Bayesian Thinking in Biostatistics Gary L. Rosner, Purushottam W. Laud, Wesley O. Johnson, 2021-03-16 Praise for Bayesian Thinking in Biostatistics: This thoroughly modern Bayesian book ...is a 'must have' as a textbook or a reference volume. Rosner, Laud and Johnson make the case for Bayesian approaches by melding clear exposition on methodology with serious attention to a broad array of illuminating applications. These are activated by excellent coverage of computing methods and provision of code. Their content on model assessment, robustness, data-analytic approaches and predictive assessments...are essential to valid practice. The numerous exercises and professional advice make the book ideal as a text for an intermediate-level course... -Thomas Louis, Johns Hopkins University The book introduces all the important topics that one would usually cover in a beginning graduate level class on Bayesian biostatistics. The careful introduction of the Bayesian viewpoint and the mechanics of implementing Bayesian inference in the early chapters makes it a complete self-contained introduction to Bayesian inference for biomedical problems....Another great feature for using this book as a textbook is the inclusion of extensive problem sets, going well beyond construed and simple problems. Many exercises consider real data and studies, providing very useful examples in addition to serving as problems. - Peter Mueller, University of Texas With a focus on incorporating sensible prior distributions and discussions on many recent developments in Bayesian methodologies, Bayesian Thinking in Biostatistics considers statistical issues in biomedical research. The book emphasizes greater collaboration between biostatisticians and biomedical researchers. The text includes an overview of Bayesian statistics, a discussion of many of the methods biostatisticians frequently use, such as rates and proportions, regression models, clinical trial design, and methods for evaluating diagnostic tests. Key Features Applies a Bayesian perspective to applications in biomedical science Highlights advances in clinical trial design Goes beyond standard statistical models in the book by introducing Bayesian nonparametric methods and illustrating their uses in data analysis Emphasizes estimation of biomedically relevant quantities and assessment of the uncertainty in this estimation Provides programs in the BUGS language, with variants for JAGS and Stan, that one can use or adapt for one's own research The intended audience includes graduate students in biostatistics, epidemiology, and biomedical researchers, in general Authors Gary L. Rosner is the Eli Kennerly Marshall, Jr., Professor of Oncology at the Johns Hopkins School of Medicine and Professor of Biostatistics at the Johns Hopkins Bloomberg School of Public Health. Purushottam (Prakash) W. Laud is Professor in the Division of Biostatistics, and Director of the Biostatistics Shared Resource for the Cancer Center, at the Medical College of Wisconsin. Wesley O. Johnson is professor Emeritus in the Department of Statistics at the University of California, Irvine.

Promoting Cardiovascular Health in the Developing World Institute of Medicine, Board on Global Health, Committee on Preventing the Global Epidemic of Cardiovascular Disease: Meeting the Challenges in Developing Countries, 2010-06-29 Cardiovascular disease (CVD), once thought to be confined primarily to industrialized nations, has emerged as a major health threat in developing countries. Cardiovascular disease now accounts for nearly 30 percent of deaths in low and middle income countries each year, and is accompanied by significant economic repercussions. Yet most governments, global health institutions, and development agencies have largely overlooked CVD as they have invested in health in developing countries. Recognizing the gap between the compelling evidence of the global CVD burden and the investment needed to prevent and control CVD, the National Heart, Lung, and Blood Institute (NHLBI) turned to the IOM for advice on how to catalyze change. In this report, the IOM recommends that the NHLBI, development agencies, nongovernmental organizations, and governments work toward two essential goals: creating environments that promote heart healthy lifestyle choices and help reduce the risk of chronic diseases, and building public health infrastructure and health systems with the capacity to implement programs that will effectively detect and reduce risk and manage CVD. To meet these goals, the IOM recommends several steps, including improving cooperation and collaboration; implementing effective and feasible strategies; and informing efforts through research and health surveillance. Without better efforts to promote cardiovascular health, global health as a whole will be undermined.

Join the Club Tina Rosenberg, 2011-04-08 In the style of Nudge or The Spirit Level - a groundbreaking book that will change the way you look at the world. Tina Rosenberg has spent her career tackling some of the world's hardest problems. The Haunted Land, her searing book on how Eastern Europe faced the crimes of Communism, was awarded both the National Book Award and the Pulitzer Prize in the US. In Join the Club, she identifies a brewing social revolution that is changing the way people live, based on harnessing the positive force of peer pressure. Her stories of peer power in action show how it has reduced teen smoking in the United States, made villages in India healthier and more prosperous, helped minority students get top grades in college calculus, and even led to the fall of Slobodan Milosevic. She tells how creative social entrepreneurs are

starting to use peer pressure to accomplish goals as personal as losing weight and as global as fighting terrorism. Inspiring and engrossing, Join the Club explains how we can better our world through humanity's most powerful and abundant resource: our connections with one another.

Kevin Trudeau's Mega Memory Kevin Trudeau,1997-04-23 Do you think you have a bad memory? Impossible, says Kevin Trudeau, the world's foremost authority on memory improvement training. There are no bad memories, only untrained memories. In order to release our natural memory, Trudeau says, we just need to learn to retrieve what we already know. As founder of the American Memory Institute, Kevin Trudeau has already helped more than one million people do just that. Each Mega Memory lesson in this book takes no more than thirty minutes per day and uses pictures, rather than the laborious word-association techniques of other memory systems, to activate our inborn memory. With this easy-to-follow system, you'll be able to instantly remember names, phone numbers, addresses, financial data, speeches, and schoolwork. Even better, Trudeau's system ensures instant recall and long-term Mega Memory. All you need is the desire to unleash your Mega Memory, and you can reap all these incredible rewards! Labeled with a learning disability at an early age, Kevin Trudeau was convinced his problem was an inability to recall information. He read everything he could on memory improvement. Eventually, he developed his own program for memory retrieval and formed the American Memory Institute. His Mega Memory home study system is the most utilized self-improvement series of all time.

Good Economics for Hard Times Abhijit V. Banerjee,Esther Duflo,2019-11-12 The winners of the Nobel Prize show how economics, when done right, can help us solve the thorniest social and political problems of our day. Figuring out how to deal with today's critical economic problems is perhaps the great challenge of our time. Much greater than space travel or perhaps even the next revolutionary medical breakthrough, what is at stake is the whole idea of the good life as we have known it. Immigration and inequality, globalization and technological disruption, slowing growth and accelerating climate change--these are sources of great anxiety across the world, from New Delhi and Dakar to Paris and Washington, DC. The resources to address these challenges are there--what we lack are ideas that will help us jump the wall of disagreement and distrust that divides us. If we succeed, history will remember our era with gratitude; if we fail, the potential losses are incalculable. In this revolutionary book, renowned MIT economists Abhijit V. Banerjee and Esther Duflo take on this challenge, building on cutting-edge research in economics explained with lucidity and grace. Original, provocative, and urgent, Good Economics for Hard Times makes a persuasive case for an intelligent interventionism and a society built on compassion and respect. It is an extraordinary achievement, one that shines a light to help us appreciate and understand our precariously balanced world.
