Buehler's Backyard Boatbuilding George

Buehler,1991-01-05 Everybody has the dream: Build a boat in the backyard and sail off to join the happy campers off Pogo Pogo, right? But how? Assuming you aren't independently wealthy, if you want a boat that's really you, you gotta build it yourself. Backyard boatbuilding has its problems. Building in fiberglass is itchy, smelly, and yields a product that yachting maven L. Francis Herreshoff once called frozen snot. Ferrocement, once all the rage, has pretty much sunk from favor, if you catch the drift. But there's still wood, right? Ah, wood. Nature's perfect material. You can build in the time-honored traditions of the Golden Age of Yachting, loving crafting intricate joints in rare tropical hardwoods, steaming swamp oak butts to sinuous shapes, holding the whole thing together with nonferrous fastenings that cost a buck or better each. Does that sound like boatbuilding for everyperson? What about the currently fashionable wood/epoxy boatbuilding? You butter regular old wood with Miracle Whip, stick it together in the shape of a boat, and off you go, right? Epoxy works, but They don't exactly give it away; nor is it exactly a benign substance. Suiting up like Homer Simpson heading for a fun-filled day at the nuclear power plant isn't exactly the aesthetic boatbuilding experience many of us are looking for. Where does that leave us? In the capable hands of George Buehler, who honors the timeless traditions of the sea all right, but those from the other side of the boatyard tracks. Buehler draws his inspiration

from centuries of workboat construction, where semiskilled fishermen built rugged, economical boats from everyday materials in their own backyards, and went to sea in them in all kinds of weather, not just when it was pleasant. Buehler's boats sail on every ocean and perform every task, from long-term liveaboards in Norwegian fjords to a traveling doctor's office in Alaska. This book contains complete plans for seven cruising boats--from a 28-foot sailboat to a 55-foot power cruiser. All the information you need is here, including step-by-step instructions honed by nearly 20 years of supplying boat plans to backyard builders--and helping them out when they get into trouble. Buehler is anarchic, heretical, and occasionally profane; his book is West Coast counterculture meets traditional hardchine workboat construction, leavened with hardnosed common sense and penny-pinching economy. This book is for those who look around them and see that much of what is done in the world today--whether in yachting or politics or economics or interpersonal relationships--is based not on logic but on conforming and meeting other people's expectations. This book is most definitely NOT about either. It is about the realization of dreams. If you believe that everyone who wants a cruising boat can have one . . . If you see beauty beneath the fish scales and work scars of a commercial fishing boat . . . If you want to build a simple, rugged, economical, good-looking cruising boat--power or sail--using everyday lumberyard materials and few skills other than perseverance, this is the book for you. Buehler's

Backyard Boatbuilding tells you how to build extraordinary boats using the most ordinary skills and materials, with complete plans, instructions, and specifications for seven real cruising boats ranging from a 28-foot sailboat to a 55-foot power cruiser. Build wooden boats the Buehler way, which is to say inexpensively, yet like the proverbial brick outhouse.--WoodenBoat Richly flavored with personal advice and anecdotes as well as a wealth of valuable information.--American Sailing Association Everyone will revere this book.--The Ensign

Deception Point Dan Brown, 2019-07-30 From the #1 New York Times bestselling author of *The Da Vinci Code*, *Angels & Demons*, and *Inferno* and the “master of smart thrills” (People) comes a “rocket-fast thriller” (Vince Flynn) about an astonishing NASA discovery that unravels a deadly conspiracy that leads all the way to the White House. When a NASA satellite spots evidence of an astoundingly rare object buried deep in the Arctic ice, the floundering space agency proclaims a much-needed victory—one that could have profound implications for US space policy and the impending presidential election. With his re-election hanging in the balance, the President sends White House Intelligence analyst Rachel Sexton to the Milne Ice Shelf to verify the authenticity of the find. Accompanied by a team of experts, including the charismatic academic Michael Tolland, Rachel uncovers the unthinkable: evidence of scientific trickery. Before she can contact the President, she and Michael are attacked by a deadly team of assassins controlled by a mysterious power broker who will stop at nothing to hide the truth. Fleeing for their lives in an environment as desolate as it is lethal, their only hope for survival is to find out who is behind this masterful ploy. The truth, they will learn, is the most shocking deception of all in this “taut, fast-paced, barn-burner of a book” (St. Petersburg

Times).

Dangerous Moves Coco Fusco, 2015-11-17 The society, politics and future of Cuba are high on the world's agenda in the 21st century. Published in association with the Absolut Art Award, Dangerous Moves presents a fascinating survey of contemporary life and culture in Cuba through some of its most daring and experimental artists. Coco Fusco analyses the ways in which the regime has wielded influence over artists in recent times, showing how - in a context in which overt political speech is subject to censorship - the language of performance has emerged as the favoured means of social commentary. Focusing on a range of performative practices in visual art, music, poetry and political activism, Fusco examines the relationship between the abject body in performance and the greater body politic of a state officially defined as revolutionary yet seeking to limit and constrain dissent. A major new piece of scholarship from a global artist, writer and thinker, this is a key addition to the

canon of contemporary art writing, and will be essential reading for students and scholars as well as those with a broader interest in politics, power and contemporary art.--Publisher's description.

Being The Other Woman Micalle A. Culver, 2012-02
In 2002, Micalle was swept off her feet by a man who spoke rapturous words to her heart, whisked her away to exotic locations, and made her laugh to no end. Like kindred souls, the two connected instantly, leading to a euphoric romance. The catch: He's married. As one promise after another was broken, the storybook love affair began to unravel. Wrought with confusion, Micalle set out to discover how she could have allowed passion to overrule logic and wondered about the likelihood of their situation resulting in happily-ever-after. The other woman, Micalle discovered, walks into an affair blind and leaves wishing she were. Worse, there is hardly a book on the shelf to comfort her, awaken her, or better yet; stop her from making a disaster of her life. Finding little material to glean from, Micalle began asking her own questions. What she found was that her experience wasn't entirely unique. This epitome led to several years of research into the triangle of affairs and who the other woman really is. *Being the Other Woman* was written to illuminate her path. In sometimes humorous but often painful detail, Micalle gives the raw story of her own affair, countless interviews from women who became mistresses, and research into the psychology of the other woman and the man who cheats. What is really going on in the mind of the mistress? Her lover? His wife? *Being the Other Woman* will help the reader identify in what type of affair the

other woman is involved and provide guidance as to whether or not the husband will really leave his wife, how to make smart relationship decisions, and how to heal from the tremendous pain one is bound to experience either by being the other woman or having one in your life.

A History of Experimental Film and Video A.L. Rees, 2019-07-25 Avant-garde film is almost indefinable. It is in a constant state of change and redefinition. In his highly-acclaimed history of experimental film, A.L. Rees tracks the movement of the film avant-garde between the cinema and modern art (with its postmodern coda). But he also reconstitutes the film avant-garde as an independent form of art practice with its own internal logic and aesthetic discourse. In this revised and updated edition, Rees introduces experimental film and video to new readers interested in the wider cinema, as well as offering a guide to enthusiasts of avant-garde film and new media arts. Ranging from Cézanne and Dada, via Cocteau, Brakhage and Le Grice, to the new wave of British film and video artists from the 1990s to the present day, this expansive study situates avant-garde film between the cinema and the gallery, with many links to sonic as well as visual arts. The new edition includes a review of current scholarship in avant-garde film history and includes updated reading and viewing lists. It also features a new introduction and concluding chapter, which assess the rise of video projection in the gallery since the millennium, and describe new work by the latest generation of experimental film-makers. The new edition is richly illustrated

with images of the art works discussed.
