This landmark publication brings together 28 papers on reflexive constructions in languages from all continents, representing very diverse language types. While reflexive constructions have been discussed in the past from a variety of angles, this is the first edited volume of its kind. All the chapters are based on original data, and they are broadly comparable through a common terminological framework. The volume opens with two introductory chapters by the editors that set the stage and lay out the main comparative concepts, and it concludes with a chapter presenting generalizations on the basis of the studies of individual languages.

**Playing at the Next Level** Ken Horowitz,2016-10-21 Today a multinational video game developer, Sega was the first to break Nintendo's grip on the gaming industry, expanding from primarily an arcade game company to become the dominant game console manufacturer in North America. A major part of that success came from the hard work and innovation of its subsidiary, Sega of America, who in a little more than a decade wrested the majority market share from Nintendo and revolutionized how games were made. Drawing on interviews with nearly 100 Sega alumni, this book traces the development of the company, revealing previously undocumented areas of game-making history, including Sega's relationship with Tonka, the creation of its internal studios, and major breakthroughs like the Sega Channel and HEAT Network. More than 40 of the company's most influential games are explored in detail.
