**Fundamentals of Automation and Remote Control** S. A. Ginzburg, I. Ya. Lekhtman, V. S. Malov, 2013-10-22 International Series of Monographs in Automation and Automatic Control, Volume 7: Fundamentals of Automation and Remote Control describes the complex systems of automatic control and telecontrol. This text is a translation from the second Russian edition. This book contains descriptive material on the fundamentals of automation and remote control, with attention to electrical components and systems. Part I deals with the basic components of automation and remote control, such as functions and general characteristics, and electromechanical, ferromagnetic, and electronic and radioactive components. The construction of

automation systems that use radioactive isotopes is given as an example where the penetrating power of the radioactive radiation can measure the thickness of an object. Part II discusses automation systems and describes the principles of stability analysis that are needed in the dynamics of automatic regulation and control, follower, and measuring systems. A schematic diagram of an automatic speed regulator is analyzed in detail as an example. Part III is a description of the many remote control systems that are used, for example, in signaling systems, in telemetry systems, and in command-link systems. The importance of communication channels to remote control systems is also pointed out. Long-range signaling and telecontrol, which uses selection methods to assign the correct signals, are explained. A diagram of a telecontrol unit with time separation of signals is illustrated, and the protection of the unit from employing distorted signals is explained. Mechanical engineers, technicians, and students with serious interest in automatic control and telecontrol will find this book valuable.

*Desktop Virtualization* Michael Johnson, 2011 Desktop virtualization (sometimes called client virtualization), as a concept, separates a personal computer desktop environment from a

physical machine using a client-server model of computing. The model stores the resulting virtualized desktop on a remote central server, instead of on the local storage of a remote client; thus, when users work from their remote desktop client, all of the programs, applications, processes, and data used are kept and run centrally. This scenario allows users to access their desktops on any capable device, such as a traditional personal computer, notebook computer, smartphone, or thin client. In simple terms, virtual machines are running on the server (for each client) and clients can connect to their computers using remote desktop software. This book is your ultimate resource for Desktop Virtualization. Here you will find the most up-to-date information, analysis, background and everything you need to know. In easy to read chapters, with extensive references and links to get you to know all there is to know about Desktop Virtualization right away, covering: Dynamic desktop, Remote desktop software, Virtual machine, Comparison of remote desktop software, Application virtualization, Workspace virtualization, Multiseat desktop virtualization, Comparison of Java Remote Desktop projects, 01 Communique, Adaptive Internet Protocol, Adobe Connect, AEP Netilla Secure Remote Access SSL VPN, AetherPal, Anyplace Control, AnywhereTS, Apple Remote Desktop, Appliance Link Protocol, Bomgar, Citrix Online, Citrix Systems, Citrix WinFrame, Citrix XenApp, Crossloop, DameWare, Desktop sharing, Ericom Software, Fog Creek Copilot, FreeRDP, GO-Global, GoToMyPC, GoToMyPC Pro, Goverlan Remote Administration Suite, Goverlan Remote Control Software, I'm InTouch, Iland, Independent Computing Architecture, Jack PC, KRDC, Linux Terminal Server Project, List of Desktop Sharing Software, LogMeIn, Neatx, Netman, Netviewer, Network Level Authentication, Network Security Toolkit, NX technology, Openmeetings, Oracle VDI, PcAnywhere, Proxy Networks, Inc., PXES, Qumranet, QVD (software), Remote Administrator, Remote Desktop Protocol, Remote Desktop Services, RemoteFX, Screenconnect, SimpleHelp,
