Gunter Senft

The Dynamics of Nominal Classification Ruth Singer,2016-02-22 The use of grammatical gender in the Australian language Mawng calls into question prevailing ideas about the functions of nominal classification systems. Mawng's gender system has a strong semantic basis and plays an important role in the construction of meaning in discourse. Gender agreement in verbs is frequently lexicalized, creating idioms called lexicalised agreement verbs that are structurally similar to noun-verb idioms. This book will be of interest to anyone interested in nominal classification or cross-linguistic approaches to idioms.

Nominal Classification Marcin Kilarski,2013-12-18 This book offers the first comprehensive survey of the study of gender and classifiers throughout the history of Western linguistics. Based on an analysis of over 200 genetically and typologically diverse languages, the author shows that these seemingly arbitrary and redundant categories play in fact a central role in the lexicon, grammar and the organization of discourse. As a result, the often contradictory approaches to their functionality and semantic motivation encapsulate the evolving conceptions of such issues as cognitive and cultural correlates of linguistic structure, the diverse functions of grammatical categories, linguistic complexity, agreement phenomena and the interplay between lexicon and grammar. The combination of a typological and historiographic perspective adopted here allows the reader to appreciate the detail and insight of earlier, supposedly 'prescientific' accounts in light of the data now available and to examine contemporary discussions in the context of prevailing conceptions in the study of language at different points in its history since antiquity.

Systems of Nominal Classification Gunter Senft,2000-08-03 A major linguistic study of nominal classification systems across a variety of languages, first published in 2000.
