEKLY: An unusually lighthearted apocalyptic tale. Sam Terra is having a bad week. He lost Molly, the woman he secretly loves, when she vanished before his eyes at the exact same time that ten percent of the inhabitants of Earth disappeared. Naturally upset, Sam follows clues about the global vanishing with questionable help from his friends including a misanthropic co-worker and a childhood pal. When Molly reappears in the body of a man during a night of monster-laden devastation, Sam finally learns the truth. Not just about her, but about the planet Earth and the entire cosmos surrounding it. What we consider mundane reality, others consider a game . . . and not a very good one. The whole thing is about to be shut down.

*Community Crime Prevention* Dennis P.

Rosenbaum,1986 Do citizen and police initiatives have any impact on the incidence and fear of crime? This volume brings together studies, undertaken by well-respected criminal justice scholars, of some community crime prevention programmes that were introduced in several major US cities. The volume is unique in its breadth of focus: its contributors address a broad and varied audience, including practitioners, policy-makers and scholars interested in community crime prevention and evaluation research. They present detailed descriptions of the intervention, the evaluation of the intervention and the issues surrounding both. Other topics discussed include the process of encouraging and organizing citizen involvement, the setting of programme goals and useful forms of assessment. Community Crime Prevention promises to stimulate much further discussion, research and policy analysis.
