**Writing the Breakout Novel** Donald Maass,2002-08-01 Take your fiction to the next level! Maybe you're a first-time novelist looking for practical guidance. Maybe you've already been published, but your latest effort is stuck in mid-list limbo. Whatever the case may be, author and literary agent Donald Maass can show you how to take your prose to the next level and write a breakout novel - one that rises out of obscurity and hits the best-seller lists. Maass details the elements that all breakout novels share - regardless of genre - then shows you writing techniques that can make your own books stand out and succeed in a crowded marketplace. You'll learn to: • establish a powerful and sweeping sense of time and place • weave subplots into the main action for a complex, engrossing story • create larger-than-life characters that step right off the page • explore universal themes that will interest a broad audience of readers • sustain a high degree of narrative tension from start to finish • develop an inspired premise that sets your novel apart from the competition Then, using examples from the recent works of several best-selling authors - including novelist Anne Perry - Maass illustrates methods for upping the ante in every aspect of your novel writing. You'll capture the eye of an agent, generate publisher

interest and lay the foundation for a promising career.

**Teaching for Understanding with Technology** Martha Stone Wiske, Lisa Breit, 2004-12-13 Teaching for Understanding with Technology shows how teachers can maximize the potential of new technologies to advance student learning and achievement. It uses the popular Teaching for Understanding framework that guides learners to think, analyze, solve problems, and make meaning of what they've learned. The book offers advice on tapping into a rich array of new technologies such as web information, online curricular information, and professional networks to research teaching topics, set learning goals, create innovative lesson plans, assess student understanding, and develop communities of learners.

Be a Film Director Alix Wood, 2017-12-15 A lot of people are involved in making a movie; just count them in the ending credits. There's one person who's in charge of making sure that those people work together, the director. A director oversees all the creative pieces of a movie production. They may change scripts, costumes, and cast members, and have a say about all camera shots and final edits. It's stressful but rewarding; just ask an Oscar-winning director. Young directors will learn the myriad of responsibilities they can look forward to in this insightful volume, while gathering great advice on how to work with people to make a cinematic masterpiece.

*Industrial DevOps* Dr. Suzette Johnson,Robin Yeman,2023-10-10 The benefits of adopting agile ways of working are well-understood in the digital world. But those in cyber-physical systems (combining software, hardware, and firmware) think it is risky. But with today's speed of change, maybe the risk is in not changing. *Industrial DevOps: Build Better Systems Faster* shows readers how applying Agile and DevOps ways of working into cyber-physical systems presents the opportunity to reap huge rewards, including increased adaptability, shorter delivery schedules, reduced development cost, increased quality, and higher transparency into delivery. This book shows you how to couple the results of Agile and DevOps implementation in development with Lean and Agile in manufacturing. Through a successful application of 9 key principles, *Industrial DevOps* provides the foundational success patterns for the development of cyber-physical systems in the digital age. The benefits that have been obtained across industries can be transferred to the cyber-physical domain and they have the potential to provide an even greater impact in the delivery of products.

**Learning and Collaboration Technologies. Learning and Teaching** Panayiotis Zaphiris,Andri Ioannou,2018-07-09 This two-volume set LNCS 10924 and 10925 constitute the refereed proceedings of the 5th International Conference on Learning and

Collaboration Technologies, LCT 2018, held as part of the 20th International Conference on Human-Computer Interaction, HCII 2018, in Las Vegas, NV, USA in July 2018. The 1171 papers presented at HCII 2018 conferences were carefully reviewed and selected from 4346 submissions. The papers cover the entire field of human-computer interaction, addressing major advances in knowledge and effective use of computers in a variety of applications areas. The papers in this volume are organized in the following topical sections: designing and evaluating systems and applications, technological innovation in education, learning and collaboration, learners, engagement, motivation, and skills, games and gamification of learning, technology-enhanced teaching and assessment, computing and engineering education.

The Hero's Journey of the Sales Engineer Patrick Pissang, 2020-11-20 That B2B sales training must be boring proved to be a myth. Role-play elements, character development, personality analysis engage students (aka hero's) like in no other B2B course before. This workbook is for all students of the Vision-Driven Sales Engineering course the hero's journey of the Sales Engineer. But it is not limited to that as the hero can take the character sheet to another training and further develop it. All the hero needs on top is a pencil, a rubber, and a d20 (a die with 20 sides). And of course, a training slot booked on The hero's journey of the Sales Engineer. The training developed on the following core principles. Sales Engineers are partners in the account team, not human feature databases or demo dollies. Sales Engineers have the right and responsibility to build a culture that allows them to thrive, to be successful, and to be motivated. Sales Engineers are the primary source of differentiation and product positioning. Sales Engineers must be able to

sell strategic deals, not only tactical software/feature transactions. Sales Engineers should aspire to reach thought leader status (on social media) and become proficient in public speaking. The SE organization will massively specialize and split into various roles. Sales leadership should use that to the companies advantage. There are a lot of niches to conquer: C-Level conqueror, strategy advisor, developer evangelist, proposal expert, public speaker, press expert, thought leader, blogger, and thought leader. Demos and RfPs will disappear from the daily chores list of a SE; at least they will require significantly less time! There are already tools that automate most of those tasks or even make them obsolete. Sales Engineers are inspired, open-minded professionals who mastered technology, have resourceful business conversations on all levels, and lead their clients with the unexpected.

*The Secret at Greenrock* Rob Stone, Various, 2001-10 *The Secret at Greenrock* is the first in a series of adventures that take place on a continent known as Myrra. Each of the adventures is designed to be played either individually or as part of an on-going campaign. Though the adventure is designed for Levels 5 through 7, modifications can be made to allow lower- or higher-level heroes to participate.

Narrative Networks Brian Alleyne, 2014-12-08 We are invited to think about the now ubiquitous everyday practices of interpreting and producing narratives across a range of modalities. The result is a text that inspires readers to think in new ways about narratives, invites them to analyse narrative texts available on the Web and, for those who wish, suggests how best to employ specialist software. - Ann Phoenix, Institute of Education, University of London It's high time we have a book like this. Brian Alleyne has managed to produce the best, clearest, and most comprehensive overview of narrative theory for social scientists I have yet to see. I wish I'd had access to a book like this when I was a student. It would have made my life so much easier. It will surely become the universally recognised go-to book on the subject. - David Graeber, London School of Economics & Political Science Narrative is a fundamental means whereby we make sense of our own lives and of the world around us. The stories we tell, and are being told, shape our identities, relationships and world-views. In a rapidly changing digital society where blogging and social networking have become fundamental communication channels, the platforms for the creation and exchange of all kinds of narratives have greatly expanded. This book responds to the dynamic production and consumption of stories of all kinds in popular and academic cultures. It offers a comprehensive discussion of the underlying philosophical and methodological issues of narrative and personal narrative research as well as applying these to the current digital landscape. The book provides practical guidance on data management and use of software for the narrative researcher. Illustrated with examples from a range of fields and disciplines as well as the author's own

work on hacking cultures and cultural activism, this title is a must for anyone wanting to learn about narrative approaches in social research and how to conduct successful narrative research in a digital age.
