Border Management Modernization Gerard

McLinden, Enrique Fanta, David Widdowson, Tom Doyle, 2010-11-30 Border clearance processes by customs and other agencies are among the most important and problematic links in the global supply chain. Delays and costs at the border undermine a country's competitiveness, either by taxing imported inputs with deadweight inefficiencies or by adding costs and reducing the competitiveness of exports. This book provides a practical guide to assist policy makers, administrators, and border management professionals with information and advice on how to improve border management systems, procedures, and institutions.

Leveraging Computer-Mediated Marketing

Environments Bowen, Gordon, Ozuem, Wilson, 2019-01-25 Social media has redefined the way marketers communicate with their customers, giving consumers an advantage that they did not have previously. However, recent issues in online communication platforms have increased the challenges faced by marketers in developing and retaining their customers. Practitioners need to develop effective marketing communication programs that incorporate the meaningful forms of sociality into a customer-driven marketing program.

Leveraging Computer-Mediated Marketing

Environments discusses the nature of heightened interaction between marketers and consumers in the evolving technological environments, particularly on the central nature of online communities and

other emerging technologies on dialogic engagement. Additionally, it aims to examine the relevant roles of online communities and emerging technologies in creating and retaining customers through effective dialogue management. Highlighting brand strategy, e-services, and web analytics, it is designed for marketers, brand managers, business managers, academicians, and students.

The Neglected Dimension of Global Security

National Academy of Medicine, Secretariat, Commission on a Global Health Risk Framework for the Future, 2016-06-16 Since the 2014 Ebola outbreak many public- and private-sector leaders have seen a need for improved management of global public health emergencies. The effects of the Ebola epidemic go well beyond the three hardest-hit countries and beyond the health sector. Education, child protection, commerce, transportation, and human rights have all suffered. The consequences and lethality of Ebola have increased interest in coordinated global response to infectious threats, many of which could disrupt global health and commerce far more than the recent outbreak. In order to explore the potential for improving international management and response to outbreaks the National Academy of Medicine agreed to manage an international, independent, evidence-based, authoritative, multistakeholder expert commission. As part of this effort, the Institute of Medicine convened four workshops in summer of 2015. This commission report considers the evidence supplied by these workshops and offers conclusions and actionable

recommendations to guide policy makers, international funders, civil society organizations, and the private sector.

Globalisation and Migration Ronaldo

Munck,2013-09-13 This book critically examines the new issues and new politics regarding migration in the era of globalisation from a majority world perspective. It examines the current shifts in the global political economy and the effects it has, for example, in relation to rural displacement. When and how does this lead to national and/or transnational migration? We need to examine the ways in which migration is cut across and impacts on the generation of racism and xenophobia in the west. The issue of remittances by migrants to the 'developing' nations needs careful study as does the controversial issue of 'brain drain' versus 'brain gain' through migration. The growing importance of trafficking for forced labour has now been taken up by various international bodies but is it the new normality or simply an unfortunate side effect of globalisation to be overcome through legislation? Migration is becoming increasingly gendered in its composition and flows but also in the receiving countries where men and women do very different jobs. We can predict the increasing racialization and gendering of migration but how will the state and society respond to these shifts? This book was published as a special issue of Third World Quarterly.

Global Innovation Index 2021, 14th Edition World Intellectual Property Organization,2021-09-20 The Global Innovation Index 2021 takes the pulse of the most recent global innovation trends and ranks

the innovation ecosystem performance of 132 economies, while highlighting innovation strengths and weaknesses and particular gaps in innovation metrics. In its new Global Innovation Tracker section, the report draws on a select set of indicators, including the effects on research and development expenditures or access to innovation finance, to provide a perspective on the impact of COVID-19 on global innovation performance.

Impacts of Climate Change and Economic and Health Crises on the Agriculture and Food Sectors

Martinho, Vítor João Pereira Domingues, 2022-02-18

The agricultural and food sectors, as well as other economic activities, follow the current trends verified in economies and societies on the technological level. Agriculture and the food sector are decisive in times of crisis to mitigate the consequences of unemployment generated by adverse cycles. A developed agriculture is fundamental to the sustainable economic development of any country, as it allows the supply of goods to satisfy basic needs at lower prices. Impacts of Climate Change and Economic and Health Crises on the Agriculture and Food Sectors provides a forum for discussing contemporary trends in the agricultural and food sectors. The themes presented in this publication make it possible to approximate the various and current dimensions related to food production. Covering topics such as food security, labor drivers, and sustainable development, this book is an excellent resource for farmers, SME owners, students and professors of higher education, researchers, public institutions, policymakers, and

academicians.

International Business and Sustainable Development Goals Rob van Tulder, Elisa

Giuliani, Isabel Álvarez, 2023-07-31 The Sustainable Development Goals (SDGs) represent the leading governance frame with which the international community tries to address complex interconnected global issues. The SDGs can be considered the only relevant agenda for progress in the years to come.

Global Marx , 2022-10-10 Global Marx is a collective research on Marx's account of capital's domination through his critique of disciplinary languages, investigation of political structures and analysis of specific political spaces within the world market.

The Oxford Handbook of the Brazilian Economy

Edmund Amann, Carlos Azzoni, Werner Baer, 2018-08-01 Brazil is a globally vital but troubled economy. This volume offers comprehensive insight into Brazil's economic development, focusing on its most salient characteristics and analyzing its structural features across various dimensions. This innovative Oxford Handbook provides an understanding of the economy's evolution over time and highlights the implications of the past trajectory and decisions for current challenges and opportunities. The opening section covers the country's economic history, beginning with the colonial economy, through import-substitution, to the era of neoliberalism. Second, it analyses Brazil's broader place in the global economy, and considers the ways in which this role has changed, and is likely to change, over coming years. Particular attention is given to the productive

sectors of Brazil's economy, for example manufacturing, agriculture, services, energy, and infrastructure. In addition to discussions of regional differences within Brazil, socio-economic dimensions are examined. These include income distribution, human capital, environmental issues, and health. Also included is a discussion of Brazil in the world economy, such as the increase in South-South cooperation and trade as well as foreign direct investment. Last but not least is a discussion of the role of the Brazilian state in the economy, whether through state enterprises, competition policy, or corruption.

Global Criminology K. Jaishankar, Natti

Ronel, 2013-03-25 Global criminology is an emerging field covering international and transnational crimes that have not traditionally been the focus of mainstream criminology or criminal justice. Global Criminology: Crime and Victimization in a Globalized Era is a collection of rigorously peer-reviewed papers presented at the First International Conference of the South Asian Society of Criminology and Victimology (SASCV) that took place in Jaipur, India in 2011. Using a global yardstick as the basis for measurement, the fundamental goal of the conference was to determine criminological similarities and differences in different regions. Four dominant themes emerged at the conference: Terrorism. In a topic that operates at the intersection of international law, international politics, crime, and victimization, some questions remain unanswered. Is terrorism a crime issue or a national defense issue? Should terrorists be

treated as war criminals, soldiers, or civil criminals? How can international efforts and local efforts work together to defeat terrorism? Cyber Crimes and Victimization. Cyber space provides anonymity, immediate availability, and global access. Cyber offenders easily abuse these open routes. As cyber space develops, cyber-crime develops and grows. To achieve better cyber security, global criminologists must explore cyber-crimes from a variety of perspectives, including law, the motivation of offenders, and the impact on victims. Marginality and Social Exclusion. Globalization is manifest in the fast transition of people between places, societies, social classes, and cultures. Known social constructions are destroyed for new ones, and marginalized people are excluded from important material, social, and human resources. This section examines how we can provide inclusion for marginalized individuals in the global era and protect them from victimization. Theoretical and Practical Models of Criminal Victimization. The process of globalization, as mentioned above, creates new elements of victimization. But globalization can also become an opportunity for confronting and defeating victimization through improved sharing of knowledge and increased understanding of the humanity of the weak. The emerging global criminology comprises diversity of attitudes, explanations, and perspectives. The editors of this volume recognize that in the global village, there is room for solid contributions to the field of criminology and criminal justice. This collection is a move in

this direction. It is hoped that these articles will help to expand the boundaries of criminology, criminal justice, and victimology with a view towards reducing crime worldwide.

Knowledge for Development ,1998 World Development Report 1998-1999, now in its twenty-first edition, focuses on the role of knowledge and information as a factor of development, including the important trade-offs in strategies and policies and many other challenges. It examines such important questions as why have some developing countries been able to exploit the rapidly increasing stock of global knowledge more than others and what can be done to help those falling behind? The Report also looks at the challenge of finding the balance between private initiative and public intervention that encourages innovation and manages attendant risks. It deals with the role of international assistance and international organizations, which can help develop understanding about these complex processes, help to transfer lessons of development experience across countries, and help finance crucial knowledge investments of importance to developing countries. Known as the standard reference for international economic data, the World Development Report 1998-1999 provides a set of Selected World Development Indicators as an appendix, presenting social and economic statistics for more than 200 countries.

Building Broadband Yongsoo Kim,Tim Kelly,Siddhartha Raja,2010-06-22 Access to broadband connectivity is a country s passport to

the global information society and knowledge economy the future. However, the adoption and use of broadband technology today remains extremely uneven and threatens to create a new digital divide. At the end of 2009, countries in North America and the European Union accounted for more than 50 percent of the world's 1 billion fixed and mobile broadband subscriptions, but South Asia and Sub-Saharan Africa together accounted for less than 3 percent. The experience with mobile telephony though shows the potential for growth in the information and communication technology sector in developing countries. Almost 75 percent of the world's mobile telephone subscriptions are in low- and middle-income countries, which have also promoted exciting innovations and realized significant economic development benefits. In fact, a growing number of countries are seeking to spur broadband development. To aid governments as they design their own programs, this volume offers examples and ideas from some of the most successful broadband markets: particularly the Republic of Korea, but also Finland, France, Japan, Sweden, the United Kingdom, and the United States. 'Building Broadband' does not suggest a universal solution but rather provides a long list of policies and programs organized within a strategic framework that allows solutions tailored to country circumstances. The essential building blocks identified are useful everywhere because they focus on improving incentives and the climate for private investment. This is a policy that even countries with very limited resources will be able to exploit.

Impact Evaluation in Practice, Second Edition

Paul J. Gertler, Sebastian Martinez, Patrick Premand, Laura B. Rawlings, Christel M. J. Vermeersch, 2016-09-12 The second edition of the Impact Evaluation in Practice handbook is a comprehensive and accessible introduction to impact evaluation for policy makers and development practitioners. First published in 2011, it has been used widely across the development and academic communities. The book incorporates real-world examples to present practical guidelines for designing and implementing impact evaluations. Readers will gain an understanding of impact evaluations and the best ways to use them to design evidence-based policies and programs. The updated version covers the newest techniques for evaluating programs and includes state-of-the-art implementation advice, as well as an expanded set of examples and case studies that draw on recent development challenges. It also includes new material on research ethics and partnerships to conduct impact evaluation. The handbook is divided into four sections: Part One discusses what to evaluate and why; Part Two presents the main impact evaluation methods; Part Three addresses how to manage impact evaluations; Part Four reviews impact evaluation sampling and data collection. Case studies illustrate different applications of impact evaluations. The book links to complementary instructional material available online, including an applied case as well as questions and answers. The updated second edition will be a valuable

resource for the international development community, universities, and policy makers looking to build better evidence around what works in development.

Springer Handbook of Global Navigation Satellite Systems Peter Teunissen, Oliver

Montenbruck, 2017-06-16 This Handbook presents a complete and rigorous overview of the fundamentals, methods and applications of the multidisciplinary field of Global Navigation Satellite Systems (GNSS), providing an exhaustive, one-stop reference work and a state-of-the-art description of GNSS as a key technology for science and society at large. All global and regional satellite navigation systems, both those currently in operation and those under development (GPS, GLONASS, Galileo, BeiDou, QZSS, IRNSS/NAVIC, SBAS), are examined in detail. The functional principles of receivers and antennas, as well as the advanced algorithms and models for GNSS parameter estimation, are rigorously discussed. The book covers the broad and diverse range of land, marine, air and space applications, from everyday GNSS to high-precision scientific applications and provides detailed descriptions of the most widely used GNSS format standards, covering receiver formats as well as IGS product and meta-data formats. The full coverage of the field of GNSS is presented in seven parts, from its fundamentals, through the treatment of global and regional navigation satellite systems, of receivers and antennas, and of algorithms and models, up to the broad and diverse range of applications in the areas of positioning and

navigation, surveying, geodesy and geodynamics, and remote sensing and timing. Each chapter is written by international experts and amply illustrated with figures and photographs, making the book an invaluable resource for scientists, engineers, students and institutions alike.

Water Noah Berlatsky, 2011-10-26 This striking volume delivers contemporary perspectives on water as a resource, with the majority of the material reflecting stances of countries other than the United States. Essays are assembled across four chapters that explain the state of our oceans, how we are managing water scarcity, how various cultures are trying to access safe water, and hydropower. Essay contributors include the HM Government, Department of Energy and Climate Change, The Economist, Integrated Regional Information Networks News, Zhou Jigang, Peng Guangcan, Kieran R. Hickey, and Mae-Wan Ho.

Taxation, International Cooperation and the 2030 Sustainable Development Agenda Irma Johanna Mosquera Valderrama, Dries Lesage, Wouter Lips, 2021-03-29 This open access volume addresses the link between international taxation, the 2030 Sustainable Development Agenda and the medium-term revenue strategy concept. It also analyses how countries and governments can reinforce this link in current and future initiatives in international taxation, including the base erosion profit shifting project initiated by the Organization for Economic Co-operation and Development with the political mandate of the G20. It discusses the 2030 Sustainable Development Agenda that are

relevant for taxation and assesses the current work done by international organizations, regional tax organizations and countries to achieve these Sustainable Development Goals. The contributions to this volume provide an interdisciplinary mix of expertise in tax law, international political economy, global governance and international relations. Through these different perspectives, this volume provides an elaborate reference and evaluation framework for multilateral cooperation on tax and development to strengthen the revenue system of developed and developing countries. This topical volume is of interest to students and researchers of the social sciences, law and economics, as well as policy makers working on taxation.
