Pilot Performance in a Helicopter Simulator John

D. Waugh, 1975 Six Army helicopter pilots, instrument rated, flew a difficult precision instrument flight pattern in this Laboratory's GAT-2H helicopter simulator. For each flight, each subject was given a different combination of thrust to weight, cyclic control sensitivity and cyclic spring centering force gradient condition making up an incomplete, balanced block-type experimental design. Several error measurements were recorded during the trials; however, none could be satisfactorily utilized to predict either accuracy of performance, or be an indicator of relative workload. An unanticipated large variation of measures taken is thought to be the cause. Additional approaches and further study of the problem is recommended.

Implementing Realistic Helicopter Physics in 3D Game Environments Keith M. Perkins, 2002-09-01 The U.S. Army contracted the MOVES Institute at the Naval Postgraduate School to create a first person action game, America's Army, in support of Army strategic communication. The Army Game Project Team licensed Epic Game's Unreal game engine to produce this game. As the project progressed, the Army, realized that the game had the potential to cover a much larger scope than originally planned. Several of these add-on applications would call for the addition of realistic third person helicopter physics. Unfortunately this capability was not included in the award winning game engine nor the initial design of the game. These limitations are addressed by utilizing Unrealscript to design a physics system that interfaces with the Unreal Engine to smoothly interpolate between physics states within the bounds of helicopter capabilities, with the appearance of realism. The resultant helicopter physics

system was incorporated into a game-like interface and compared to a similar system produced with a commercial graphics system. Overall, 53% of the test subjects thought the helicopter physics were Very Realistic or Totally Realistic, and 72% found them to be better than those of the system produced on the commercial graphics system. In a follow-up study, 86% of the participants found the helicopter physics to be equal to or better than the physics of a high quality commercial 3D helicopter game (57% better).

Black Helicopters II Jim Keith, 1997

United States Civil Aircraft Register, 1964

Assessing the Effectiveness of a Low-cost Simulator for Instrument Training for the TH-67 Helicopter, 2001 The U.S. Army uses the 2B24 Synthetic Flight Training System (SFTS) for the Instrument Phase of Initial Entry Rotary Wing (IERW) training. The SFTS is an instrument simulator, mounted on a hydraulic motion platform, with no visual system. Its technology dates from the late 1960s. Its cockpit represents the UH-1, which has been replaced by the TH-67 training helicopter. The Army is concerned with the age, complexity and costs of the SFTS, at a time when PC- based simulators, like the Frasca 342 Primary Skills Trainer (PST) are available. The PST's cockpit represents the TH-67 helicopter. It has a visual display, but no motion system. Thirty-eight IEAW students were assigned to experimental (PST) or control (SFTS) groups. After 30 hr of simulator training, both groups completed 20 hr training in the TH-67. No students were eliminated or set back to later classes. Few significant differences in performance were noted, though SFTS trainees were more likely to indicate that training in the simulator had hindered performance in the aircraft. The PST seemed inferior to the SFTS in trim control. The research

demonstrated that IERW students could learn instrument skills in a simpler, more economical simulator without hydraulic controls or a motion system.--DTIC.

US-Pakistan Relationship A.Z. Hilali, 2017-07-05 Hilali provides an excellent study into the US-Pakistan partnership under the Reagan administration. The book explores the causes of Pakistan's involvement in the Afghanistan war and the United States' support to prevent Soviet adventurism. It shows that Pakistan was the principal channel through which assistance was provided to Afghan freedom fighters; it also provided access to its military bases to use against the Soviet Union. The study looks at the consequences of the war on Pakistan and explains how it became enmeshed within its domestic politics. Furthermore, it evaluates the role of Pakistan as a key partner in the global coalition against terrorism and discusses how General Pervez Musharraf brought about Pakistan's development towards a progressive, moderate and democratic society. Ideally suited to courses on foreign policy.
