Inspections and Reports on Dwellings: Assessing Age Philip Santo, 2013-06-26 Identifying the age of a property is a fundamental step in understanding its form of construction and in being prepared to differentiate between the characteristic defects of that age of property and defects which are more unusual and may warrant particular care in investigation and assessment. This second edition of *Inspections and Reports on Dwellings: Assessing Age* updates

the market context within which surveyors and valuers are now operating. In particular it has a new section on post-2000 properties, reflecting the profound impact of Government policies and environmental concerns on the modern urban landscape. The book is divided into thirteen age bands with over seventy color photographs of dwellings for each period. A commentary on each age band outlines the social, environmental and technical influences on properties being built at the time, helping to explain why they look as they do. A broad range of dwellings is covered: large and small, private and public sector, old and new, and particular features which help to place a dwelling within one of the defined periods are highlighted in comments on the photographs. This book is intended for all those engaged in inspecting dwellings, whether experienced, newly qualified or studying for appropriate qualifications to become members of professional institutions.

Westminster Part II: The Art, Architecture and Archaeology of the Royal Palace Warwick Rodwell, Tim Tatton-Brown, 2020-04-27 Westminster came into existence in the later Anglo-Saxon period, and by the mid-11th century, when Edward the Confessor's great new abbey was built, it was a major royal centre two miles south-west of the City of London. Within a century or so, it had become the principal seat of government in England, and this series of twenty-eight papers covers new research on the topography, buildings, art-history, architecture and archaeology of Westminster's two great establishments – Abbey and Palace. Part I begins with studies of the topography of the area, an account of its Roman-period finds and an historiographical overview of the archaeology of the Abbey. Edward the

Confessor's enigmatic church plan is discussed and the evidence for later Romanesque structures is assembled for the first time. Five papers examine aspects of Henry III's vast new Abbey church and its decoration. A further four cover aspects of the later medieval period, coronation, and Sir George Gilbert Scott's impact as the Abbey's greatest Surveyor of the Fabric. A pair of papers examines the development of the northern precinct of the Abbey, around St Margaret's Church, and the remarkable buildings of Westminster School, created within the remains of the monastery in the 17th and 18th centuries. Part II part deals with the Palace of Westminster and its wider topography between the late 11th century and the devastating fire of 1834 that largely destroyed the medieval palace. William Rufus's enormous hall and its famous roofs are completely reassessed, and comparisons discussed between this structure and the great hall at Caen. Other essays reconsider Henry III's palace, St Stephen's chapel, the king's great chamber (the 'Painted Chamber') and the enigmatic Jewel Tower. The final papers examine the meeting places of Parliament and the living accommodation of the MPs who attended it, the topography of the Palace between the Reformation and the fire of 1834, and the building of the New Palace which is better known today as the Houses of Parliament.

The National Register of Historic Places ,

Nineteenth-Century Interiors Clive Edwards,2023-12-05 This volume of primary source materials documents the nineteenth-century search for a representative style, and the alternating fashions for interiors that demonstrated the consumerism of the period. Although in some senses every interior is unique so that a style canon may seem to be meaningless, there have been important historical trends or styles that have influenced individual interiors, and these have formed the groundwork from which other styles and tastes have developed and changed. Accompanied by extensive editorial commentary, this collection will be of great interest to students

and scholars of art history.
