Business Process Management Forum Chiara Di Francescomarino,Andrea Burattin,Christian Janiesch,Shazia Sadiq,2023-08-31 This book constitutes the proceedings of the BPM Forum held at the 21st International Conference on Business Process Management, BPM 2023, which took place in Utrecht, The Netherlands, in September 2023. The BPM Forum hosts innovative research which has a high potential of stimulating discussions. The papers selected for the forum are expected to showcase fresh ideas from exciting and emerging topics in BPM, even if they are not yet as mature as the regular papers at the conference. The 23 full papers included in this volume were carefully reviewed and selected from a total of 151 submissions to the conference. The papers were organized in research tracks on foundations, engineering, and management.

**Green's Functions and Boundary Value Problems** Ivar Stakgold,Michael J. Holst,2011-03-01

Praise for the Second Edition This book is an excellent introduction to the wide field of boundary value problems.—Journal of Engineering Mathematics No doubt this textbook will be useful for both students and research workers.—Mathematical Reviews A new edition of the highly-acclaimed guide to boundary value problems, now featuring modern computational methods and approximation theory Green's Functions and Boundary Value Problems, Third Edition continues the tradition of the two prior editions by providing mathematical techniques for the use of differential and integral equations to tackle important problems in applied mathematics, the physical sciences, and engineering. This new edition presents mathematical concepts and quantitative tools that are essential for effective use of modern computational methods that play a key role in the practical solution of boundary value problems. With a careful blend of theory and applications, the authors successfully bridge the gap between real analysis, functional analysis, nonlinear analysis, nonlinear partial differential equations, integral equations, approximation theory, and numerical analysis to provide a comprehensive foundation for understanding and analyzing core mathematical and computational modeling problems. Thoroughly updated and revised to reflect recent developments, the book includes an extensive new chapter on the modern tools of computational mathematics for boundary value problems. The Third Edition features numerous new topics, including: Nonlinear analysis tools for Banach spaces Finite element and related discretizations Best and near-best approximation in Banach spaces Iterative methods for discretized equations Overview of Sobolev and Besov space linear Methods for nonlinear equations Applications to nonlinear elliptic equations In addition, various topics have been substantially expanded, and new material on weak derivatives and Sobolev spaces, the Hahn-Banach theorem, reflexive Banach spaces, the Banach Schauder and Banach-Steinhaus theorems, and the Lax-Milgram theorem has been incorporated into the book. New and revised exercises found throughout allow readers to develop their own problem-solving skills, and the updated bibliographies in each chapter provide an extensive resource for new and emerging research and applications. With its careful balance of mathematics and meaningful applications, Green's Functions and Boundary Value Problems, Third Edition is an excellent book for courses on applied analysis and boundary value problems in partial differential equations at the graduate level. It is also a valuable reference for mathematicians, physicists, engineers, and scientists who use applied mathematics in their everyday work.

50 Years with Hardy Spaces Anton Baranov,Sergei Kisliakov,Nikolai Nikolski,2018-03-28 Written in honor of Victor Havin (1933–2015), this volume presents a collection of surveys and original papers on harmonic and complex analysis, function spaces and related topics, authored by internationally recognized experts in the fields. It also features an illustrated scientific biography of Victor Havin, one of the leading analysts of the second half of the 20th century and founder of the Saint Petersburg Analysis Seminar. A complete list of his publications, as well as his public speech Mathematics as a source of certainty and uncertainty, presented at the Doctor Honoris Causa ceremony at Linköping

University, are also included.

Handbook on Business Process Management 1 Jan vom Brocke,Michael Rosemann,2010-09-21

Business Process Management (BPM) has become one of the most widely used approaches for the design of modern organizational and information systems. The conscious treatment of business processes as significant corporate assets has facilitated substantial improvements in organizational performance but is also used to ensure the conformance of corporate activities. This Handbook presents in two volumes the contemporary body of knowledge as articulated by the world's leading BPM thought leaders. This first volume focuses on arriving at a sound definition of Business Process Management approaches and examines BPM methods and process-aware information systems. As such, it provides guidance for the integration of BPM into corporate methodologies and information systems. Each chapter has been contributed by leading international experts. Selected case studies complement these views and lead to a summary of BPM expertise that is unique in its coverage of the most critical success factors of BPM.

**Reptiles of North Carolina** William M. Palmer,Alvin L. Braswell,2000-11-09 Based on more than twenty years of research in the field and in museum collections, Reptiles of North Carolina is the definitive work on the 71 reptile species found in the state. It is an indispensable resource for herpetologists, zoologists, ecologists, and wildlife managers, and it will be enjoyed by amateur naturalists as well. For each species the authors offer a description that includes characteristics useful in distinguishing the species from similar ones and information on the variation, distribution, and natural history of the species in the state. Each account is accompanied by a range map and at least one detailed drawing that shows characteristics important for identification. A section of color photographs aids in identification of reptiles.

**Pancreatology** Juan Iovanna,Uktam Ismailov,2009-07-15 Basic research discusses the implication of pancreatic stress protein in acute pancreatitis and pancreatic cancer and their possible role as therapeutic targets. Also, very original results show the unexpected role of lipids as mediators during acute pancreatitis. Gene screening strategies allow the detection of the genes responsible for gemcitabine resistance of pancreatic cancer cells. They lead to the selection of several target genes, in order to suppress the resistance of cells to gemcitabine treatment. The mechanism by which tetrahydrocannabinol is anti-tumoral in pancreatic cancer cells is presented and the use of THC as a promising new therapeutic agent is discussed. Genetic data are shown concerning hundreds of families with hereditary chronic pancreatitis and their possible role in the pathogenesis of the disease. Another very original study addresses the prevention and treatment of pancreatic diseases with diat. In clinical research, convincing data about the use of endoscopic sphincterotomy in the management of acute biliary pancreatitis is presented, based on the experience of a Center highly specialized in pancreatic diseases.

Archaeology on the Apulian - Lucanian Border Alastair Small,Carola Small,2022-05-26 The broad valley of the Bradano river and its tributary, the Basentello, separates the Apennine mountains in Lucania from the limestone plateau of the Murge in Apulia in southeast Italy. This book aims to explain how the pattern of settlement and land use changed in the valley over the whole period from the Neolithic to the late medieval.

**Conceptual Modeling - ER 2004** Paolo Atzeni,2004-10-27 This book constitutes the refereed proceedings of the 23rd International Conference on Conceptual Modeling, ER 2004, held in Shanghai, China, in November 2004. The 57 revised full papers presented together with three invited contributions and 8 demonstration and poster papers were carefully reviewed and selected from 295 submissions. The papers are organized in topical sections on conceptual modeling, datawarehouses, schema integration, data classification and mining, web-based information systems, query processing,

web services, schema evolution, conceptual modeling applications, UML, XML modeling, and industrial presentations.

### **Advances in Carbon Management Technologies** Subhas K. Sikdar, Frank

Princiotta, 2021-02-01 Volume 2 of Advances in Carbon Management Technologies has 21 chapters. It presents the introductory chapter again, for framing the challenges that confront the proposed solutions discussed in this volume. Section 4 presents various ways biomass and biomass wastes can be manipulated to provide a low-carbon footprint of the generation of power, heat and co-products, and of recovery and reuse of biomass wastes for beneficial purposes. Section 5 provides potential carbon management solutions in urban and manufacturing environments. This section also provides state-of-the-art of battery technologies for the transportation sector. The chapters in section 6 deal with electricity and the grid, and how decarbonization can be practiced in the electricity sector. The overall topic of advances in carbon management is too broad to be covered in a book of this size. It was not intended to cover every possible aspect that is relevant to the topic. Attempts were made, however, to highlight the most important issues of decarbonization from technological viewpoints. Over the years carbon intensity of products and processes has decreased, but the proportion of energy derived from fossil fuels has been stubbornly stuck at about 80%. This has occurred despite very rapid development of renewable fuels, because at the same time the use of fossil fuels has also increased. Thus, the challenges are truly daunting. It is hoped that the technology choices provided here will show the myriad ways that solutions will evolve. While policy decisions are the driving forces for technology development, the book was not designed to cover policy solutions.
