Crow Flight Susan Cunningham, 2018-12-11 The curious flight patterns of crows lead a teen computer programmer down a path of mystery and romance. Gin trusts logic a little too much. She even designs programs to decide what to eat and how to spend her time. All that changes when she's paired with a new transfer student, Felix, on a computer modeling assignment to explain certain anomalies in the behavior of crows. Speaking of anomalies, why is Gin so disappointed that Felix isn't a match for her in the dating app she's designing with local gamers? As she enters Felix's world and digs further into the data behind crow behavior, Gin uncovers a terrible secret. And the wrong decision could equal disaster squared...

What's stopping you from turning this dream into a reality? The answer for many of us, is fear. The fear of the first step often paralyzes us from taking any at all. The fear of making a mistake is among our greatest. Mission35 shares the story of Brian Hogben, a mortgage broker in Hamilton, Ontario, whose path to success was not without its

fair share of mistakes. It was through trial and many errors, Brian learned the lessons that only these mistakes could teach. He insists he would not be the successful business owner he is today without these experiences. Perhaps you've experienced your fair share as well - you've taken the first step in pursuit of your passion and been shut out or shot down. Brian encourages you to persevere through these challenges. He believes the right decisions today can lead to your financial security tomorrow, and he wants to show you how. Make this book the first step in your journey and the springboard to launch your own dreams - the world is waiting!
