Online Maps with APIs and WebServices Michael P Peterson,2012-03-30 The Internet has become the major form of map delivery. The current presentation of maps is based on the use of online services. This session examines developments related to online methods of map delivery, particularly Application Programmer Interfaces (APIs) and MapServices in general, including Google Maps API and similar services. Map mashups have had a major impact on how spatial information is presented. The advantage of using a major online mapping site is that the maps represent a common and recognizable representation of the world. Overlaying features on top of these maps provides a frame of reference for the map user. A particular advantage for thematic mapping is the ability to spatially reference thematic data.

Google Maps Hacks Rich Gibson,Schuyler Erle,2006-01-17 Want to find every pizza place within a 15-mile radius? Where the dog parks are in a new town? The most central meeting place for your

class, club or group of friends? The cheapest gas stations on a day-to-day basis? The location of convicted sex offenders in an area to which you may be considering moving? The applications, serendipitous and serious, seem to be infinite, as developers find ever more creative ways to add to and customize the satellite images and underlying API of Google Maps. Written by Schuyler Erle and Rich Gibson, authors of the popular Mapping Hacks, Google Maps Hacks shares dozens of tricks for combining the capabilities of Google Maps with your own datasets. Such diverse information as apartment listings, crime reporting or flight routes can be integrated with Google's satellite imagery in creative ways, to yield new and useful applications. The authors begin with a complete introduction to the standard features of Google Maps. The adventure continues with 60 useful and interesting mapping projects that demonstrate ways developers have added their own features to the maps. After that's given you ideas of your own, you learn to apply the techniques and tools to add your own data to customize and manipulate Google Maps. Even Google seems to be tacitly blessing what might be seen as unauthorized use, but maybe they just know a good thing when they see one. With the tricks

and techniques you'll learn from Google Maps Hacks, you'll be able to adapt Google's satellite map feature to create interactive maps for personal and commercial applications for businesses ranging from real estate to package delivery to home services, transportation and more. Includes a foreword by Google Maps tech leads, Jens and Lars Rasmussen.

Computational Intelligence in Data Mining – Volume 1 Lakhmi C. Jain,Himansu Sekhar Behera,Jyotsna Kumar Mandal,Durga Prasad Mohapatra,2014-12-10 The contributed volume aims to explicate and address the difficulties and challenges for the seamless integration of two core disciplines of computer science, i.e., computational intelligence and data mining. Data Mining aims at the automatic discovery of underlying non-trivial knowledge from datasets by applying intelligent analysis techniques. The interest in this research area has experienced a considerable growth in the last years due to two key factors: (a) knowledge hidden in organizations' databases can be exploited to improve strategic and managerial decision-making; (b) the large volume of data managed by organizations makes it impossible to carry out a manual analysis. The book addresses different

methods and techniques of integration for enhancing the overall goal of data mining. The book helps to disseminate the knowledge about some innovative, active research directions in the field of data mining, machine and computational intelligence, along with some current issues and applications of related topics.

Digital Tools in Urban Schools Jabari Mahiri, 2011-07-28 Today there is massive interest in how digital tools and popular culture are transforming learning out of school and lots of dismay at how digitally lost our schools are. Jabari Mahiri works his usual magic and here shows us how to cross this divide in a solidly grounded and beautifully written book. ---James Paul Gee, Fulton Presidential Professor of Literacy Studies, Arizona State University Digital Tools in Urban Schools is a profoundly sobering yet inspiring depiction of the potential for committed educators to change the lives of urban youth, with the assistance of a new set of technical capabilities. ---Mimi Ito, Professor in Residence and MacArthur Foundation Chair in Digital Media and Learning, Departments of Informatics and Anthropology, University of California, Irvine An uplifting book that addresses a critical gap in existing

literature by providing rich and important insights into ways teachers, administrators, and members of the wider community can work together with students previously alienated---even excluded---from formal education to enhance classroom learning with appropriate digital tools and achieve inspiring results under challenging circumstances. ---Colin Lankshear, James Cook University, and Michele Knobel, Montclair State University *Digital Tools in Urban Schools* demonstrates significant ways in which high school teachers in the complex educational setting of an urban public high school in northern California extended their own professional learning to revitalize learning in their classrooms. Through a novel research collaboration between a university and this public school, these teachers were supported and guided in developing the skills necessary to take greater advantage of new media and new information sources to increase student learning while making connections to their relevant experiences and interests. Jabari Mahiri draws on extensive qualitative data---including blogs, podcasts, and other digital media---to document, describe, and analyze how the learning of both students and teachers was dramatically transformed as they utilized digital media in their classrooms.

Digital Tools in Urban Schools will interest instructional leaders and participants in teacher preparation and professional development programs, education and social science researchers and scholars, graduate and undergraduate programs and classes emphasizing literacy and learning, and those focused on urban education issues and conditions.

A Practical Guide to Testing Wireless Smartphone Applications Julian Harty, 2010 Testing applications for mobile phones is difficult, time-consuming, and hard to do effectively. Many people have limited their testing efforts to hands-on testing of an application on a few physical handsets, and they have to repeat the process every time a new version of the software is ready to test. They may miss many of the permutations of real-world use, and as a consequence their users are left with the unpleasant mess of a failing application on their phone. Test automation can help to increase the range and scope of testing, while reducing the overhead of manual testing of each version of the software. However automation is not a panacea, particularly for mobile applications, so we need to pick our test automation challenges wisely. This book is intended to help software and test engineers

pick appropriately to achieve more; and as a consequence deliver better quality, working software to users. This Synthesis lecture provides practical advice based on direct experience of using software test automation to help improve the testing of a wide range of mobile phone applications, including the latest AJAX applications. The focus is on applications that rely on a wireless network connection to a remote server, however the principles may apply to other related fields and applications. We start by explaining terms and some of the key challenges involved in testing smartphone applications.

Subsequent chapters describe a type of application e.g. markup, AJAX, Client, followed by a related chapter on how to test each of these applications. Common test automation techniques are covered in a separate chapter, and finally there is a brief chapter on when to test manually. The book also contains numerous pointers and links to further material to help you to improve your testing using automation appropriately. Table of Contents: Introduction / Markup Languages / Testing Techniques for Markup Applications / AJAX Mobile Applications / Testing Mobile AJAX Applications / Client Applications / Testing Techniques for Client Applications / Common Techniques / When to Test

GPS and Google Earth for Development: How to Create, Share and Collaborate with Maps on the Net Santiago Arnalich, Julio Urruela, 2012-09 This book shows you how to use a GPS and Google Earth to create simple and expressive maps to share on the web like the one shown on the cover. With a reading time of a mere 10 hours you will learn to work with a GPS without making mistakes, to use it with Google Earth including in areas without internet access and to quickly create diverse interactive maps that other people can see and modify over the internet without the need for experts or unnecessary complications. Even though it has been written in the context of Relief and Development work, the same process is valid for whatever other application.

Google Search Secrets Christa Burns, Michael P. Sauers, 2014 Google can be an incredibly powerful tool for research, but the top-of-the-page results are seldom the most beneficial to library users and students, and many of the search engine's most useful features are hidden behind its

famously simple interface. Burns and Sauers reveal the secrets of effective Google searches in this invaluable resource showing how to get the most out of the service, with An overview of all the tool's search services, including Image, Maps, News, Blogs, Discussions, Scholar, Patents, and Books Ready-to-use instructions on how to go beyond the simple search box and top results to get library users the answers they need, fast Straightforward guidance on using filters to refine search results, with examples of common searches like images with Creative Commons licenses, news searches set for a date range or into an archive, and videos with closed captioning An explanation of the bibliography manager feature of Google Scholar, which allows students and researchers to build bibliographies with ease Tips for configuring Safe Search on workstations in children's departments and schools Copious screenshots walk readers through each topic step by step, making this a true how-to guide for everyone who uses Google.

The Pacific Crossing Guide 3rd edition Kitty van Hagen, 2016-10-20 The Pacific Crossing Guide is a complete reference for anyone contemplating sailing the Pacific in their own boat. From ideal timing, suitable boats, routes, methods of communication, health and provisioning to seasonal weather, departure and arrival ports, facilities, likely costs and dangers, the comprehensiveness of this new

edition will both inspire dreamers and instil confidence in those about to depart. This new edition has been completely restructured with Part 1 covering thorough preparation for a Pacific crossing and Part 2 covering Pacific weather patterns, major routes and landfall ports, with useful website links throughout. There are completely new sections on rallies, coral atolls and atoll navigation, the cyclone season and laying up, use of electronic charts, satellite phones versus HF radio, ongoing maintenance, and Pacific festivals. Completely updated, expanded and refreshed for the new generation of Pacific cruisers, this is the definitive reference, relied upon by many thousands of cruisers.

Time-Sensitive Remote Sensing Christopher D. Lippitt, Douglas A. Stow, Lloyd L.

Coulter, 2015-06-02 This book documents the state of the art in the use of remote sensing to address time-sensitive information requirements. Specifically, it brings together a group of authors who are both researchers and practitioners, who work toward or are currently using remote sensing to address time-sensitive information requirements with the goal of advancing the effective use of remote sensing to supply time-sensitive information. The book addresses the theoretical implications of time-sensitivity on

the remote sensing process, assessments or descriptions of methods for expediting the delivery and improving the quality of information derived from remote sensing, and describes and analyzes time-sensitive remote sensing applications, with an emphasis on lessons learned. This book is intended for remote sensing scientists, practitioners (e.g., emergency responders or administrators of emergency response agencies), and students, but will also be of use to those seeking to understand the potential of remote sensing to address a range of pressing issues, particularly natural and anthropogenic hazard response.

Using Google Earth in Libraries Eva H. Dodsworth, Andrew Nicholson, 2015-09-01 Using Google Earth in Libraries: A Practical Guide for Librarians is for public, school, academic, and special libraries serving from the elementary level through adult levels. Although articles have been written about specific subjects and specific library projects, this is the first published that offer a one-stop-shop for utilizing this online product for library-related purposes. Librarians reading this book will gain the Google Earth skills required to be able to not only use it themselves, but also teach others in how to

use this online technology.

ShipPlotter - A User Guide for the Ship Spotting Enthusiast (Contains Greyscale Images) Lionel K. Anderson MSc, 2010-01-08 ShipPlotter is a unique piece of software that enables a user to have a quasi live radar type display of shipping in their local coastal region or other regions and waterways around the world. The software decodes radio signals, received using a VHF radio receiver or scanner,

from ships transmitting digital data using the marine Automatic Identification System (AIS). The book provides an excellent description of the AIS system and messaging. ShipPlotter visually displays the position and identification of each ship either as radar view or on a chart created from a graphic image file, a satellite image download or a downloaded Open Street Map. Whilst mariners, small boat owners and yachtsmen can use the ShipPlotter software this book is written for and intended solely for the hobbyist and ship-spotting enthusiast. Its contents therefore should not be used as any sort of guidance or advice for those who are not firmly fixed to their seats in the comfort of their homes on dry ground!

expliqué et justifié la coupure qui a été pratiquée
dans le travail de hubert sur les celtes avec le
présent volume nous voici à la période de la tène
il débute en retraçant une expansion nouvelle
puis un recul l'épanouissement puis la décadence
du monde celtique
