Google My Business Laura Maya, 2018-01-23 Learn how to set up, use and get the most out of Google My Business! With Google handling more than two trillion searches a year, and nearly half of those having local intent, it's safe to say that having a local presence for your business is huge. And that all starts with a Google My Business listing. Well, here is an excellent opportunity to harness all the persuasive power of Google My Business Platform, claim your business on Google Maps, building your website's authority and boost your business Local consumers are increasingly searching online for shops, grocery stores, restaurants, car dealers, realtors and other businesses in their local area. According to Google, four out of five people use search engines to find local information,

like a company's business hours, address, phone number, online reviews, busy times and more. Have You Taken a Look at Google's Local Listing Platform? Google's new listing platform "Google My Business" has replaced Google+ Local and Google Places; instead, you will use Google My Business to manage your search, Maps, and Google+ account all from this ONE convenient location. Getting a local business listed on Google My Business (GMB) and other online directories is one of the fastest and easiest ways to get a local business to start showing up for local search results on Google. Before we dive in further, let's take a look at some facts:

- 72% of consumers who perform a local search visit a store within 5 miles distance.
- 50% of local searches lead to store visits within one day.
- 78% of Local mobile searches result in an offline purchase.
- 51% of smartphone users have discovered a new company or product when searching from their smartphone.
- More Google Searches takes place on mobile devices than on computers in 10 countries including US and Japan.
- Businesses with detailed and complete online Google My Business listings are twice as likely to be considered reputable by consumers.
- Adding photos to your business listing will drive 42% more requests for driving directions on Google Maps and 35% more clicks to your website.

In today's digital marketing and advertising economy, Google is the number one way that your prospects and new customers are going to gather information about your business. In this high-impact Training Guide, we'll walk you through the exact process of making a successful Google My business profile step by step and optimizing it for best performance.

Computation by the Method of Characteristics of Disturbance in an Elastic Half-space Caused by Blast-like Surface Loading Clarence Maurice Ablow, 1967 The computation by the method of characteristics developed in this report locates propagating shocks and gives their strengths precisely. It can provide the other details of the disturbance field with arbitrary accuracy through refinement of the finite difference mesh. Since the equations represent a medium without dissipation, their stabilization is a major difficulty. This stability problem has not yet been solved completely so that no numerical results of engineering usefulness are presented. The continuation and completion of the development of the present exact calculation method is recommended so that results of simpler, approximate methods for non-elastic media can be checked.

E-Discovery Tools and Applications in Modern Libraries de Smet, Egbert, Dhamdhare, Sangeeta, 2016-07-13 Technology has revolutionized the ways in which libraries store, share, and access information. As digital resources and tools continue to advance, so too do the opportunities for libraries to become more efficient and house more information. E-Discovery Tools and Applications in Modern Libraries presents critical research on the digitization of data and how this shift has impacted knowledge discovery, storage, and retrieval. This publication explores several emerging trends and concepts essential to electronic discovery, such as library portals, responsive websites, and federated search technology. The timely research presented within this publication is designed for use by librarians, graduate-level students, technology developers, and researchers in the field of library and information science.

How to Get on the 1st Page of Google Michael Mathiesen, 2013-10-14 How To Get On The 1st Page Of Google in under 5 minutes - is a complete system of how to get your business pages on to the top of the 1st Page of Google search results and All the other search engines in under five minutes. Today, due to the increased amount of competition for attention on the Internet, you need to know the latest information about how to get your web sites found by the search engines so that you can compete. The good news is that in the most recent changes to their Algorithm - the mathematical formula that Google uses to prioritize search results - there only a few things you need to do to reach 90% of these requirements and your competition is probably not doing them. When you realize how easy

it is to get your website listed on the first page of Google, you will probably do like this author and create dozens more web sites because the more times you get found on the first page of search engine results and for more and more keyword phrases, the more your product or service will be purchased by those visitors. The author will show you how to create many dozens or even hundreds of urls that you can setup at no cost and multiply your first page results many times over, allowing you to dominate the Internet for your product, brand, or activity. Included in this book are several websites that you will see are on the first page of Google and that will help you do the same by simply following the training videos and other content contained there. The key to being on the 1st Page of Google is not the accomplishment itself, because you can get kicked off by others who have mastered the art better than you. The key is to not only get on the first page of Google search results, but staying there for long enough time to make millions on the Internet. Also, embedded in this book description is a demonstration of how to use keywords in your text to help Google to list your content higher than others in your field who fail to do so with enough Google 1st Page keyword density. You have to remember that Google is just a computer and the human brain is always able to outsmart a computer, but it's not going to happen to most of you without the marketing research and experience contained in this book. This is all coming from over 20 years of How To Get On the First Page of Google experiences that have paid off big time and which continues to pay off for all of our readers. In his new and updated edition, the author gives you the latest discoveries he has made about the most important Google News Ever. Today, there are only four things you need to do, each of them taking just minutes to reach 90% of the Google Algorithms requirements for First Page Search results and they are at the top of the first chapter. And, for anyone who does not have a product or service they can successfully market on the Internet, the author includes a website with the number one most successful product ever sold on the Internet other than sex - and that is FOOD! If your products are not doing well, chances are it's because of too many other folks trying to peddle the same things with different names. This unique food product has almost zero competition at this time, but you must act quickly.

Ultra-Wideband, Short-Pulse Electromagnetics 5 Shane Cloude, 2002-10-31 The purpose of the Ultra-Wideband Short-Pulse Electromagnetics Conference series is to focus on advanced technologies for the generation, radiation and detection of ultra-wideband short pulse signals, taking into account their propagation, scattering from and coupling to targets of interest; to report on developments in supporting mathematical and numerical methods; and to describe current and potential future applications of the technology. The fifth such Conference was held in Edinburgh, Scotland in June 2000 as part of EUROEM 2000 and the proceedings in this volume report on newly emerging ideas and develop recurrent themes of earlier meetings. The topics include electromagnetic theory and scattering theory (including papers presented at a special session on fundamental solutions of Maxwell's equations); ultra-wideband radar systems; ultra-wideband and transient antennas; pulsed power generation and propagation; ultra-wideband polarimetry; ultra-wideband and transient metrology; detection and identification studies; RF interactions and chaotic effects; and biological effects.

Practical Steps to Digital Research Deborah B. Stanley, 2018-07-11 This hands-on approach to teaching digital research skills breaks down each research skill into simple, targeted steps that enable students to research more deeply and to accomplish real-world tasks. Today's rapidly diversifying digital world provides easy access to information, making it increasingly important that students know how to conduct research online. In this book, you'll learn how to transition your instruction of the research process from a print context to a digital one, and to expand your own knowledge of how to best assist students at all stages of their research. Using six well-defined steps that she developed in her 26 years of experience as a school librarian, Deb Stanley provides practical strategies for each of the six steps of the research process accompanied by easily used and replicated lessons and handouts that are applicable and adaptable to all grade levels K-12. Step-by-step instruction, links to Common Core state standards, and ideas to help students succeed at each stage of the research process makes this title a must-have for any school librarian.

Inventing the Medium Janet H. Murray, 2011-11-23 A foundational text offering a unified design vocabulary and a common methodology for maximizing the expressive power of digital artifacts. Digital artifacts from iPads to databases pervade our lives, and the design decisions that shape them affect how we think, act, communicate, and understand the world. But the pace of change has been so rapid that technical innovation is outstripping design. Interactors are often mystified and frustrated by their enticing but confusing new devices; meanwhile, product design teams struggle to articulate shared and enduring design goals. With *Inventing the Medium*, Janet Murray provides a unified vocabulary and a common methodology for the design of digital objects and environments. It will be an essential guide for both students and practitioners in this evolving field. Murray

explains that innovative interaction designers should think of all objects made with bits—whether games or Web pages, robots or the latest killer apps—as belonging to a single new medium: the digital medium. Designers can speed the process of useful and lasting innovation by focusing on the collective cultural task of inventing this new medium. Exploring strategies for maximizing the expressive power of digital artifacts, Murray identifies and examines four representational affordances of digital environments that provide the core palette for designers across applications: computational procedures, user participation, navigable space, and encyclopedic capacity. Each chapter includes a set of Design Explorations—creative exercises for students and thought experiments for practitioners—that allow readers to apply the ideas in the chapter to particular design problems. *Inventing the Medium* also provides more than 200 illustrations of specific design strategies drawn from multiple genres and platforms and a glossary of design concepts.
