Emerging Viruses in Human Populations Edward Tabor,2006-12-19 Infectious diseases are an ever present threat to humans. In recent years, the threat of these emerging viruses has been greater than ever before in human history, due in large part to global travel by larger numbers of people, and to a lesser extent to disruptions in the interface between developed and undeveloped areas. The emergence of new deadly viruses in human populations during recent decades has confirmed this risk. They remain the third leading cause of deaths in the US and the second world-wide. Emerging Viruses in Human Populations provides a comprehensive review of viruses that are emerging or that threaten to emerge among human populations in the twenty-first century. It discusses the apprehension over emerging viruses that has intensified due to concerns about bioterrorism. * Presents the history of emerging viruses * Includes chapters on SARS, Pandemic Threat of Avian Influenza Viruses, West Nile Virus, Monkeypox Virus, Hantavirus, Nipah Virus and Hendra Virus, Japanese Encephalitis Virus, Dengue and Crimean-Congo Hemorrhagic Fever Viruses * Discusses surveillance for newly emerging diseases

Fried Brains and Micro Chips Haze Diamond,2018-07-29 Driven from her home by computer virus infected zombies, guided by her recently deceased father's mysterious last will and testament, Destry, Weasel and her father's slightly brain damaged solicitor Derek, set out in a London taxi on an odyssey of discovery, mayhem and wilful destruction of property. On their travels to get to London to put things right they heroically dodge death by greenhouse, tree hugger, granny, fried fairground food, poor hygiene and tinned Brussel sprouts. Will they triumph? It seems unlikely, but they have made it this far and that's a miracle in itself.....

Integrated Risk of Pandemic: Covid-19 Impacts, Resilience and Recommendations Manish Kumar Goyal,Anil Kumar Gupta,2020-10-31 In light of the novel corona virus outbreak in December 2019 and its subsequent impact on entire world as a global pandemic, the book attempts to provide integrated risk assessment on Covid -19 like pandemics, as well as to understand the societal, environment and economic impact of the outbreak in various sectors of development. It covers fundamental factors of global disease outbreaks and its coverage as major disaster through the complexity and severity of consequences, illustrating the dimensions of low frequency high intensity disasters. It brings together broad range of topics including basic concepts, isolation measure, role of governance and key technical advancements for containing the diseases. In addition, it also covers resilience analysis towards the impacts such outbreaks have on bio-diversity, ecosystem services and agricultural food production. It defines key exit strategies from the lessons learned and success stories of historical disease outbreaks. The book is presented in four parts, where part 1 familiarizes with fundamentals; part 2 focuses on integrated risk assessments; part 3 focuses on various measures and strategies of resilience; and part 4 suggests key lessons and recommendations. The book is a useful reading reference for scientific community, policy makers and professionals across the domains of health, environment, disasters and sustainable development. Book is specifically beneficial for postgraduate students, researchers, planners and field professionals.

Inquiry into the Singapore Science Classroom Aik-Ling Tan,Chew-Leng Poon,Shirley S.L. Lim,2014-05-19 This book offers an insight into the research and practices of science teaching and learning in the Singapore classroom, with particular attention paid to how they map on to science as inquiry. It provides a spectrum of Singapore's science educational practices through all levels of its education system, detailing both successes and shortcomings. The book features a collection of research and discourse by science educators in Singapore, organized around four themes that are essential components of approaching science as inquiry: teachers' ideas and their practices, opportunities and constraints from a systemic level, students' competencies and readiness to learn through inquiry and the need for greater awareness of the role of informal learning avenues in science education. In addition, the discourse within each theme is enriched by commentary from a leading international academic, which helps to consolidate ideas as well as position the issues within a wider theoretical and international context. Overall, the papers set out important contexts for readers to understand the current state of science education in Singapore. They also highlight strengths and gaps in practices of science as inquiry as well as provide suggestions about how the system can be improved. These research findings are therefore helpful as they provide honest and evidence-based feedback as well as tangible and doable ideas that policy makers, teachers, students and school administrators can adopt, adapt and enhance.

Contact Lens Complications E-Book Nathan Efron,2018-11-01 In this thoroughly updated fourth edition, award-winning contact lens author, lecturer, and researcher, Professor Nathan Efron, presents an easily accessible, systematic account of how to identify, understand, and manage contact lens complications. Professor Efron is renowned for his ability to distil often-complex principles of ocular physiology and pathology into a clinically-friendly format. The subject matter is arranged logically by tissue structure – which is the way practitioners naturally approach clinical problems. Beautifully presented and lavishly illustrated with full-color schematic diagrams and clinical pictures, this book can serve as both a practical chair-side manual and authoritative reference. Thoroughly revised, capturing the latest advances and concepts in contact lens related ocular pathology. Updated ‘Complications quick-find index’ at the beginning of the book, constituting a valuable practitioner aid to formulating a rapid diagnosis and treatment plan, and serving students as a useful examination study aid. Incorporates findings from the Dry Eye Workshop II (DEWS II) and the International Workshops on Meibomian Gland Dysfunction and Contact Lens Discomfort. Two new chapters – Lid Wiper Epitheliopathy and Lid-Parallel Conjunctival Folds. Over 1,500 references cited as the basis of a thorough evidence-based approach. 60 superb new clinical pictures and schematic diagrams, making over 650 in total. Grading scales for 16 contact lens complications, making this the most comprehensive and widely-used grading system available today. Grading morphs computer program as a computer-based aid to assessing condition severity. Self-help grading tutor computer program to help you hone your grading skills. Pictorial tear film classification system.

Making of Southeast Asia Amitav Acharya,2003-08-01 Amitav Acharya has written a splendidly ambitious book. Travelling from the discipline of International Relations to the historiography of Southeast Asia and back again, it draws upon a range of methodologies to analyse the issue of identity in the configuration of Southeast Asia. But it provides more than an academic assessment. With this book, Acharya must be judged to have contributed not just to the study of Southeast Asian regionalism, but to the process itself. - Anthony Milner, Basham Professor of Asian History, Australian National University

Fools' Gold Nicholas Hagger,2022-12-09 In Fools’ Paradise Nicholas Hagger presented the UK’s attempt to leave the EU under Prime Minister Theresa May in terms of the voyage of Sebastian Brant’s 1494 Ship of Fools heading with a mutinous crew for the illusory, nonexistent paradise of Narragonia. His mock-heroic satirical poem on the political chaos surrounding the most important UK decision since the Second World War is in rhymed heroic couplets, in the tradition of Dryden and Pope. In this sequel, Fools’ Gold, Hagger focuses on the beginning of Boris Johnson’s premiership, the promises that won him the 2019 General Election with an 80-seat majority, and his removal of the UK from the EU, only to be engulfed by the deadly Covid pandemic which has devastated the UK economy. Hagger describes the catastrophic national events in heroic blank verse, which befits the darkening mood. The UK public has been promised a new Golden Age, an age of plenty, and it remains to be seen whether there will be prosperity for all - gold - now that the UK is facing colossal debt outside the EU, or whether the promises will turn out to be worthless iron pyrites: fools’ gold.

Kanski's Clinical Ophthalmology E-Book John F. Salmon,2019-10-31 Through eight outstanding editions, Kanski’s Clinical Ophthalmology has been the classic specialty textbook, providing the perfect ophthalmology foundation for trainees and a valuable reference source for experienced practitioners. Building on the previous edition by Dr. Brad Bowling, Dr. John Salmon from Oxford University has comprehensively revised the textbook. The 9th Edition retains Dr. Kanski’s highly effective format of succinct text and visually dynamic presentation, providing authoritative, focused guidance on the diagnosis and management of ophthalmic disorders. Extremely well organized and comprehensive in scope, this visually stunning book reflects the latest advances in the field, facilitating quick comprehension to enhance learning, aid exam preparation and guide clinical practice. As a general ophthalmic textbook, this is the gold standard. Uses targeted text, bulleted lists, tables, and visual aids to highlight salient points across all ophthalmology subspecialties. Includes 2,600 illustrations, including more than 1,000 new images of common and rare conditions and arrows to show the exact pathology. Features detailed updates on new therapeutic interventions for neurological disease and ocular tumours; new imaging techniques such as OCT, OCT angiography, and MRI; and new topics such as circadian rhythms, graft vs host disease and the effects of Ebola virus infection on the eye. Presents examination techniques in a new, separate chapter and contains new tips on key issues in every chapter. Provides up-to-date information on hot topics such as intravitreal treatment with anti-VEGF agents for macular disease, genetic advances in hereditary retinal dystrophies, the use of biological agents in the treatment of uveitis and scleritis and new surgical advances such as MIGS for glaucoma and limbal stem cell grafting.
