Nanocosmetics Arun Nanda, Sanju Nanda, Tuan Anh Nguyen, Susai Rajendran, Yassine Slimani, 2020-05-19 Nanotechnology is key to the design and manufacture of the new generation of cosmetics. Nanotechnology can enhance the performance and properties of cosmetics, including colour, transparency, solubility, texture, and durability. Sunscreen products, such as UV nano-filters, nano-TiO<sub>2</sub> and nano-ZnO particles, can offer an advantage over their traditional counterparts due to their broad UV-protection and non-cutaneous side effects. For perfumes, nano-droplets can be found in cosmetic products including Eau de Toilette and Eau de Parfum. Nanomaterials can also be used in cosmetics as transdermal drug delivery systems. By using smart nanocontainers, active compounds such as vitamins, antioxidants, nutrients, and anti-inflammatory, anti-infective agents, can be delivered effectively. These smart nanocontainers are typically related with the smart releasing property for their embedded active substances. These smart releases could be obtained by using the smart coatings as their outer nano-shells. These nano-shells could prevent the direct contact between these active agents and the adjacent local environments. *Nanocosmetics: Fundamentals, Applications and Toxicity* explores the formulation design concepts and emerging applications of nanocosmetics. The book also focuses on the mitigation or prevention of their potential nanotoxicity, potential global regulatory challenges, and the technical challenges of mass implementation. It is an important reference source for materials scientists and pharmaceutical scientists looking to further their understanding of how nanotechnology is being used for the new generation of cosmetics. Outlines the major fabrication and formulation design concepts of nanoscale products for cosmetic applications Explores how nanomaterials can safely be used for various applications in cosmetic products Assesses the major challenges of using nanomaterials for cosmetic applications on a large scale

The Hakka Cookbook Linda Lau Anusasananan, 2012-10-08 Veteran food writer Linda Lau Anusasananan opens the world of Hakka cooking to Western audiences in this fascinating chronicle that traces the rustic cuisine to its roots in a history of multiple migrations. Beginning in her grandmother's kitchen in California, Anusasananan travels to her family's home in China, and from there fans out to embrace Hakka cooking across the globe—including Hong Kong, Taiwan, Singapore, Malaysia, Canada, Peru, and beyond. More than thirty home cooks and chefs share their experiences of the Hakka diaspora as they contribute over 140 recipes for everyday Chinese comfort food as well as more elaborate festive specialties. This book likens Hakka cooking to a nomadic type of soul food, or a hearty cooking tradition that responds to a shared history of hardship and oppression. Earthy, honest, and robust, it reflects the diversity of the estimated 75 million Hakka living in China and greater Asia, and in scattered communities around the world—yet still retains a core flavor and technique. Anusasananan's deep personal connection to the tradition, together with her extensive experience testing and developing recipes, make this book both an intimate journey of discovery and an exciting introduction to a vibrant cuisine.

We address these issues head-on with 120 foolproof, great-tasting recipes for cookies, cakes, pies and more that reduce the overall sugar content by at least 30% and rely solely on more natural alternatives to white sugar.

Ethical Vegan Jordi Casamitjana, 2020-12-03 'Powerful and poignant.' Virginia McKenna OBE, Born Free Ethical veganism is not just a diet. Not just an opinion; nor a trend. This is a 21st-century revolution which began more than twenty centuries ago. Ethical veganism is not only about the food you choose to consume, it is a coherent philosophical belief that affects most areas of your life, and which could be the answer to today's global crises. Jordi Casamitjana is the vegan zoologist and animal protection campaigner whose landmark Employment Tribunal in 2020 made ethical veganism a protected belief in Great Britain. Ethical Vegan describes Jordi's extraordinary life and the animal encounters which led him to veganism and legal victory. It debunks myths and dispels preconceptions, offering a comprehensive analysis of veganism as a philosophy and as a socio-political transformative movement. Taking in history, science and everyday living, it explores how it is possible to dress ethically, travel, consume and work responsibly and, of course, eat well without compromising vegan ethics. Ethical Vegan is a riveting read - Jordi Casamitjana argues passionately for humans to interact with the world in a positive and compassionate way. This thought-provoking manifesto for doing no harm has the power to open people's minds and help to achieve a better future for all living things and the planet. As informative as it is incisive, as inspiring as it is inviting, this book will become one of the stand-out pieces of literature in the animal liberation movement. A must read whether you are vegan, vegetarian or otherwise!' Jay Brave

Antioxidants in Food Jan Pokorny, Nelly Yanishlieva, Michael H. Gordon, 2001-04-12 Antioxidants are an increasingly important ingredient in food processing. Their traditional role is, as their name suggests, in inhibiting the development of oxidative rancidity in fat-based foods, particularly meat and dairy products and fried foods. However, more recent research has suggested a new role in inhibiting cardiovascular disease and cancer. Antioxidants in Food: Practical Applications provides a review of the functional role of antioxidants and discusses how they can be effectively exploited by the food industry. The first part of the book looks at antioxidants and food stability with chapters on the development of oxidative rancidity in foods, methods for inhibiting oxidation, and ways of measuring antioxidant activity. Part 2 looks at antioxidants and health, including chapters on antioxidants and cardiovascular disease, their antitumour properties, and bioavailability. A major trend in the food industry, driven by consumer concerns, has been the shift from the use of synthetic to natural ingredients in food products. Part 3 looks at the range of natural antioxidants available to the food manufacturer. The final section of the book looks at how these natural antioxidants can be effectively exploited, covering such issues as regulation, preparation, antioxidant processing functionality and their use in a range of food products from meat and dairy products, frying oils and fried products, to fruit and vegetables and cereal products.
