The Hermetic Link Jacob Slavenburg,2012-04-01 Hermes is the Greek god of the Word, of thought and magic, the swift-moving messenger of the Divine and guardian of souls in the Afterlife. In Ancient Egypt he was the majestic god Thoth, the Recorder, the lord of measurement and science, the brother/husband of Isis. In Rome, he was of course Mercury, flying through the Emyrean at the speed of idea by the aid of his winged helmet and boots. In this broad survey of the Hermetic arts, author Jacob Slavenburg brings an unparalleled depth of insight to the subject. He examines the historical Hermetic literature and details its relevance to modern occultism, from the symbolism of architecture and art to the mysteries of Freemasonry. The heavenly mysteries of astrology are explored as are the healing arts which derive from the spirit of scientific inquiry embodied by Thoth/Hermes. Slavenburg examines the magical writings of the Greek papyri and their development into the contemporary magical practices of modern adepts. He sheds light on the workings of alchemy and the esoteric philosophy to the world of modern chemistry and physics. He explores the origin of evil and the realm of the afterlife, and the Hermetic doctrines of reincarnation and karma. In addition, the author provides a wealth of biographical data on the magi of Hermeticism, from Ficino to Agrippa, John Dee to Giordano Bruno.

The Concepts of the Divine in the Greek Magical Papyri Eleni Pachoumi,2017-05-05 Eleni Pachoumi looks at the concepts of the divine in the Greek magical papyri by way of a careful and detailed analysis of ritual practices and spells. Her aim is to uncover the underlying religious, philosophical and mystical parallelisms and influences on the Greek magical papyri. She starts by examining the religious and philosophical concept of the personal daimon and the union of the individual with his personal daimon through the magico-theurgic ritual of systasis. She then goes on to analyze the religious concept of paredros as the divine assistant and the various relationships between paredros, the divine and the individual. To round off, she studies the concept of the divine through the manifold religious and philosophical assimilations mainly between Greek, Egyptian, Hellenized gods and divine abstract concepts of Jewish origins.

Transcendental Magic Eliphas Levi,1968-01-15 This is Eliphas Levi's (1810-1875) best-known book. This work arguably made Levi THE most influential writer on magic since the Renaissance. Originally issued in French, the English translator is A.E. Waite and it is doubtful that anyone else could have better captured the essence of Levi's work. The book is divided in two parts; the first is theoretical, the second practical. This is a fascinating and often debated work involving a discussion that covers almost the entire realm of Ritual and High Magic.

Ashgate Critical Essays on Early English Lexicographers Anne C. McDermott,2017-03-02 The eighteenth century is renowned for the publication of Samuel Johnson's A Dictionary of the English Language, which reference sources still call the first English dictionary. This collection demonstrates the inaccuracy of that claim, but its tenacity in the public mind testifies to how decisively Johnson formed our sense of what a dictionary is. The essays and articles in this volume examine the already flourishing tradition of English lexicography from which Johnson drew, as represented by Kersey, Bailey, and Martin, as well as the flourishing contemporary trade in encyclopedic, technical, pronunciation, and bilingual lexicons.
