Maosong Sun, Yang Liu, Jun Zhao

**Introduction to Google Translate** Gilad James, PhD, Google Translate is a multilingual translation service provided by Google. It allows users to translate words, phrases, and entire documents between multiple languages. The service was launched in April 2006 and has since been constantly updated to provide more accurate translations. Initially offering translations in only two languages, Google Translate now supports over 100 languages. The translation process works by analyzing the text or document input by the user, breaking it up into smaller segments, and then using statistical algorithms to match these segments with translations from its database. Google Translate has been a helpful tool for people to communicate across different languages, whether it be for business or personal use. However, it must be noted that automated translations often carry a high risk of inaccuracies due to the complexities inherent in language and the nuances of different cultures and contexts. It is always recommended to use translations as a starting point, and then have a native speaker review and refine the language to ensure accuracy.

*Analysing English-Arabic Machine Translation* Zakaryia Almahasees, 2021-11-30 Machine Translation (MT) has become widely used throughout the world as a medium of communication between those who live in different countries and speak different languages. However, translation between distant languages constitutes a challenge for machines. Therefore, translation evaluation is poised to play a significant role in the process of designing and developing effective MT systems. This book evaluates three prominent MT systems, including Google Translate, Microsoft Translator, and Sakhr, each of which provides translation between English and Arabic. In the book Almahasees scrutinizes the capacity of the three systems in dealing with translation between English and Arabic in a large corpus taken from various domains, including the United Nation (UN), the World Health Organization (WHO), the Arab League, Petra News Agency reports, and two literary texts: *The Old Man and the Sea* and *The Prophet*. The evaluation covers holistic analysis to assess the output of the three systems in terms of Translation Automation User Society (TAUS) adequacy and fluency scales. The text also looks at error analysis to evaluate the systems' output in terms of orthography, lexis, grammar, and semantics at the entire-text level and in terms of lexis, grammar, and semantics at the collocation level. The research findings contained within this volume provide important feedback about the capabilities of the three MT systems with respect to EnglishArabic translation and paves the way for further research on such an important topic. This book will be of interest to scholars and students of translation studies and translation technology.

**Sites of Translation** Laura Gonzales, 2018-09-24 Winner of the 2016 Sweetland Digital Rhetoric Collaborative Book Prize *Sites of Translation* illustrates the intricate rhetorical work that multilingual communicators engage in as they translate information for their communities. Blending ethnographic and empirical methods from multiple disciplines, Laura Gonzales provides methodological examples of how linguistic diversity can be studied in practice, both in and outside the classroom, and provides insights into the rhetorical labor that is often unacknowledged and made invisible in multilingual communication. *Sites of Translation* is relevant to researchers

and teachers of writing as well as technology designers interested in creating systems, pedagogies, and platforms that will be more accessible and useful to multilingual audiences. Gonzales presents multilingual communication as intellectual labor that should be further valued in both academic and professional spaces, and supported by multilingual technologies and pedagogies that center the expertise of linguistically diverse communicators.

**Human Issues in Translation Technology** Dorothy Kenny, 2017-01-12 Translation technologies are moulded by and impact upon humans in all sorts of ways. This state-of-the-art volume looks at translation technologies from the point of view of the human users - as trainee, professional or volunteer translators, or as end users of translations produced by machines. Covering technologies from machine translation to online collaborative platforms, and practices from 'traditional' translation to crowdsourced translation and subtitling, this volume takes a critical stance, questioning both utopian and dystopian visions of translation technology. In eight chapters, the authors propose ideas on how technologies can better serve translators and end users of translations. The first four chapters explore how translators - in various contexts and with widely differing profiles - use and feel about translation technologies as they currently stand, while the second four chapters focus on the future: on anticipating needs, identifying emerging possibilities, and defining interventions that can help to shape translation practice and research. Drawing on a range of theories from cognitive to social and psychological, and with empirical evidence of what the technologization of the workplace means to translators, *Human Issues in Translation Technology* is key reading for all those involved in translation and technology, translation theory and translation research methods.

*Writing Changes: Alphabetic Text and Multimodal Composition* Pegeen Reichert Powell, 2020-04-01 *Writing Changes* moves beyond restrictive thinking about composition to examine writing as a material and social practice rich with contradictions. It analyzes the assumed dichotomy between writing and multimodal composition (which incorporates sounds, images, and gestures) as well as the truism that all texts are multimodal. Organized in four sections, the essays explore • alphabetic text and multimodal composition in writing studies • specific pedagogies that place writing in productive conversation with multimodal forms • current representations of writing and multimodality in textbooks, of instructors' attitudes toward social media, and of writing programs • ideas about writing studies as a discipline in the light of new communication practices Bookending the essays are an introduction that frames the collection and establishes key terms and concepts and an epilogue that both sums up and complicates the ideas in the essays.

**Plurilingualism in Teaching and Learning** Julie Choi, Sue Ollerhead, 2018-01-09 Assembling a rich and diverse range of research studies on the role of plurilingualism across a wide variety of teaching and learning settings, this book supports teacher reflection and action in practical ways and illustrates how researchers tease out and analyze the complex realities of their educational environments. With a focus on education policies, teaching practices, training, and resourcing, this volume addresses a range of mainstream and specialized contexts and examines the position of learners and teachers as users of plurilingual repertoires. Providing a close look into the possibilities and constraints of plurilingual education, this book helps researchers and educators clarify and strengthen their understandings of the links between language and literacy and offers them new ways to think more rigorously and critically about the language ideologies that shape their own beliefs and approaches in language teaching and learning.

**Applied Computing & Information Technology** Roger Lee, 2017-07-14 This book presents the scientific outcome of the 5th International Conference on

Applied Computing and Information Technology (ACIT 2017), which was held on July 9-13, 2017 in Hamamatsu, Japan. The aim of this conference was to bring together researchers and scientists, businessmen and entrepreneurs, teachers, engineers, computer users, and students to discuss the numerous fields of computer science, to share their experiences and to exchange new ideas and information in a meaningful way. The book includes research findings on all aspects (theory, applications and tools) of computer and information science, and discusses the practical challenges encountered along the way and the solutions adopted to solve them. This book features 12 of the conference's most promising papers, written by authors who are expected to make important contributions to the field of computer and information science.

Curriculum Design and Praxis in Language Teaching Fernanda Carra-Salsberg, Maria Figueredo, Mihyon Jeon, 2022-03-31 Curriculum Design and Praxis in Language Teaching presents a variety of methodologies and theoretical perspectives for current and future postsecondary instructors in the areas of linguistics, second-language acquisition, and world literatures. Offering valuable insights for instructors, the materials presented in this book integrate perspectives and resources from various target languages, world regions, and cultures into areas related to teaching and learning within the field of language. From critical assessments of the current academic curriculum to the fine-tuning of lesson planning, the essays in this collection address the innovative design and implementation of traditional, blended, and online language courses. Including inter-artistic approaches, case studies, and practical guides, this book provides theoretical and hands-on suggestions regarding how to mindfully reinforce students' socio-cultural engagement and linguistic development both inside and outside of their language-learning classrooms. The innovative ideas for language pedagogy presented in this book - including implementing technology, enhancing engaged spaces of learning, and adapting to the ever-changing field of pedagogy - represent agile ways of blending old and new approaches to carry forward into twenty-first-century postsecondary classrooms.

Internet Cool Tools for Physicians Melissa Rethlefsen, David Rothman, Daniel Mojon, 2008-11-19 Feel like you're being sucked down into a swirl of never-ending information? Today's physicians are faced with new advances in medicine and new research that can impact practice, but finding the right information at the right time seems overwhelming in the constant deluge of scientific research. That's where this illustrated guide will walk you through some of today's most useful Internet tools, tools that can help you find, manage, and organize the information you need, so that it is always at your fingertips, whether for patient care, research, practice, or fun.

Papers in Translation Studies Sattar Izwaini, 2015-04-01 This book presents cutting-edge research in translation studies, offering stimulating discussions on translation and providing fresh perspectives on the field. Papers in Translation Studies features a selection of papers originally authored for this volume, addressing a variety of issues from different points of view and offering interesting contributions to the critical literature of the field. The volume provides useful resources that will be of great benefit for academics, students and practitioners. The contributions to this book promote research on translation theory and practice, and suggest ways of dealing with translation problems. The volume chapters are written by researchers from around the world, and consider various different languages and contexts. Areas of investigation include contrastive linguistics and translation, corpus-based translation studies, natural language processing, machine translation, and translator training.

**Appity Slap: A Small Business Guide to Web Apps, Tech Tools and Cloud Computing** ,

*Chinese Computational Linguistics and Natural Language Processing Based on Naturally Annotated Big Data* Maosong Sun, Yang Liu, Jun Zhao, 2014-09-19 This

book constitutes the refereed proceedings of the 13th China National Conference on Computational Linguistics, CCL 2014, and of the First International Symposium on Natural Language Processing Based on Naturally Annotated Big Data, NLP-NABD 2014, held in Wuhan, China, in October 2014. The 27 papers presented were carefully reviewed and selected from 233 submissions. The papers are organized in topical sections on word segmentation; syntactic analysis and parsing the Web; semantics; discourse, coreference and pragmatics; textual entailment; language resources and annotation; sentiment analysis, opinion mining and text classification; large-scale knowledge acquisition and reasoning; text mining, open IE and machine reading of the Web; machine translation; multilinguality in NLP; underresourced languages processing; NLP applications.

Bots and Beasts Paul Thagard, 2024-04-02 An expert on mind considers how animals and smart machines measure up to human intelligence. Octopuses can open jars to get food, and chimpanzees can plan for the future. An IBM computer named Watson won on Jeopardy! and Alexa knows our favorite songs. But do animals and smart machines really have intelligence comparable to that of humans? In *Bots and Beasts*, Paul Thagard looks at how computers (bots) and animals measure up to the minds of people, offering the first systematic comparison of intelligence across machines, animals, and humans. Thagard explains that human intelligence is more than IQ and encompasses such features as problem solving, decision making, and creativity. He uses a checklist of twenty characteristics of human intelligence to evaluate the smartest machines--including Watson, AlphaZero, virtual assistants, and self-driving cars--and the most intelligent animals--including octopuses, dogs, dolphins, bees, and chimpanzees. Neither a romantic enthusiast for nonhuman intelligence nor a skeptical killjoy, Thagard offers a clear assessment. He discusses hotly debated issues about animal intelligence concerning bacterial consciousness, fish pain, and dog jealousy. He evaluates the plausibility of achieving human-level artificial intelligence and considers ethical and policy issues. A full appreciation of human minds reveals that current bots and beasts fall far short of human capabilities.

*Computational Linguistics* Le-Minh Nguyen, Xuan-Hieu Phan, Kôiti Hasida, Satoshi Tojo, 2020-07-01 This book constitutes the refereed proceedings of the 16th International Conference of the Pacific Association for Computational Linguistics, PACLING 2019, held in Hanoi, Vietnam, in October 2019. The 28 full papers and 14 short papers presented were carefully reviewed and selected from 70 submissions. The papers are organized in topical sections on text summarization; relation and word embedding; machine translation; text classification; web analyzing; question and answering, dialog analyzing; speech and emotion analyzing; parsing and segmentation; information extraction; and grammar error and plagiarism detection.

*MultiMedia Modeling* Björn Þór Jónsson, Cathal Gurrin, Minh-Triet Tran, Duc-Tien Dang-Nguyen, Anita Min-Chun Hu, Binh Huynh Thi Thanh, Benoit Huet, 2022-03-14 The two-volume set LNCS 13141 and LNCS 13142 constitutes the proceedings of the 28th International Conference on MultiMedia Modeling, MMM 2022, which took place in Phu Quoc, Vietnam, during June 6-10, 2022. The 107 papers presented in these proceedings were carefully reviewed and selected from a total of 212 submissions. They focus on topics related to multimedia content analysis; multimedia signal processing and communications; and multimedia applications and services.

Quality Estimation for Machine Translation Lucia Specia, Carolina Scarton, Gustavo Henrique Paetzold, 2022-05-31 Many applications within natural language processing involve performing text-to-text transformations, i.e., given a text in natural language as input, systems are required to produce a version of this text (e.g., a translation), also in natural language, as output. Automatically evaluating the output of such systems is an important component in developing text-to-text applications. Two approaches have been proposed for this problem: (i) to compare the system outputs against one or

more reference outputs using string matching-based evaluation metrics and (ii) to build models based on human feedback to predict the quality of system outputs without reference texts. Despite their popularity, reference-based evaluation metrics are faced with the challenge that multiple good (and bad) quality outputs can be produced by text-to-text approaches for the same input. This variation is very hard to capture, even with multiple reference texts. In addition, reference-based metrics cannot be used in production (e.g., online machine translation systems), when systems are expected to produce outputs for any unseen input. In this book, we focus on the second set of metrics, so-called Quality Estimation (QE) metrics, where the goal is to provide an estimate on how good or reliable the texts produced by an application are without access to gold-standard outputs. QE enables different types of evaluation that can target different types of users and applications. Machine learning techniques are used to build QE models with various types of quality labels and explicit features or learnt representations, which can then predict the quality of unseen system outputs. This book describes the topic of QE for text-to-text applications, covering quality labels, features, algorithms, evaluation, uses, and state-of-the-art approaches. It focuses on machine translation as application, since this represents most of the QE work done to date. It also briefly describes QE for several other applications, including text simplification, text summarization, grammatical error correction, and natural language generation.

*Proceedings of the 3rd Borobudur International Symposium on Humanities and Social Science 2021 (BIS-HSS 2021)* Muji Setiyo, Agus Setiawan, Veni Soraya Dewi, Fitriana Yuliasuti, Chrisna Bagus Edhita Praja, Lintang Muliawanti, Zulfikar Bagus Pambuko, 2023-02-10 This is an open access book. Still related to the big theme of reinforcement the SDG's at the previous conference, we try to invite academics and researchers in the world to participate in the 3rd Borobudur International Symposium 2021 (3rd BIS 2021). As we know, The COVID-19 pandemic and its impact on all 17 SDGs have demonstrated that what began as a health catastrophe swiftly transformed into a human and socioeconomic crisis. In September 2019, the UN Secretary-General urged all sectors of society to mobilize for a decade of action on three fronts: global action to ensure increased leadership, increased resources, and smarter solutions for the Sustainable Development Goals; local action to embed the necessary transitions into governments' policies, budgets, institutions, and regulatory frameworks; and international action to ensure greater leadership, increased resources, and smarter solutions for the Sustainable Development Goals. Especially in 3rd BIS 2021, we brought up "Decade of Action towards Environmental Issues: Advancing the Innovation to Recover our Planet" as main theme. The conference will be held on Wednesday, December 15, 2021 in Magelang, Central Java, Indonesia. Scope includes Art & Linguistics, Communication, Economics, Education, Government Studies, Health Administration, Hospitality, International Relations, Law, Pharmacy, Political Studies, Psychology, Public Health, Religious Studies, Sociology, Health Sciences.
