**Data and Mobility** Julia Düh,Hartwig Hufnagl,Erhard Juritsch,Reinhard Pfliegl,Helmut-Klaus Schimany,Hans Schönegger,2010-09-08 Over the last few years, the local value of mobility and information in our society has grown tremendously. As the importance of Information and Communication Te-nologies (ICT) increases, we expect more changes in future mobility behavior. This includes not only mobility behavior for the single user, but also for

the transportation of goods and infrastructure operators. It will also affect the regulation of resources and political decision-making. Both, data and mobility become more connected. To cope effectively with the anticipated changes, we must expand our focus and take current developments in both areas into account. The topic of the Lakeside Conference 2010, Data and Mobility – Transforming Information into Intelligent Traffic and Transportation Services, was chosen to underline the importance of information and mobility in transport and to offer an opportunity to discuss and question current activities in this sector. We will consider intermodal concepts and deployments in particular, where data transfer plays a major role, as this could help to reduce the current lack of infrastructure capacity (especially on roads and at airports and seaports). Using modern technologies, traffic mana- ment could become more sustainable and efficient. The Lakeside Conference is, again, organized by a consortium composed of the Lakeside Technology Park, the Austrian Transport Telematic Cluster, AustriaTech and the American Embassy in Austria.

*Linked Data in Linguistics* Christian Chiarcos,Sebastian Nordhoff,Sebastian Hellmann,2012-02-21 The explosion of information technology has led to substantial growth of web-accessible linguistic data in terms of quantity, diversity and complexity. These resources become even more useful when interlinked with each other to generate network effects. The general trend of providing data online is thus accompanied by newly developing methodologies to interconnect linguistic data and metadata. This includes linguistic data collections, general-purpose knowledge bases (e.g., the DBpedia, a machine-readable edition of the Wikipedia), and repositories with specific information about languages, linguistic categories and phenomena. The Linked Data paradigm provides a framework for interoperability and access management, and thereby allows to integrate information from such a diverse set of resources. The contributions assembled in this volume illustrate the band-width of applications of the Linked Data paradigm for representative types of language resources. They cover lexical-semantic resources, annotated corpora, typological databases as well as terminology and metadata repositories. The book includes representative applications from diverse fields, ranging from academic linguistics (e.g., typology and corpus linguistics) over applied linguistics (e.g., lexicography and translation studies) to technical applications (in computational

linguistics, Natural Language Processing and information technology). This volume accompanies the Workshop on Linked Data in Linguistics 2012 (LDL-2012) in Frankfurt/M., Germany, organized by the Open Linguistics Working Group (OWLG) of the Open Knowledge Foundation (OKFN). It assembles contributions of the workshop participants and, beyond this, it summarizes initial steps in the formation of a Linked Open Data cloud of linguistic resources, the Linguistic Linked Open Data cloud (LLOD).

**Communicating In A Digital World** Aristotle T. Lekacos,2010-03-31 You are about to embark on a journey. In some respects it will be similar to ones taken by other pioneers and innovators in the past. Your journey may begin with excitement and trepidation. As you continue and persevere you will discover new things and most importantly will feel a sense of accomplishment and self-improvement. There will be times along the journey when you believe that you cannot possibly go any further. You will push yourself and lo and behold you will realize that you have discovered and learned so much more then you imagined. You will be changed forever! #13; Change is taking place everywhere and will proceed whether we are for or against it. Just as the acoustic telegraph (telephone) replaced the electric telegraph, the incandescent lamp replaced gas lighting, wireless methods superseded wired technologies; the turbines eventual replacement of the horse, the aircraft the train, the email the mailed letter to name just a few changes in our recent history. In all cases these changes were not overnight phenomena but ones that took time. Slowly the practitioners changed, the users switched and the infrastructure transitioned and then the process repeated itself. This is civilization advancing; beginning with a technological innovation, then a 'marketing' of the technology to define its benefits and most importantly the subsequent preparation of society for its eventual deployment. The only certainty is uncertainty. Our position on the merits of the change must be based on our knowledge and not hearsay.#13; As you embark on this journey of enlightenment you may encounter resistance from others. As with all innovation and transitional periods? naysayers, especially and perhaps surprisingly from within the field, will state why the new approach is inadequate, insufficient, incapable, not going to work and so forth. In business this denial to consider the need for possible change is called 'Core Rigidity'. Why the term 'Core Rigidity'? Rigidity - because individuals refuse to consider any change or revision and want the status quo to remain. Core - because most of these individuals are experts in the field and have years of experience in the existing environment, their specific knowledge is based on the current processes and most importantly if the change does comes to pass their skill sets will be negated hence the term core rigidity.#13; Some say it is human nature to discount new methodology, new theories, new approaches, new ideas; to paraphrase a common quote ?If it?s not broken don?t fix it?. I say where would we be today if all of our ancestors had thought that way? Despite the reluctance of incumbents change is continuous.#13; With respect to virtual communications we are approaching the societal stage; which is why I have written this book. Virtual communications will eventually replace the current mode of distance contact. Communicating and meetings will be forever changed. It is my intention to provide the information and knowledge to empower you to successfully join this new and exciting way of communicating. I will show you how to employ and understand tools used in communicating virtually, such as Adobe Presenter, Adobe Captivate and Adobe Connect. #13; In this book I have introduced a number of new concepts that are useful in the preparation and implementation of the virtual environments and digital content.#13; Let's begin our journey to change.
