Bending the Cost Curve in Health Care Gregory P. Marchildon,Livio Di Matteo,2015-01-01 Through Canadian and international perspectives, Bending the Cost Curve in Health Care explores the management of growing health costs in an extraordinarily complex arena. The book moves beyond previous debates, agreeing that while efficiencies and better value for money may yet be found, more fundamental reforms to the management and delivery of health services are essential prerequisites to bending the cost curve in the long run. While there is considerable controversy over direction and details of change, there also remains the challenge of getting agreement on the values or principles that would guide the reshaping of the policies, the structures, and the regulatory environment of health care in Canada. Leading experts from around the world representing a range of disciplines and professional backgrounds come together to organize and define the problems faced by policy-makers. Case studies from the United States, the United Kingdom, Australia, the Nordic countries, and industrialized Asian countries such as Taiwan offer useful reform experiences for provincial governments in Canada. Finally, common Canadian cost factors, such as pharmaceuticals and technology, and paying the health workforce, are explored. This book is the first volume in The Johnson-Shoyama Series on Public Policy, published by the University of Toronto Press in association with the Johnson-Shoyama Graduate School of Public Policy, an interdisciplinary centre for research, teaching, and executive training with campuses at the Universities of Regina and Saskatchewan.

Ethical Markets Hazel Henderson,Simran Sethi,2006 With insight, clarity, warmth, and enthusiasm Hazel Henderson announces the mature presence of the green economy. Mainstream media and big business interests have sidelined its emergence and evolution to preserve the status quo. Throughout Ethical Markets Henderson weaves statistics and analysis with profiles of entrepreneurs, environmentalists, scientists, and professionals. Based on interviews conducted on her longstanding public television series, these profiles celebrate those who have led the highly successful growth of green businesses around the world. Ethical Markets is the ultimate sourcebook on today's thriving green economy.

Lords of Strategy Walter Kiechel,2010-03-03 Imagine, if you can, the world of business - without corporate strategy. Remarkably, fifty years ago that's the way it was. Businesses made plans, certainly, but without understanding the underlying dynamics of competition, costs, and customers. It was like trying to design a large-

scale engineering project without knowing the laws of physics. But in the 1960s, four mavericks and their posses instigated a profound shift in thinking that turbocharged business as never before, with implications far beyond what even they imagined. In *The Lords of Strategy*, renowned business journalist and editor Walter Kiechel tells, for the first time, the story of the four men who invented corporate strategy as we know it and set in motion the modern, multibillion-dollar consulting industry: Bruce Henderson, founder of Boston Consulting Group Bill Bain, creator of Bain & Company Fred Gluck, longtime Managing Director of McKinsey & Company Michael Porter, Harvard Business School professor Providing a window into how to think about strategy today, Kiechel tells their story with novelistic flair. At times inspiring, at times nearly terrifying, this book is a revealing account of how these iconoclasts and the organizations they led revolutionized the way we think about business, changed the very soul of the corporation, and transformed the way we work.

Glass Half Full Benjamin H. Barton, 2015-05-15 The hits keep coming for the American legal profession. Law schools are churning out too many graduates, depressing wages, and constricting the hiring market. Big Law firms are crumbling, as the relentless pursuit of profits corrodes their core business model. Modern technology can now handle routine legal tasks like drafting incorporation papers and wills, reducing the need to hire lawyers; tort reform and other regulations on litigation have had the same effect. As in all areas of today's economy, there are some big winners; the rest struggle to find work, or decide to leave the field altogether, which leaves fewer options for consumers who cannot afford to pay for Big Law. It would be easy to look at these enormous challenges and see only a bleak future, but Ben Barton instead sees cause for optimism. Taking the long view, from the legal Wild West of the mid-nineteenth century to the post-lawyer bubble society of the future, he offers a close analysis of the legal market to predict how lawyerly creativity and entrepreneurialism can save the profession. In every seemingly negative development, there is an upside. The trend towards depressed wages and computerized legal work is good for middle class consumers who have not been able to afford a lawyer for years. The surfeit of law school students will correct itself as the law becomes a less attractive and lucrative profession. As Big Law shrinks, so will the pernicious influence of billable hours, which incentivize lawyers to spend as long as possible on every task, rather than seeking efficiency and economy. Lawyers will devote their time to work that is much more challenging and meaningful. None of this will happen without serious upheaval, but all of it will ultimately restore the health of the faltering profession. A unique contribution to our understanding of the legal crisis, the unconventional wisdom of *Glass Half Full* gives cause for hope in what appears to be a hopeless situation.

The Boston Consulting Group on Strategy Carl W. Stern,Michael S. Deimler,2012-06-14 A collection of the best thinking from one of the most innovative management consulting firms in the world For more than forty years, The Boston Consulting Group has been shaping strategic thinking in business. The Boston Consulting Group on Strategy offers a broad and up-to-date selection of the firm's best ideas on strategy with fresh ideas, insights, and practical lessons for managers, executives, and entrepreneurs in every industry. Here's a sampling of the provocative thinking you'll find inside: You have to be the scientist of your own life and be astonished four times:at what is, what always has been, what once was, and what could be. The majority of products in most companies are cash traps[They] are not only worthless, but a perpetual drain on corporate resources. Use more debt than your competition or get out of the business. When information flows freely, reputation, more than reciprocity,becomes the basis for trust. As a strategic weapon, time is the equivalent of money, productivity,quality, even innovation. When brands become business systems, brand management becomes far too important to leave to the marketing department. The winning organization of the future will look more like a collection ofjazz ensembles than a symphony orchestra. Most of our organizations today derive from a model whose original purpose was to control creativity. Rather than being an obstacle, uncertainty is the very engine of transformation in a business, a continuous source of new opportunities. IP assets lack clear property lines. Every bit of intellectual property you can own comes with connections to other valuable innovations.
