Scott L. Cummings

*Red and Green and Blue and White* Lee Wind, 2021-10-19 On a block dressed up in Red and Green one house shone Blue and White. It's a holiday season that both Isaac, whose family is Jewish, and Teresa, whose family is Christian, have looked forward to for months! They've been counting the days, playing in the snow, making cookies, drawing (Teresa) and writing poems (Isaac). They enjoy all the things they share, as well as the things that make them different. But when Isaac's window is smashed in the middle of the night, it seems like maybe not everyone appreciates difference. Inspired by a true story, this is a tale of a community that banded together to spread light.

Blue and Green Scott L. Cummings, 2018-11-13 How an alliance of the labor and environmental movements used law as a tool to clean up the trucking industry at the nation's largest port. In *Blue and Green*, Scott Cummings examines a campaign by the labor and environmental movements to transform trucking at America's largest port in Los Angeles. Tracing the history of struggle in an industry at the epicenter of the global supply chain, Cummings shows how an unprecedented "blue-green" alliance mobilized to improve working conditions for low-income drivers and air quality in nearby communities. The campaign for "clean trucks," Cummings argues, teaches much about how social movements can use law to challenge inequality in a global era. Cummings shows

how federal deregulation created interrelated economic and environmental problems at the port and how the campaign fought back by mobilizing law at the local level. He documents three critical stages: initial success in passing landmark legislation requiring port trucking companies to convert trucks from dirty to clean and drivers from contractors to employees with full labor rights; campaign decline after industry litigation blocked employee conversion; and campaign resurgence through an innovative legal approach to driver misclassification that realized a central labor movement goal—unionizing port truckers. Appraising the campaign, Cummings analyzes the tradeoffs of using alternative legal frameworks to promote labor organizing, and explores lessons for building movements to regulate low-wage work in the “gig” economy. He shows how law can bind coalitions together and split them apart, and concludes that the fight for legal reform never ends, but rather takes different turns on the long road to justice.

**Blue in Green** Ram V, 2020 Struggling musician Erik Dieter returns home for his mother's funeral and, under strange circumstances, finds a photograph of a late sixties jazz musician. The search for this musician's identity will soon become an obsession that will take Erik down the spiralling depths of his ambitions--a journey that will erode his faith in reality, forcing him to confront the horrors of his own great expectations.--Page [4] of cover.

*Blue and Yellow Don't Make Green* Michael Wilcox, 1994 For more than 200 years the world has accepted that red, yellow and blue - the artists

primaries - give new colours when mixed. And for more than 200 years artists have been struggling to mix colours on this basis. In this exciting new book, Michael Wilcox offers a total reassessment of the principles underlying colour mixing. It is the first major break-away from the traditional and limited concepts that have caused painters and others who work with colour so many problems. Back Cover.

A City in Blue and Green Peter G. Rowe, Limin Hee, 2019-08-30 This open access book highlights Singapore's development into a city in which water and greenery, along with associated environmental, technical, social and political aspects have been harnessed and cultivated into a liveable sustainable way of life. It is also a story about a unique and thoroughgoing approach to large-scale and potentially transferable water sustainability, within largely urbanized circumstances, which can be achieved, along with complementary roles of environmental conservation, ecology, public open-space management and the greening of buildings, together with infrastructural improvements.

The Blue, the Gray, and the Green Brian Allen Drake, 2015 An unusual collection of Civil War essays as seen through the lens of noted environmental scholars, this book's provocative historical commentary explores how nature--disease, climate, flora and fauna, etc.--affected the war and how the war shaped Americans' perceptions, understanding, and use of nature.

**The blue and green book** Tania Rodriguez-Arias,2012-09-28 The Blue and Green Book is an inspirational book for parents who would like to explain more about spirituality to their children in a way they can understand, relate to, and enjoy. It encourages children to trust the light within their soul, expands their spiritual awareness, and validates their deep connection with the natural world. It consists of nine short, illustrated stories on spiritual and environmental issues, such as angels, guides, the soul's purpose, animal and plant awareness, recycling, organic food, chakra healing, and herbal medicine. Parents and children can have fun grounding and supporting their natural spiritual insights.

**Clean, Green and Blue** Yong Soon Tan,Tung Jean Lee,Karen Tan,2009 When Singapore became a sovereign state in 1965, the fledgling nation faced very similar problems as most other developing countries: high unemployment, low standard of living, and poor environmental conditions. In a scant four decades, it has become the 6th wealthiest country in the world in terms of per capita GDP and has managed its environment so well that it is now considered to be one of the best in the world. In this remarkable book, Tan Yong Soon authoritatively and objectively analyses how the environmental conditions were radically transformed within this period, and the enabling conditions which made this extraordinary transformation possible. This book will unquestionably make all Singaporeans proud of their environmental achievements, and at the same time enable other countries, both developed and

developing, to learn many lessons from a most remarkable success story. This book is a must read for any individual interested in environment-development issues. -Prof Asit K. Biswas, President, Third World Centre for Water Management, Mexico and Distinguished Visiting Professor, Lee Kuan Yew School of Public Policy, Singapore.

**Where Green Meets Blue** Elizabeth Robin, 2018-05-11 Where Green Meets Blue echoes Robin's late husband. There's something about where the green meets the blue, he would say, gazing at tall treetops blending into the lowcountry sky. That view--and Robin's poems about it--spark life's possibilities.

**The Blue-Green Algae** G Fogg, 2012-12-02 The Blue-Green Algae attempts to assemble a unified picture of blue-green algae as living organisms. It describes the organism's general features of form and structure, cellular organization, cell biology, gas vacuoles, and movements. The book addresses the culture, nutrition, growth, photosynthesis, chemosynthesis, heterotrophy, respiration, nitrogen metabolism, differentiation, reproduction, and life cycles of the blue-green algae. The organisms' freshwater and terrestrial ecology, pathogens, symbiosis, evolution, and phylogeny are also explained. These organisms form a substantial fraction of the biomass in several important types of habitat. Consequently, it is desirable to understand their activities if natural resources are to be conserved and used to best advantage. This book will be useful to students and research workers in this field of interest.

*Blue in Green* Chiyuma Elliott, 2021-08-27 *Blue in Green* is a book that is equal parts subtle intelligence and generosity of heart. In it, Chiyuma Elliott creates a unique voice that returns again and again to the question of what we expect from one another, and how that question is transformed instead into a question of what we owe each other. This notion of reversal plays out in the construction of the poems where, unlike so many of her contemporaries who come to poetry through prose techniques, Elliott's voice emerges through a complex shifting of phrase and syntax between lines or in mid-phrase. We don't, for example, get a straight-forward story of what caused the trauma of, say, cancer or abuse; rather, we hear impressions, half-formed ideas that rise and fall in the speaker's voice as it moves through the nature of the trauma, and experience the effects of the disorder that is the center of our everyday relationships through speech. Put another way: when a crisis overshadows the ordinary, disrupting the collective labor that we pursue together in love, friendship, and work, the hardship itself, in a kind of role-reversal, becomes a collaborator, necessitating new conceptions of relationships and proposing new modes of engagement, different rules of exchange. The book's forms also reflect this transformed idea of reciprocity: ekphrastic poems, normally reserved for visual artworks, instead describe modern jazz songs (including the title poem); letters and letter fragments are written to no one in particular, to the planet, to the universe; and highly allusive free verse poems defy convention with troubled,

wildly variable line lengths. The phrase When I was a wave recurs throughout the book in unpredictable places, sometimes as a title, sometimes in the middle of a poem, each time telling a different story about expectation, intimacy, and the risk inherent in any relationship. Blue in Green is a graceful, tough-minded, beautifully crafted collection, full of wit and elegance--

**Blue and Green Cities** Robert C. Brears, 2018-03-07 This book offers new research on urban policy innovations that promote the application of blue-green infrastructure in managing water resources sustainably. The author argues that urban water managers have traditionally relied on grey infrastructural solutions to mitigate risks with numerous economic and environmental consequences. Brears explores the role urban water managers have in implementing blue-green infrastructure to reduce ecological damage and mitigate risk. The case studies in this book illustrate how cities, of differing climates, lifestyles and income-levels, have implemented policy innovations that promote the application of blue-green infrastructure in managing water, wastewater and stormwater sustainably to reduce environmental degradation and enhance resilience to climate change. This new research on urban policy innovations that promote the application of blue-green infrastructure in managing water resources sustainably will be of interest to those working on water conservation and policy.

**Graffiti's Wall** Ram V, Anand Radhakrishnan, 2018-11-15 When an aspiring street

artist by the name of Grafity watches the tenements outside his home being razed, he finds an unlikely canvas at the one wall still left standing in the debris. Over the next weeks, he begins creating a mural on the wall, one that chronicles the lives of his friends: a local low-level fixer named Jay who harbours dreams of being a rapper. A brilliant and awkward boy named Chasma who writes love letters between shifts waiting tables at a local Chinese restaurant. And Saira, an aspiring actress with ambitions so fierce that they threaten to consume her and all those around her. As the mural progresses, the story gives us glimpses into these incandescent lives, their hopes and dreams both inspired and impeded by the impossible city that they live in.

Red Green Blue Alison Jay, 2010 Characters from nursery rhymes populate this tale, which highlights the colorful aspects of the familiar poems. Includes a key to the nursery rhymes referenced in the story.

*Am I Blue Or Am I Green? / Azul O Verde. ¿Cuál Soy Yo?* Beatrice Zamora, 2021-06-14 *Am I Blue or Am I Green- ¿Azul o verde, cual soy yo?* is a children's bilingual (Spanish and English) book that explores through the eyes of a child the differences between the Red, White and Blue of the American flag and the Green, White and Red of the Mexican flag. Topics covered include: Identity, Chicano-Latino-Mexican-American Identity, Immigrant Identity, Bilingual (Spanish-English), Undocumented Status, Mixed Status Family, Citizenship, Farm Workers Identity, Mexican Cultural Traditions, BIPOC Pocho, Resilience and Freedom. This bilingual

(English/Spanish) children's book explores the feelings of a child who is an American Citizen and whose parents are Undocumented Immigrants. The child examines his life where he enjoys the American experience and lives in a home where his parents speak Spanish and practice the traditions of Mexico. Although he enjoys baseball and soccer, reggae and rock en Español, Santa Claus and Las Posadas, he feels the fear of his parent's uncertain status. He explores the difference between being American and being an immigrant, and he acknowledges the limbo status that so many immigrants experience of not fully belonging to either country. Ultimately, he reaches an elegant solution, a coming to terms of his life and the richness he draws from two distinct cultural heritages. He is a symbol of resiliency and pride. This book focuses upon the Mexican- American/Chicano/a immigrant experience, but it is one that all immigrant communities can relate to while also providing an inside view from the child's point of view. It is fun and light-hearted while also emotional and moving at times. This is a great read for children in mixed status homes, for immigrant parents, for teachers and community members who interface with immigrant populations. It is an Insightful view of the challenging world of the child of immigrant parents in the United States and the beauty of resilience.

An Environmental History of the Civil War Judkin Browning, Timothy Silver, 2020-02-20 This sweeping new history recognizes that the Civil War was not just a military conflict but also a moment of profound transformation in

Americans' relationship to the natural world. To be sure, environmental factors such as topography and weather powerfully shaped the outcomes of battles and campaigns, and the war could not have been fought without the horses, cattle, and other animals that were essential to both armies. But here Judkin Browning and Timothy Silver weave a far richer story, combining military and environmental history to forge a comprehensive new narrative of the war's significance and impact. As they reveal, the conflict created a new disease environment by fostering the spread of microbes among vulnerable soldiers, civilians, and animals; led to large-scale modifications of the landscape across several states; sparked new thinking about the human relationship to the natural world; and demanded a reckoning with disability and death on an ecological scale. And as the guns fell silent, the change continued; Browning and Silver show how the war influenced the future of weather forecasting, veterinary medicine, the birth of the conservation movement, and the establishment of the first national parks. In considering human efforts to find military and political advantage by reshaping the natural world, Browning and Silver show not only that the environment influenced the Civil War's outcome but also that the war was a watershed event in the history of the environment itself.

Compact Blue-Green Lasers William Paul Risk, T. R. Gosnell, A. V. Nurmikko, 2003-01-09 William Risk, Timothy Gosnell and Arto Nurmikko have brought together their diverse expertise from industry and academia to write

the first fully comprehensive book on the generation and application of blue-green lasers. This volume describes the theory and practical implementation of three techniques for the generation of blue-green light: nonlinear frequency conversion of infrared lasers, upconversion lasers, and wide bandgap semiconductor diode lasers. In addition, it looks at the various applications that have driven the development of compact sources of blue-green light, and reflects on the recent application of these lasers in high-density data storage, color displays, reprographics, and biomedical technology. Compact Blue-Green Lasers is suitable for graduate-level courses or as a reference for academics and professionals in optics, applied physics, and electrical engineering.
