**A Token of My Affection** Barry Shank,2004 For more than 150 years, greeting cards have tapped into and organized a shared language of love, affection, and kinship, becoming an integral part of American life and culture. Sumptuously illustrated, A Token of My Affection follows the evolution of the modern greeting card industry from a traditional printing and stationery business in the mid-nineteenth century to the multibillion-dollar industry it is today. Blending archival research in business history with a study of surviving artifacts and a literary analysis of a range of relevant texts and primary sources, Barry Shank demonstrates how greeting cards have affected and defined experiences of status, longing, desire, social connectedness, and love. Fascinating and surprising, A Token of My Affection shows what an industry devoted to emotional sincerity means for the lives of all Americans.

**Lacé Greeting Cards** Melanie Hendrick, 2003 Melanie Hendricks shows how to make inspirational cards for all occasions using this new technique - its name Lace[registered] meaning to lace together in French. The technique involves making a pattern of cuts using templates. In a series of step-by-step projects Melanie decorates Lace[registered] cards using rubber stamps, coloured papers, beads, punch cuts and more. In the final project Melanie creates a clever concertina card. This book will appeal to all those who love to cut, punch, fold, weave and stamp paper!

*Collaboration and Co-creation* Gaurav Bhalla, 2010-11-02 Today's consumers are more knowledgeable, networked, and vocal. For them consumption is not merely an act of buying products and services, but an expression of their creative potential. Consequently, they are demanding a say and a voice in how companies conceive, develop, and deliver value to them. It is not surprising, therefore, to hear that a large number of companies are transforming how they innovate—not only in terms of developing new products and services, but in how they are created, delivered, and supported to customers. Open Innovation thinking, where companies collaborate with suppliers, distributors, and customers to co-create unique value, is fast replacing traditional thinking that viewed innovation as a proprietary activity and marketing as a static, one-way broadcast. However, while there is significant advocacy and buy-in for collaborating with customers, there is little guidance for companies on how to undertake the journey from applause and appreciation to execution. Only reading about others' success stories – Nike, Hallmark, P&G, Mozilla, etc. – is not sufficient for helping a company develop a blueprint for themselves. In *Customer Driven Innovation*, strategy and branding consultant Gaurav Bhalla presents a concrete framework to help companies systematically and effectively design and implement collaborative innovation programs with their customers that can be applied in both business-to-business and business-to-consumer contexts. The authors describe how today's technologies allow companies to create dynamic dialogues with their customers through shared networks, virtual marketing techniques, and blogs to develop deeper relationships

that reinforce brand loyalty and ultimately drive growth. They challenge traditional approaches to market research that measure customer satisfaction from a rear-window perspective, and help companies and their customers look forward instead.P>
