The Economic History of India, 1857-2010 Tirthankar Roy,2020-09-10 From the end of the eighteenth century, two distinct global processes began to transform livelihoods and living conditions in the South Asia region. These were the rise of British colonial rule and globalization, that is, the integration of the region in the emerging world markets for goods, capital, and labour services. Two hundred years later, India was the home to many of the world's poorest people as well as one of the fastest growing market economies in the world. Does a study of the past help to explain the paradox of growth amidst poverty? The Economic History of India: 1857-2010 claims that the roots of this paradox go back to India's colonial past, when internal factors like geography and external forces like globalization and imperial rule created prosperity in some areas and poverty in others. Looking at the recent scholarship in this area, this revised edition covers new subjects like environment and princely states. The author sets out the key questions that a study of long-run economic change in India should begin with and shows how historians have answered these questions and where the gaps remain.

International Arbitration: Three Salient Problems Stephen M. Schwebel,1987-02-01 In the field of international arbitration, both inter-State and commercial, the effective establishment and operation of the arbitral tribunal is a matter of dominant importance. This study examines three salient problems which arise in this connection: the relationship between an arbitration clause and the contract of which it forms part; whether a refusal to arbitrate is a denial of justice under international law; and the impact upon arbitration of the withdrawal of a member of the tribunal.
