Corpora in Applied Linguistics Nikola Dobrić, Eva-Maria Graf, Alexander Onysko, 2016-08-17 This volume brings together contributions from the Klagenfurt Conference of Corpus-Based Applied Linguistics (CALK14), in order to extend corpus linguistic research in different areas of applied linguistics. The studies gathered here explore the opportunities that both spoken and written corpora offer for answering questions in different domains of applied linguistics such as second language learning, language testing, comparative linguistics, learner pragmatics and specialised discourses. At the same time, the contributions also give insight into possible limitations and further challenges of corpus-based research in these areas.

When the Scientist Presents Jean-Luc Lebrun, 2009-08-21 Check out the author's website at www.scientific-presentations.com This book looks at the presenting scientist from a novel angle: the presenter-host. When scientists give a talk, the audience ("guests") expects the title of the talk to determine presentation content, they require understandable slides, and they demand visible and audible scientific authority. To each expectation corresponds a set of skills: personal (voice, host qualities, time control), technical (presentation tools and slide design), and scientific (Q&A, slide content). The author takes an original human factor view of the presentation delivery, in which the audience is easily distracted, rapidly forgetful, and increasingly impatient. Thus, insightful pointers are given on how to deliver the talk, how to craft the slides, and how to prevent the computer from rendering the presenting host-scientist into a "ghost". In addition, the book goes in-depth over the treatment of questions by examining the motives and style of the questioners, and advising on how best to answer to each type of questioner. The book comes with a DVD for audio and video examples, and includes essential PowerPoint and Keynote techniques that a presenter cannot

live without. Contents: Content Selection: Paper and Oral Presentation: The Difference Content Filtering Criteria Audience Expectations: General Audience Expectations Scientific Audience Expectations The Slides: Five Slide Types, Five Roles Slide Design The Presenter: The Master of Tools Scientist and Perfect Host The Grabbing Voice The Answerable Scientist Readership: Students, graduates, postgraduates, and professionals seeking help in improving their scientific presentation skills.

How We Think N. Katherine Hayles, 2012-04-11 "How do we think?" N. Katherine Hayles poses this question at the beginning of this bracing exploration of the idea that we think through, with, and alongside media. As the age of print passes and new technologies appear every day, this proposition has become far more complicated, particularly for the traditionally print-based disciplines in the humanities and qualitative social sciences. With a rift growing between digital scholarship and its print-based counterpart, Hayles argues for contemporary technogenesis—the belief that humans and technics are coevolving—and advocates for what she calls comparative media studies, a new approach to locating digital work within print traditions and vice versa. Hayles examines the evolution of the field from the traditional humanities and how the digital humanities are changing academic scholarship, research, teaching, and publication. She goes on to depict the neurological consequences of working in digital media, where skimming and scanning, or "hyper reading," and analysis through machine algorithms are forms of reading as valid as close reading once was. Hayles contends that we must recognize all three types of reading and understand the limitations and possibilities of each. In addition to illustrating what a comparative media perspective entails, Hayles explores the technogenesis spiral in its full complexity. She considers the effects of early databases such as telegraph code books and confronts our changing perceptions of time and space in the digital age, illustrating this through three innovative digital productions—Steve Tomasula's electronic novel, *TOC*; Steven Hall's *The Raw Shark Texts*; and Mark Z. Danielewski's *Only Revolutions*. Deepening our understanding of the extraordinary transformative powers digital technologies have placed in the hands of humanists, *How We Think* presents a cogent rationale for tackling the challenges facing the humanities today.

Secure Searchable Encryption and Data Management Brij B.

Gupta,Mamta,2021-03-16 With the advent of the IT revolution, the volume of data produced has increased exponentially and is still showing an upward trend. This data may be abundant and enormous, but it's a precious resource and should be managed properly. Cloud technology plays an important role in data management. Storing data in the cloud rather than on local storage has many benefits, but apart from these benefits, there are privacy concerns in storing sensitive data over third-party servers. These concerns can be addressed by storing data in an encrypted form; however, while encryption solves the problem of privacy, it engenders other serious issues, including the infeasibility of the fundamental search operation and a reduction in flexibility when sharing data with other users, amongst others. The concept of searchable encryption addresses these issues. This book provides every necessary detail required to develop a secure, searchable encryption scheme using both symmetric and asymmetric cryptographic primitives along with the appropriate security models to ensure the minimum security requirements for real-world applications.

Experimentos de física usando las TIC y elementos de bajo costo Salvador

Gil,2020-05-20 El objetivo de este libro es presentar un conjunto de experimentos de Física que, haciendo uso de las nuevas Tecnologías de la Información y Comunicación (TIC), resalten los aspectos metodológicos de la Física y de las ciencias en general. Los experimentos están orientados a estudiantes universitarios de ciencia e ingeniería, aunque algunos pueden ser usados en escuelas secundarias. Los proyectos propuestos apuntan a que los estudiantes puedan responder las preguntas ¿Cómo sabemos esto? y ¿Por qué creemos en aquello?, que ilustran la naturaleza del pensamiento científico. Los experimentos propuestos están organizados alrededor de temas relacionados con: Metodología y Metrología, Mecánica, Electromagnetismo, Termodinámica, Óptica, Física moderna y Astrofísica. Conozca: los principios de la Física que permiten comprender la naturaleza de algunos fenómenos vistosos, atractivos e interesantes que aparecen en el libro. Desarrolle: experimentos amenos e instructivos con su computadora, teléfono celular, cámara de fotos, un diapasón, probetas, balanzas digitales y otros elementos de bajo costo y fáciles de conseguir. Salvador Gil es Doctor en Física por la Universidad de Washington, Seattle. Se desempeña como catedrático de Física General y Laboratorio en la Universidad de San Martín, Argentina y como profesor adjunto a cargo del Laboratorio de Física en la Universidad de Buenos Aires, cátedras de Física nuclear y Física superior. Trabaja también para el Ente Nacional Regulador del Gas (ENARGAS).

Fremdsprachen Lehren und Lernen 2011 Claus Königs, Frank Küster, Lutz

Gnutzmann,2014-11-28 Ziel dieser qualitativen Langzeitstudie ist es, Französischlehrkräften ei-ne Stimme zu geben und sie bei ihrer Aufgabe zu unterstützen, Lernerauto-nomie, und damit effizientes Lernen, zu fördern. Hierzu wurden ihre Subjektiven Theorien zum Großkonzept der Lerner-autonomie untersucht. Dabei dienen die Gegenstandsanalysen zur Lehrper-son und zur Lernerautonomie als Verständnishintergrund und Folie. Ange-sichts der Desiderata in Aus- und Fortbildung und der Tatsache, dass viele Lehrkräfte

weder durch ihre Lern- noch durch ihre Lehrbiografie Lernerautonomie systematisch erfahren bzw. erforscht haben, zeigt sich die Relevanz der Studie und ihrer Forschungsfragen. Dadurch dass bei allen Interviewten dieselben Fragenbereiche impulsgebend angesprochen wurden, konnten die komplexen Einzelfalldarstellungen zusammengeführt werden. Die Subjektiven Theorien der Interviewten erweitern einerseits das Konzept der Lernerautonomie um den Aspekt der Lehrkraft, die zur Lernerautonomie hinführt, und lassen andererseits für die Lehrerfortbildung Schwerpunkte zur Zusammenführung der wissenschaftlichen Daten und der Unterrichtspraxis erkennen.

Methoden der Fremdsprachenforschung Daniel Reimann, 2020-04-20 Dieser Band stellt das methodische Instrumentarium der Fremdsprachenforschung in Grundzügen vor. Dies ermöglicht es Ihnen beispielsweise, Fachartikel oder auch Beiträge auf Lehrerfortbildungen kritisch rezipieren und einschätzen zu können. Der Band ist auch als Hintergrund eigener erster Forschungsskizzen etwa im B.A.-Bereich der Lehramtsstudien geeignet, wo er Orientierung für die Wahl eines für die eigene Forschungsfrage geeigneten methodischen Zugriffs bietet.
