Cancer Genomics Katayoon Kasaian, Yvonne Y. Li, Steven J.M. Jones, 2013-11-21 Advances in high-throughput sequencing technologies have enabled cost-effective sequencing of a single human genome at an unprecedented rate, facilitating scientific endeavours never imagined possible before. These improvements have transformed the field of cancer genomics, allowing the complete molecular characterization of individual cancer genomes. However, the promise of unveiling the complexity of cancer has lent itself to yet another level of complexity, the task of managing and integrating the massive amount of data that is generated as part of such experiments. There is a need to manage and store large sequence datasets such that they can be accessed and shared readily but, more importantly, there is a need for their thorough and efficient analysis. Developments and improvements in computer hardware and processing power have eliminated the data storage and access issues. Additionally, bioinformatic algorithms and software, designed specifically for the analysis of cancer genomic data, are now able comprehensively to profile the mutations in a cancer sample, to provide a probability score for their role as disease drivers and to identify potential actionable targets. Although the functional validation of putative driver mutations will remain a necessity, continued improvements in sequencing technologies and analysis tools promise to provide increasingly reliable computational analysis of cancer genomes.

Central Nervous System Metastases Manmeet Ahluwalia, Philippe Metellus, Riccardo Soffietti, 2019-11-05 This book provides a comprehensive overview of brain metastases, from the molecular biology aspects to therapeutic management and perspectives. Due to the increasing incidence of these tumors and the urgent need to effectively control brain metastatic diseases in these patients, new therapeutic strategies have emerged in recent years. The volume discusses all these innovative approaches combined with new surgical techniques (fluorescence, functional mapping, integrated navigation), novel radiation therapy techniques (stereotactic radiosurgery) and new systemic treatment approaches such as targeted- and immunotherapy. These combination strategies represent a new therapeutic model in brain metastatic patients in which each medical practitioner (neurosurgeon, neurologist, medical oncologist, radiation oncologist) plays a pivotal role in defining the optimal treatment in a multidisciplinary approach. Written by recognized experts in the field, this book is a valuable tool for neurosurgeons, neuro-oncologists, neuroradiologists, medical oncologists, radiation oncologists, cognitive therapists, basic scientists and students working in the area of brain tumors.

No Is Short for Next Opportunity Martin Limbeck, 2014-11-18 "This outstanding book goes straight to the heart of successful selling, showing you how to develop unshakable self-confidence in every sales situation" (Brian Tracy, author of *Ultimate Sales Success*). "A no does not mean that you should give up," argues sales maven Martin Limbeck. "On the contrary, a no means you should keep at it." Selling is easy if you can offer the lowest price or a top brand that everyone wants. But what if you don't? What if the client says no? In sales, rejection comes with the territory. You will hear no, and you will hear it frequently. It's normal. What's important is what you do with that no . . . The right attitude toward selling is your key to success. Passion, pride, and perseverance are your most important assets. No Is Short for Next Opportunity will inspire you to develop the proper mindset for selling and to seal more deals. "This book is not an option for anyone who has ever heard the word "no"—buy it and read it today and start getting 'yes' tomorrow." —Jeffrey Gitomer, author of *The Little Red Book of Selling* "This book will keep you going and growing throughout your career. I recommend it." —Mark Sanborn, author of *The Fred Factor* and *You Don't Need a Title to Be a Leader* "This book is bigger than sales. It's a book about lifelong success. Your success." —Randy Gage, author of the New York Times-bestseller *Risky Is the New Safe* "Read Martin Limbeck's book and you will learn how to get past the no and realize your true potential." —Ron Karr, author of *Lead, Sell or Get Out of the Way* "Compelling, complete, and courageous, this book will show you how to sell successfully to others and how to overcome the objections of even your most important client—you. I got new ideas and a new sense of hope from the very first page!" —Monica Wofford, CSP, CEO, Contagious Companies Inc. and author of *Make Difficult People Disappear*

The Dead Man in the Bunker Martin Pollack, 2009-05-07 In 1947, a man is found shot to death in an old military bunker near the Brenner Pass that links Italy to Austria. His papers claim him to be a farm labourer; the scars on his face could only have come from duelling, the mark of a man who was once a member of a German student fraternity. He is Dr. Gerhard Bast, lawyer, athlete, former head of the Gestapo in the Austrian city of Linz and a wanted war criminal. A few years before, his affair with a married woman led to the birth of a son, Martin Pollack, who in his maturity sets out to discover the truth about his father. Martin Pollack reveals that his loving grandparents, with whom he spent long and happy holidays as a child, were ardent and unrepentant Nazis who never ceased to hate and resent Jews and Slavs, and never acknowledged what their son had really done. And what he did is the heart of this book, as Pollack quietly, relentlessly reconstructs the family history, moving from present-day Slovenia – where his grandparents were involved in vicious sectarian strife with their Slav neighbours – through Austria between the wars, where the family were enthusiastic members of the illegal Nazi party. Once war begins in 1939, Pollack tracks his father from Austria to Poland and on into Russia, where he was the head of an Einsatzgruppe, a killing squad, and back into Poland during the Warsaw Uprising of 1944. The closing months of the war find him rounding up Jews and partisans in Slovakia. In every place that Pollack's father has been, the evidence of mass murder mounts higher and higher, the undeniable evidence impossible to resist.--BOOK JACKET.

Conflict Transformation and Social Change in Uganda Susanne Buckley-Zistel, 2008-09-11 Drawing on the concept of hermeneutics the book argues that the successes and setbacks of conflict transformation in Teso can be understood through analyzing the impact of memory, identity, closure and power on social change and calls for a comprehensive effort of dealing with the past in war-torn societies.

Die wichtigsten Briefpartner in diesen zweieinhalb Jahren waren die Baseler Kunstsammlerin und Malerin Emilie Linder, Brentanos

letzte Liebe, und der aus Wien stammende Historienmahler Edward Steinle. Brentanos letzter Wunsch, Steinle durch einen Ruf König Ludwigs I. nach München zu holen, scheiterte trotz aller Bemühungen, auch von Seiten Emilie Linders.

Beyond the Cyborg Margret Grebowicz,Helen Merrick,2013-06-18 Feminist theorist and philosopher Donna Haraway has substantially impacted thought on science, cyberculture, the environment, animals, and social relations. This long-overdue volume explores her influence on feminist theory and philosophy, paying particular attention to her more recent work on companion species, rather than her Manifesto for Cyborgs. Margret Grebowicz and Helen Merrick argue that the ongoing fascination with, and re-production of, the cyborg has overshadowed Haraway's extensive body of work in ways that run counter to her own transdisciplinary practices. Sparked by their own personal adventures with Haraway's work, the authors offer readings of her texts framed by a series of theoretical and political perspectives: feminist materialism, standpoint epistemology, radical democratic theory, queer theory, and even science fiction. They situate Haraway's critical storytelling and risky reading practices as forms of feminist methodology and recognize her passionate engagement with naturecultures as the theoretical core driving her work. Chapters situate Haraway as critic, theorist, biologist, feminist, historian, and humorist, exploring the full range of her identities and reflecting her commitment to embodying all of these modes simultaneously.

Innovation Beyond Technology Sébastien Lechevalier,2019-08-02 The major purpose of this book is to clarify the importance of non-technological factors in innovation to cope with contemporary complex societal issues while critically reconsidering the relations between science, technology, innovation (STI), and society. For a few decades now, innovation—mainly derived from technological advancement—has been considered a driving force of economic and societal development and prosperity. With that in mind, the following questions are dealt with in this book: What are the non-technological sources of innovation? What can the progress of STI bring to humankind? What roles will society be expected to play in the new model of innovation? The authors argue that the majority of so-called technological innovations are actually socio-technical innovations, requiring huge resources for financing activities, adapting regulations, designing adequate policy frames, and shaping new uses and new users while having the appropriate interaction with society. This book gathers multi- and trans-disciplinary approaches in innovation that go beyond technology and take into account the inter-relations with social and human phenomena. Illustrated by carefully chosen examples and based on broad and well-informed analyses, it is highly recommended to readers who seek an in-depth and up-to-date integrated overview of innovation in its non-technological dimensions.
