Face Jessica Helfand, 2019-11-12 An elaborately illustrated A to Z of the face, from historical mugshots to Instagram posts. By turns alarming and awe-inspiring, Face offers up an elaborately illustrated A to Z—from the didactic anthropometry of the late-nineteenth century to the selfie-obsessed zeitgeist of the twenty-first. Jessica Helfand looks at the cultural significance of the face through a critical lens, both as social currency and as palimpsest of history. Investigating everything from historical mugshots to Instagram posts, she examines how the face has been perceived and represented over time; how it has been instrumentalized by others; and how we have reclaimed it for our own purposes. From vintage advertisements for a “nose adjuster” to contemporary artists who reconsider the visual construction of race, Face delivers an intimate yet kaleidoscopic adventure while posing universal questions about identity.

The Wars of Alexander's Successors, 323-281 BC Bob Bennett, Mike Roberts, 2013-01-19 This history of Ancient Greek warfare vividly chronicles the struggle for control of the Macedonian Empire, a fateful time of change in the Ancient World. As the story goes, Alexander the Great decreed from his deathbed that his vast Macedonian Empire should go "to the strongest. What followed was an epic struggle between generals and governors for control of the territories. Most of these successors—known as the Diadochi—were consummate tacticians who learned the art of war from Alexander himself, or from his father, Philip. Few died a peaceful death and the last survivors were still leading their armies against each other well into their seventies. These conflicts reshaped the ancient world from the Balkans to India. In two volumes, *The Wars of Alexander's Successors* presents this critical period of ancient warfare with all its colorful characters, epic battles, treachery and subterfuge. This first volume introduces the key personalities, including Antigonos "Monophthalmus (the One-Eyed) and his son 'Demetrius 'Poliorcetes' (the Besieger), Seleucus 'Nicator' ('the Victorious') and Ptolemy "Soter (the Saviour). It also gives a narrative of the causes and course of these wars from the death of Alexander to the Battle of Corupedium in 281 BC, when the last two original Diadochi faced each other one final time.

The Conservation of Decorated Surfaces on Earthen

Architecture Leslie Rainer, Angelyn Bass Rivera, 2006 For millennia, people of all cultures have decorated the surfaces of their domestic, religious, and public buildings. Earthen architecture in particular has been, and continues to be, a common ground for surface decoration such as paintings, sculpted bas-relief, and ornamental plasterwork. This volume explores the complex issues associated with preserving these surfaces. Case studies from Asia, Europe, Africa, the Middle East, and the Americas are presented. The publication is the result of a colloquium held in 2004 at Mesa Verde National Park, Colorado, co-organized by the Getty Conservation Institute (GCI) and the National Park Service (NPS). The meeting brought together fifty-five conservators, cultural resource managers, materials scientists, engineers, architects, archaeologists, anthropologists, and artists from eleven countries. Divided into four themes-- Archaeological Sites, Museum Practice, Historic Buildings, and Living Traditions--the papers examine the conservation of decorated surfaces on earthen architecture within these different contexts.

Remote Sensing Handbook for Tropical Coastal Management Edmund Peter Green, 2000 The Handbook provides a detailed evaluation of what can realistically be achieved by remote sensing in an operational coastal management context. It takes the user through the planning and implementation of remote sensing projects from the setting of realistic objectives, deciding which imagery will be most appropriate to achieve those objectives, the acquisition, geometric and radiometric correction of imagery, the field survey methods needed to ground-truth the imagery and guide image classification, the image processing techniques required to optimise outputs, through the image interpretation and evaluation of the accuracy of outputs. Linked to the Handbook is a computer-based remote sensing distance-learning module: Applications of satellite and airborne image data to

A Descriptive Catalogue of the Music of Charles Ives

James B. Sinclair, 1999-01-01 This catalogue of the music of Charles Ives contains 728 entries covering all of the prolific composer's works. James Sinclair's book presents information produced by recent Ives scholarship and generous commentary on each of Ives's compositions. It completes the work begun by musicologist John Kirkpatrick in 1955, when Ives's music manuscripts were deposited in the Yale Music Library. Ives's works are arranged alphabetically by title within genres. Whenever possible, each entry includes the main title and any other titles the composer may have used; the forces required; the duration; headings of movements; publication history; citation of the first known performance and first recording; the derivation of the work, listing music on which it may be modeled or from which it may borrow material; the principal literature treating the piece; and commentary on these and other matters. The catalogue also provides musical incipits for all Ives's extant works, seven appendixes (covering his work lists, 'Quality Photo' lists, his songbooks, a chronology of his life, recordings made by Ives, and his private publications and commercial publishers), three concordances, and four extensive indexes (addresses, names, titles, and musical borrowings).
