Dancing in the Forest Helen Hong,2022-11-11 Why do Koreans search for shamans? Confrontation with jarring reality, magnified in the context of immigration, pulls them to look for cultural roots in moral solidarity with their ancestors. Ancestral spirits travel by carrying culturally engrained remedial power to the othered life of the Korean immigrant community in the country of Protestantism. Korean shamans mediate the present with the past, life with death, the living with the ancestral spirits, and Confucian moral virtue with Protestant belief, and fill the geographical and collective mental gap in a life of transition. This book introduces Korean shamanism within the Protestant context of immigration in the United States, including an ethnography of Korean shamans in order to observe this landscape of not only conflictive but also ambivalent episodes through rituals and narratives of participants.

Georgia O'Keeffe's Wartime Texas Letters Amy Von Lintel,2020-04-30 In 1912, at age 24, Georgia O’Keeffe boarded a train in Virginia and headed west, to the prairies of the Texas Panhandle, to take a position as art teacher for the newly organized Amarillo Public Schools. Subsequently she would join the faculty at what was then West Texas State Normal College (now West Texas A&M University). Already a thoroughly independent-minded woman, she maintained an active correspondence with her future husband, photographer Alfred Stieglitz, and other friends back east during the years she lived in Texas. Amy Von Lintel brings to readers the collected O’Keeffe correspondence and added commentary and analysis, shining fresh light on a period of the artist’s life she characterizes as “some of the least appreciated in the vast O’Keeffe scholarship,” but also as “a time when she discovered her own voice as a young, successful, and independent woman . . . a dedicated faculty member at a brand-new college . . . a vibrant social butterfly . . . a progressive woman who spoke her mind and fought for her beliefs to be heard.” Although selected paintings by O’Keeffe that support the narrative are featured, this work focuses on O’Keeffe’s words. By doing so, Von Lintel aims to allow the artist’s voice to “emerge as a powerful witness of her own life, but also of western America in a pivotal moment of its development.” The result is an important new examination of one of our most beloved artists during a time when she was in the process of discovering her future identity.

Songs for "Great Leaders" Keith Howard,2020-01-24 Famously reclusive and secretive, North Korea can be seen as a theatre that projects itself through music and performance. The first book-length account of North Korean music and dance in any language other than Korean, Songs for Great Leaders pulls back the curtain on this theatre for the first time. Renowned ethnomusicologist Keith Howard moves from the first songs written in the northern part of the divided Korean peninsula in 1946 to the performances in February 2018 by a North Korean troupe visiting South Korea for the Pyeongchang Winter Olympic Games. Through an exceptionally wide range of sources and a perspective of deep cultural competence, Howard explores old revolutionary songs and new pop songs, developments of Korean instruments, the creation of revolutionary operas, and mass spectacles, as well as dance and dance notation, and composers and compositions. The result is a nuanced and detailed account of how song, together with other music and dance production, forms the soundtrack to the theater of daily life, embedding messages that tell the official history, the exploits of leaders, and the socialist utopia yet-to-come. Based on fieldwork, interviews, and resources in private and public archives and libraries in North Korea, South Korea, China, North America and Europe, Songs for Great Leaders opens up the North Korean regime in a way never before attempted or possible.

Out of Nature Kara Rogers,2012-11-01 About half of all species under threat of extinction in the world today are plants. The loss of plant biodiversity is disturbing for many reasons, but especially because it is a reflection of the growing disconnect between humans and nature. Plants have been used for millennia in traditional systems of healing and have held a significant place in drug development for Western medicine as well. Despite the recent dominance of synthetic drug production, natural product discovery remains the backbone of drug development. As the diversity of life on Earth is depleted and increasing numbers of species become lost to extinction, we continue to lose opportunities to achieve advances in medicine. Through stories of drug revelation in nature and forays into botany, human behavior, and conservation, Kara Rogers sheds light on the multiple ways in which humans, medicine, and plants are interconnected. With accessible and engaging writing, she explores the relationships between humans and plants, relating the stories of plant hunters of centuries past and examining the impact of human activities on the environment and the world's biodiversity. Rogers also highlights the role that plant-based products can play in encouraging conservation and protecting the heritage and knowledge of indigenous peoples. Out of Nature provides a fresh perspective on modern drug innovation and its relationship with nature. The book delves into the complexity of biophilia--the innate human attraction to life in the natural world--and suggests that the reawakening of this drive is fundamental to expanding conservation efforts and improving medicine. Rogers's examination of plants, humans, and drug discovery also conveys a passionate optimism for the future of biodiversity and medicine. Including a collection of hand-drawn maps and plant illustrations created by the author, this well-researched narrative will inspire as well as inform.
