Chris Packham

Chris Packham's Back Garden Nature Reserve Chris Packham,2015-02-26 Written by the renowned TV presenter Chris Packham, this is a readable, practical guide to attracting wildlife to your garden. Many of Britain's plants and animals have come to rely upon gardens as an essential lifeline as their natural habitats come under increasing pressure from human activity and global warming. This comprehensive book explains the best ways to attract wildlife to gardens and encourage it to stay there. Written in a light-hearted yet passionate and authoritative style, the guide challenges popular notions of 'weeds' and 'pests' and invites gardeners to think again about the choices they make. Chris Packham's informative and lively text is complemented by attractive photographs and illustrations that will encourage an interest in the natural world on your doorstep, whether your 'garden' is a rural idyll or an urban window box. Chris argues that we have become so spellbound by 'nature's celebrities' – tigers, pandas and their ilk – that we are in danger of overlooking the most exciting species of all: those that we can touch, smell and observe in our own backyard.

Green Green Marie Lamba,Baldev Lamba,2017-05-09 Green grass is wide and fresh and clean for a family to play in, and brown dirt is perfect for digging a garden. Ready, Set, Green Graham Hill,Meaghan O'Neill,2008 The time to save the planet is now. Ready? Set? Green! Living green means reversing climate change, but it also means protecting your kids and pets, improving your own health, and saving money. And it doesn't necessarily demand a radical overhaul of your life-just some simple adjustments, such as switching to healthier cleaning products and driving fewer miles each week. Written by the visionaries at Treehugger.com, the most heavily trafficked site of its kind, Ready, Set, Green is the definitive (and recyclable) guide to modern green living. It offers solutions to make your home, office, car, and vacation more eco-friendly. For example: - Using a dishwasher instead of hand washing will save you 5,000 gallons of water annually. - Eating less beef will save you 250 pounds of CO2 per year. - Washing your clothes in cold water instead of hot will save 200 pounds of CO2 annually. - Replacing three of your home's most frequently used lightbulbs with compact fluorescent bulbs will save 300 pounds of CO2 every year. Including advice on how to properly insulate your house, cancel junk mail, and choose fruits and veggies wisely, Ready, Set, Green will help you change the future of the planet and restore balance to your daily life.

Greenopia Jacob Gordon,2006-04-01 This consumer guide is filled with more than 800 listings of green retailers, service providers, and organizations throughout Los Angeles. The businesses are divided into categories and have a minimum green requirement. Some the categories are further recognized with a green leaf award, which gauges green businesses on a scale of one to four leaves, four being the greenest. The award is based on a measure of a business's sale or use of green products and services. At the beginning of each category, the evaluation criteria is provided. Among the listings are everything from organic restaurants and grocery stores to dry cleaners, organic pest control services, and sustainable building suppliers, landscapers, and interior designers.
