Greek and Roman Oared Warships 399-30BC John Morrison,2016-10-31 This is an important study of the new types of warships which evolved in the navies of the Mediterranean in the 4th and 3rd centuries BC, and of their use by Greeks, Phoenicians and Romans in the fleets and naval battles in the second and first centuries, culminating in the Battle of Aktion. The book includes a catalogue and discussion of the iconography of the ships with over fifty illustrations from coins, sculptures and other objects. John Coates discusses reconstructions, crews, ships and tactics illuminated by the recent experiments with the reconstructed trireme Olympias . Complete with gazetteer, glossary, bibliography and indexes.

Horoscopes of Europe Marc Penfield,2006 Horoscopes of Europe is Marc Penfield's third book on countries of the world arranged by continent. This encyclopedic book is the definitive work on the 51 nations that make up the world's smallest continent, from its largest (Russia) to four diminutive nations inside Italy, three of them shown here for the first time (Montenegro, Seborga and Sov. Military Order of Malta). This extremely valuable reference work is one that no astrologer interested in mundane, or political, astrology can afford to be without. A century ago, Europe had only 26 countries, most of them monarchies, only half of which remain today. Over the following eight decades, nine more nations were born and with the break-up of the Soviet Union, Czechoslovakia and Yugoslavia, 15 more countries emerged onto the world scene. Many countries have two horoscopes-one for its original monarchy, the other for its transition to democracy. France and Germany have many charts from their emergence in the Middle Ages down through a millennia to become the powerhouses of Europe. Charts for the Roman Republic and Empire are also shown. The Eurasian countries of the Caucasus have also been included as they straddle Europe and Asia as do the countries of Russia and Turkey. Charts for more than 135 European cities have also been included, calculated for when they were granted their charters. Appendix A has horoscopes for every member of the European Union, while Appendix B has the author's rectified birth times for most cities shown in this book. This appendix also has the author's speculative birth dates for the cities of London and Paris. Marc Penfield is a double Scorpio with Gemini rising. Known as an historian and researcher and a lover of history and geography, his many years as a travel agent enabled him to journey to many of the places he writes about. Marc Penfield is the author of *Bon Voyage* (on relocation techniques), *Solar Returns in Your Face*, *Stars over England* (with brief bios on its monarchs), *Horoscopes of the USA and Canada* (now in its 2nd printing), and *Horoscopes of Asia, Australia and the Pacific*.

Coseismic Landslides Ikuo Towhata,Gonghui Wang,Qiang Xu,Chris Massey,2022-11-04 This book is the result of an elaborate project initiated by the Joint Technical Committee (JTC-1) of 1) the International Society for Soil Mechanics and Geotechnical Engineering, 2) the International Association for Engineering Geology and the Environment, 3) the International Society for Rock Mechanics, and 4) the International Geotextile Society, with the focus on natural slopes and landslides. The framework of the book sets out the steps, based on recent disaster experiences in the twenty-first century, leading to the assessment of earthquake-induced landslide hazards. It contains: 1) important cases of landslides triggered by earthquakes around the world; 2) investigation into the characteristics of ground motion site response; 3) methods to determine landslide susceptibility and triggering thresholds and their comparative study; and 4) commentary on the production of earthquake-induced landslide hazard maps. All the contents are the result of the latest research on related areas. The book is a valuable resource for researchers, designers, consultants, academicians, government officials, and all others who are involved in the mitigation of coseismic landslides. The book contributes toward the development of a new chapter in disaster prevention and mitigation of landslides induced by earthquakes.

Turkey and Greece Deniz Bölükbaşı,2012-12-06 The Aegean disputes between Turkey and Greece represent one of the longest-standing contemporary conflicts in existence. These disagreements encompass a wide range of issues, including the seabed, maritime areas and airspace of the Aegean. The territorial status of a number of islands and rocks, as well as specific demilitarization conferred upon Greek islands in the Eastern Aegean under international treaties, is also a matter of dispute. The Aegean disputes, which still remain unresolved, are a major source of tension and conflict in Turkish-Greek relations. The stalemate in reaching a settlement is liable to give rise to new frictions resulting in an acute strain on relations. From time to time the disputes have erupted into crisis bringing the two countries to the verge of confrontation. These disputes are immensely complex and involve a broad range of interrelated issues with complicated political and legal aspects. This study represents the first attempt of its kind, providing in a single volume a comprehensive review and analysis of the legal and political aspects of the Aegean disputes which constitute a unique case study in international law, involving two neighbours in the Aegean that share a unique history and geography.
