Solaris 10 System Administration Exam Prep 2 Bill Calkins, 2005-12-23 The Solaris 10 System Administrator Certification Exam Prep 2 is the ideal book for both new and seasoned system administrators. This book will give you the insight you need into the newest certification exams for system administrators, the 310-200 and the 310-202. It offers classroom-style training by one of the best and well-known authors in the Solaris world, Bill Calkins. It will equip you with vital knowledge for success on exam day plus it acts as a reference guide that will come in handy after the test. The content addresses all the new exam objectives in detail and will show you how to apply this knowledge to real-world scenarios.

Solaris 10 System Administration Exam Prep Bill Calkins, 2009-05-06 Solaris 10 System Administration Part II Exam CX-310-202 Bill Calkins In this book you'll learn Advanced Topics in Solaris 10 System Administration for SPARC and x86-based systems including: Administering the network environment in Solaris 10 Setting up RAID metadevices using SVM Configuring ZFS storage pools and file systems Configuring and administering Solaris zones and containers Administering virtual file systems and swap space Creating and administering user and Role-Based access accounts (RBAC) Using advanced installation tools to install, clone, and upgrade the operating system Bill's original Cert Prep guides were used throughout Sun's service organization as the SEs studied for Certification. This was not mandated by Sun management but happened through word-of-mouth by those software engineers who had successfully passed the exam. In this new edition, Bill adds a chapter for ZFS. It includes Live Upgrade conversion to a ZFS root filesystem and Zone/ZFS inter-operation. Plus, all chapters have been updated to reflect the Solaris 10 10/08 enhancements. This new guide remains the best source of preparation for the Solaris 10 Cert exam. -Brian Howard, Systems Engineer / Solaris Ambassador WRITTEN BY A LEADING SOLARIS EXPERT! Bill Calkins is owner and president of Pyramid Consulting, a computer training and consulting firm specializing in the implementation and administration of open systems. He works as a consultant with Sun Microsystems and has contributed extensively to the Solaris certification program and simulation technology. He also owns www.unixed.com, a website that provides online UNIX training materials. Bill has more than 20 years of experience in UNIX system administration, consulting, and training at more than 250 different companies and government agencies and has authored several books on Solaris. informit.com/examcram ISBN-13: 978-0-7897-3817-2 ISBN-10: 0-7897-3817-1

Frontiers of Nano-Optoelectronic Systems Lorenzo Pavesi, Eugenia V. Buzaneva, 2012-12-06 Since their discovery, low dimensional materials have never stopped to intrigue scientists, whether they are physicists, chemists, or biochemists. Investigations of their nature and functions have always been and still are numerous and as soon as a solution is found for a given question, another one is raised. The coupling of nano-materials with photonics, i. e. nano-photonics, has produced a boiling pot of ideas, problems, discovery and applications. This statement is abundantly illustrated in the present book. The interest in nano-optoelectronic materials and systems is very widespread, what gives a really international and multicultural flavour to nano-optoelectronic meetings. One of them was organized by our-self in May 2000 in Kiev as a NATO Advanced Research Workshop and EC-Spring School. The arrival of the new millennium provides an obvious transition point at which many aspects of nano-science and nano-engineering of nano photonic systems can be assessed with respect to the research progresses made in the preceding decades and to the challenges that lie ahead in the coming decades. This book was planned to mark this with the objective of presenting a collection of papers from experts, which provide broad perspectives on the state-of-the-art in the various disciplines of nano science and nano-engineering and on the directions for future research.

Vitamin Analysis for the Health and Food Sciences Ronald R. Eitenmiller, W. O. Landen, Jr, 2010-12-12 Vitamin Analysis for the Health and Food Sciences is a valuable resource for students and professionals who want to understand the latest advances in the field and the method development efforts that led to the scientific community's current capability to accurately assay fat- and water-soluble vitamins. This book covers both internationally accepted regulatory and handbook methods as well as recently published research. Discussion emphasizes practical aspects of vitamin analysis gained from the author's experience in the laboratory.

The Network Security Test Lab Michael Gregg, 2015-08-24 The ultimate hands-on guide to IT security and proactive defense The Network Security Test Lab is a hands-on, step-by-step guide to ultimate IT security implementation. Covering the full complement of malware, viruses, and other attack technologies, this essential guide walks you through the security assessment and penetration testing process, and provides the set-up guidance you need to build your own security-testing lab. You'll look inside the actual attacks to decode their methods, and learn how to run attacks in an isolated sandbox to better understand how attackers target systems, and how to build the defenses that stop them. You'll be introduced to tools like Wireshark, Networkminer, Nmap, Metasploit, and more as you discover techniques for defending against network attacks, social networking bugs, malware, and the most prevalent malicious traffic. You also get access to open source tools, demo software, and a bootable version of Linux to facilitate hands-on learning and help you implement your new skills. Security technology continues to evolve, and yet not a week goes by without news of a new security breach or a new exploit being released. The Network Security Test Lab is the ultimate guide when you are on the front lines of defense, providing the most up-to-date methods of thwarting would-be attackers. Get acquainted with your hardware, gear, and test platform Learn how attackers penetrate existing security systems Detect malicious activity and build effective defenses Investigate and analyze attacks to inform defense strategy The Network Security Test Lab is your complete, essential guide.

Network Troubleshooting Tools Joseph D Sloan, 2001-08-09 Over the years, thousands of tools have been developed for debugging TCP/IP networks. They range from very specialized tools that do one particular task, to generalized suites that do just about everything except replace bad Ethernet cables. Even better, many of them are absolutely free. There's only one problem: who has time to track them all down, sort through them for the best ones for a particular purpose, or figure out how to use them? Network Troubleshooting Tools does the work for you--by describing the best of the freely available tools for debugging and troubleshooting. You can start with a lesser-known version of ping that diagnoses connectivity problems, or take on a much more comprehensive program like MRTG for graphing traffic through network interfaces. There's tkined for mapping and automatically monitoring networks, and Ethereal for capturing packets and debugging low-level problems. This book isn't just about the tools available for

troubleshooting common network problems. It also outlines a systematic approach to network troubleshooting: how to document your network so you know how it behaves under normal conditions, and how to think about problems when they arise, so you can solve them more effectively. The topics covered in this book include: Understanding your network Connectivity testing Evaluating the path between two network nodes Tools for capturing packets Tools for network discovery and mapping Tools for working with SNMP Performance monitoring Testing application layer protocols Software sources If you're involved with network operations, this book will save you time, money, and needless experimentation.

Show Networks and Control Systems John Huntington, 2012 *Show Networks and Control Systems** has been the industry standard reference in backstage control technology since 1994. With a unique combined focus on computers, networks, control systems, art and practice, the book offers an in-depth examination of the control and networking technology used in lighting, lasers, sound, stage machinery, animatronics, special effects, and pyrotechnics for concerts, theme parks, theatre, themed-retail, cruise ships, museums, interactive performing arts, and special events. This completely revised, reorganized and updated edition includes more than 30 new pages and dozens of brand-new graphics, with dramatically expanded coverage of show networking technology and fresh real-world examples. Drawing upon his extensive experience in the field and classroom, John Huntington clearly explains everything that goes on behind the scenes and inside the machines to bring bold visions to life in real-world settings. * Formerly Control Systems for Live Entertainment

Asymmetric Synthesis II Mathias Christmann, Stefan Bräse, 2013-04-12 After the overwhelming success of 'Asymmetric Synthesis - The Essentials', displaying a broad range of organic asymmetric syntheses, this is the second edition with latest subjects and authors. While the aim of the first edition was mainly to honor the achievements of the pioneers in asymmetric syntheses, the aim of this new edition was bringing the current developments, especially from younger colleagues, to the attention of students. The format of the book remained unchanged, i.e. short conceptual overviews by young leaders in their field including a short biography of the authors. The growing multidisciplinary research within chemistry is reflected in the selection of topics including metal catalysis, organocatalysis, physical organic chemistry, analytical chemistry, and its applications in total synthesis, materials research and industry. The prospective reader of this book is a graduate or undergraduate student of advanced organic chemistry as well as the industrial chemist who wants to get a brief update on the current developments in the field.
