Rise of the Lioness Bradley Hague,2016 More than a story about one brave lion, this book offers an introduction to life science by looking at the workings of an ecosystem, the methods of scientists and environmentalists, and the interconnection between the plant, animal, and human systems.

The Lion Craig Packer,2023-03-28 An authoritative, accessible, and gorgeously illustrated exploration into the lives of these remarkable animals Lions are the only social cat. They hunt together, raise cubs together, and defend territories together against neighbors and strangers. Lions also rest atop their ecological pyramid, with profound impacts on competitors and prey alike, but their future is far from assured. Craig Packer interweaves his discoveries from more than forty years of research—including a substantial body of new findings—to provide an unforgettable portrait of the African lion. He shares insights into the intricacies of lion life from birth until death and describes efforts to conserve lions in an increasingly crowded continent. With a wealth of breathtaking photographs by Daniel Rosengren, The Lion sheds light on a host of intriguing scientific questions, such as why males have manes, why lions are social, how sociality limits and stabilizes lion populations, how close inbreeding affects lion health, why lions become man-eaters, how lions and people can best be protected from each other, and how to ensure the lion's survival into the next century. Engagingly written by the world's foremost expert on African lions Integrates a wealth of findings from two of the most comprehensive field studies on any animal Features hundreds of stunning photographs that capture a broad range of lion behaviors, ecological interactions, and conservation challenges Blends vivid field anecdotes and graphics to give the reader a sense of adventuring into the lion's world

The Photo Ark Joel Sartore, 2017 This book of photography represents National Geographic's Photo Ark, a major cross-platform initiative and lifelong project by photographer Joel Sartore to make portraits of the world's animals -- especially those that are endangered. His message: to know these animals is to save them. Sartore intends to photograph every animal in captivity in the world. He is circling the globe, visiting zoos and wildlife rescue centers to create studio portraits of 12,000 species, with an emphasis on those facing extinction. He has photographed more than 6,000 already and now, thanks to a multi-year partnership with National Geographic, he may reach his goal. This book showcases his animal portraits: from tiny to mammoth, from the Florida grasshopper sparrow to the greater one-horned rhinoceros. Paired with the prose of veteran wildlife writer Douglas Chadwick, this book presents an argument for saving all the species of our planet.

Mystery of the White Lions Linda Tucker, 2010-06-01 The inspiring firsthand account of one woman's journey into African shamanism and the mysteries of the most sacred animal on the continent: the legendary White Lion In 1991, Linda Tucker was rescued from a pride of lions in the Timbavati game region by a medicine woman known as the "Lion Queen." So began Linda's lifelong journey into the wisdom and ceremonies of Old Africa, in which humans and lions are able to cross the species barrier. Such knowledge is in accordance with the most guarded secrets of Ancient Egypt and humankind's greatest riddle, the Sphinx. Scientists in our day have established that humankind's most significant evolutionary leap occurred as a result of our ancestors' interaction with great cats. The White Lion is a genetic rarity within *Panthera leo*, and occurred in just one region on Earth: Timbavati. Today, White Lions form the center of the notorious "canned" trophy-hunting industry—hand-reared captive lions, shot in enclosures for gross sums of money. By contrast, shamans believe that killing a "lion sun god" is the ultimate sacrilege. How the human species treats such precious symbols of God in nature may determine how nature treats the human species. Whether we view them as prophetic "Lions of God" or simply as rare genetic mutations, the story of the White Lions is a true legend unfolding in our own extraordinary times. Inspiring, captivating, and thoroughly researched, *Mystery of the White Lions* is an unforgettable portrait of these magnificent beasts and of the overwhelming love that has driven Linda's every action to save them. "Through understanding the White Lion we will understand ourselves and our great role in the chain of being." —Deepak Chopra

The Last Lions , 2011-02-15 A symbol of mythic potency, the African lion has ruled the human imagination for millennia. But in Botswana's Okavango Delta, the world's most awe-inspiring hunters are challenged not only by their waterlogged territory, but also by their formidable prey—the buffalo—who wield their massive horns with deadly accuracy. Pulsing with ancient rhythms of wild Africa, this harsh and eternal struggle is compelling, powerful, and poignant. Award-winning filmmakers and National Geographic Explorers-in-Residence Beverly and Dereck Joubert, give us an unforgettable glimpse of this iconic drama in the official companion book to their feature film, *The Last Lions*, and warn that due to declining numbers of lions in the wild, it may soon end forever. In fascinating text and breathtaking images, the Jouberts reveal both the beauty and danger of the Okavango Delta and its inhabitants. We follow a lone lioness, Ma di Tau—Mother of Lions—and three newborns as they flee a ferocious rival pride. Braving the Delta, despite their instinctive hatred of water, the lioness and her cubs head for an island lost in a labyrinth of streams. She and two cubs escape successfully; a lurking crocodile snatches the third. Soon, their refuge is invaded by a vast buffalo herd—aggressive, unafraid, a constant threat, yet the lions' only prey. But even as Ma di Tau hones her tactics and stalking skills, she is trapped between throngs of buffalo and a rival lion pride. So she does what all of her kind must—adapt or die. *The Last Lions* is a story of family and hope in a world of wild beauty and relentless predation that is a superbly photographed, sharply detailed intimate portrait of one dauntless mother struggling to protect her young and preserve her bloodline. It is a vivid, universal vision of the fate of lions everywhere, isolated on tiny islands amid a sea of humanity. Can we rescue them, or have we already, heedlessly, met the last lions? For decades the Jouberts have lived among great cats in the wild, observing, documenting,

and often discovering unsuspected facets of lion behavior. A key message is that the inexorably rising tide of human population will soon drown what remains of that world unless we act now. The book draws attention to the numbers (500,000 in the 1950s to only 25,000 lions today) and highlights projects that have been enacted to help preserve wilderness for lion habitat.

The Biology and Conservation of Wild Felids David Macdonald, Andrew Loveridge, 2010-06-03 The editors utilize their 50 years of combined experience in professional engagement with the behaviour and ecology of wild felids to draw together a unique network of the world's most respected and knowledgeable experts. For the first time, this inter-disciplinary research programme is brought together within a single volume. Beginning with a complete account of all 36 felid species, there follow 8 comprehensive review chapters that span all the topics most relevant to felid conservation science, including evolution and systematics, felid form and function, genetic applications, behavioural ecology, management of species that come into conflict with people and control of international trade in felid species, conservation tools/techniques, ex situ management, and felid diseases. 19 detailed case studies then delve deeply into syntheses of the very best species investigations worldwide, written by all the leading figures in the field. These chapters portray the unique attributes of the wild felids, describe their fascinating (and conflicting) relationship with humans, and create an unparalleled platform for future research and conservation measures. A final chapter analyses the requirements of, and inter-disciplinary approaches to, practical conservation with cutting-edge examples of conservation science and action that go far beyond the cat family.

The White Lions of Timbavati Chris McBride, 2014 The author was a wildlife manager at Timbavati, a Transvaal game reserve. He made a significant study of white lions, a unique and endangered species.

Babylon's Ark Lawrence Anthony, Graham Spence, 2007-03-06 The astonishing story of the soldiers, conservationists, and ordinary Iraqis who united to save the animals of the Baghdad Zoo When the Iraq war began, conservationist Lawrence Anthony could think of only one thing: the fate of the Baghdad Zoo, caught in the crossfire at the heart of the city. Once Anthony entered Iraq he discovered that hostilities and uncontrolled looting had devastated the zoo and its animals. Working with members of the zoo staff and a few compassionate U.S. soldiers, he defended the zoo, bartered for food on war-torn streets, and scoured bombed palaces for desperately needed supplies. Babylon's Ark chronicles Anthony's hair-raising efforts to save a pride of Saddam's lions, close a deplorable black-market zoo, run ostriches through shoot-to-kill checkpoints, and rescue the dictator's personal herd of Thoroughbred Arabian horses. A tale of the selfless courage and humanity of a few men and women living dangerously for all the right reasons, Babylon's Ark is an inspiring and uplifting true-life adventure of individuals on both sides working together for the sake of magnificent wildlife caught in a war zone.
